Cochrane Handbook for Systematic Reviews of Interventions Julian P. T. Higgins, Sally Green, 2008-11-24 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library ([www.thecochranelibrary.com](http://www.thecochranelibrary.com)). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

Reischuk, Laurent Chuat, 2018-08-25 This book describes the essential components of the SCION secure Internet architecture, the first architecture designed foremost for strong security and high availability. They facilitate the reader throughout, structuring the book so that the technical detail gradually increases, and supporting the text with a glossary, an index, a list of abbreviations, answers to frequently asked questions, and special highlighting for examples and for sections that explain important research, engineering, and deployment features. The book is suitable for researchers, practitioners, and graduate students who are interested in network security.

*Improvising Reconciliation* Ed Charlton, 2021-11-15 Improvising Reconciliation lobbies for an expanded approach to South Africa's formal transition from apartheid, grappling with reconciliation's ongoing potential. Rather than correcting the contradictions that have done much to corrupt the concept, it surveys the improvised approach to reconciliation that has emerged from the country's cultural sphere in recent decades.

The Digital Dilemma National Research Council, Commission on Physical Sciences, Mathematics, and

Applications, Computer Science and Telecommunications Board, Committee on Intellectual Property Rights and the Emerging Information Infrastructure, 2000-02-24 Imagine sending a magazine article to 10 friends-making photocopies, putting them in envelopes, adding postage, and mailing them. Now consider how much easier it is to send that article to those 10 friends as an attachment to e-mail. Or to post the article on your own site on the World Wide Web. The ease of modifying or copying digitized material and the proliferation of computer networking have raised fundamental questions about copyright and patent—intellectual property protections rooted in the U.S. Constitution. Hailed for quick and convenient access to a world of material, the Internet also poses serious economic issues for those who create and market that material. If people can so easily send music on the Internet for free, for example, who will pay for music? This book presents the multiple facets of digitized intellectual property, defining terms, identifying key issues, and exploring alternatives. It follows the complex threads of law, business, incentives to creators, the American tradition of access to information, the international context, and the nature of human behavior. Technology is explored for its ability to transfer content and its potential to protect intellectual property rights. The book proposes research and policy recommendations as well as principles for policymaking.

Stanley, 2017-06-01 Oil, Gas, and Mining: A Sourcebook for Understanding the Extractive Industries provides developing countries with a technical understanding and practical options around oil, gas, and mining sector development issues. A central premise of the Sourcebook is that good technical knowledge can better inform political, economic, and social choices with respect to sector development and the related risks and opportunities. The guidance provided by the Sourcebook assumes a broad set of overarching principles, all centered on good governance and directed at achieving positive and broadly based sustainable development outcomes. This Sourcebook is rich in presenting options to challenges, on the understanding that contexts and needs vary, and that there is much to be gained from appreciating the lessons learned from a broad set of experiences.

**Principles of Protocol Design** Robin Sharp, 2008-02-13 This book introduces the reader to the principles used in the construction of a large range of modern data communication protocols. The approach we take is rather a formal one,

primarily based on descriptions of protocols in the notation of CSP. This not only enables us to describe protocols in a concise manner, but also to reason about many of their interesting properties and formally to prove certain aspects of their correctness with respect to appropriate specifications. Only after considering the main principles do we go on to consider actual protocols where these principles are exploited. This is a completely new edition of a book which was first published in 1994, where the main focus of many international efforts to develop data communication systems was on OSI - Open Systems Interconnection - the standardised architecture for communication systems developed within the International Organisation for Standardization, ISO. In the intervening 13 years, many of the specific protocols - developed as part of the OSI initiative have fallen into disuse. However, the terms and concepts introduced in the OSI Reference Model are still essential for a systematic and consistent analysis of data communication systems, and OSI terms are therefore used throughout. There are three significant changes in this second edition of the book which particularly reflect recent developments in computer networks and distributed systems.

**The Power to Coerce** David C. Gompert, Hans Binnendijk, 2016-02-25 Mounting costs, risks, and public misgivings of waging war are raising the importance of U.S. power to coerce (P2C). The best P2C options are financial sanctions, support for nonviolent political opposition to hostile regimes, and offensive cyber operations. The state against which coercion is most difficult and risky is China, which also happens to pose the strongest challenge to U.S. military options in a vital region.

*Asterisk* Jim Van Meggelen, Leif Madsen, Jared Smith, 2007-08-28 Provides information on Asterisk, an open source telephony application.

Transport Prices and Costs in Africa Supee Teravaninthorn, Gaël Raballand, 2009 Transport prices for most African landlocked countries range from 15 to 20 percent of import costs. This is approximately two to three times more than in most developed countries. It is well known that weak infrastructure can account for low trade performance. Thus, it becomes necessary to understand what types of regional transport services operate in landlocked African nations and it is critical to identify the regulation disparities and provision anomalies that hurt infrastructure efficiency, even when the physical infrastructure, such as a road transport corridor, exists. 'Transport Prices and Costs in Africa' analyzes the various reasons for poor transport performance seen widely throughout Africa and provides a compelling case for a number of national and regional reforms that are vital to the effort to address the underlying causes of high transport prices and costs and service unpredictability seen in Africa. The book will greatly help supervisory authorities throughout the region develop and implement a comprehensive transport policy that will facilitate long-term growth.

**The Education Triple Cocktail** Brahm Fleisch, 2018-08-15 The Education Triple Cocktail brings together rigorous quantitative and qualitative research on a new approach to improving foundational teaching and learning for schoolchildren living in working-class, poor and remote rural communities in resource-constrained systems like South Africa. At the core of

this book is the theory and evidence for a powerful, new, interlocking and mutually reinforcing change model. Inspired by the AIDS treatment story, the three-pronged approach of structured daily lesson plans, appropriate and high-quality educational materials, and one-on-one instructional coaching to help teachers transform their instructional practices in early grade classrooms, shows that it will improve learning outcomes. For education systems defined by low levels of early grade learning and profoundly unequal outcomes, The Education Triple Cocktail offers a theoretically informed, evidence-based way forward. This book will be of immense use to teachers, students of Education, policymakers and parents.

**Co-Production and Co-Creation** Taco Brandsen, Bram Verschuere, Trui Steen, 2018-03-15 Co-production and co-creation occur when citizens participate actively in delivering and designing the services they receive. It has come increasingly onto the agenda of policymakers, as interest in citizen participation has more generally soared. Expectations are high and it is regarded as a possible solution to the public sector's decreased legitimacy and dwindling resources, by accessing more of society's capacities. In addition, it is seen as part of a more general drive to reinvigorate voluntary participation and strengthen social cohesion in an increasingly fragmented and individualized society. *Co-Production and Co-Creation: Engaging Citizens in Public Services* offers a systematic and comprehensive theoretical and empirical examination of the concepts of co-production and co-creation and their application in practice. It shows the latest state of knowledge on the topic and will be of interest both to students at an advanced level, academics and reflective practitioners. It addresses the topics with regard to co-production and co-creation and will be of interest to researchers, academics, policymakers, and students in the fields of public administration, business administration, economics, political science, public management, political science service management, sociology and voluntary sector studies.
