Biodiversity N. Biedinger, Wilhelm Barthlott, Matthias Winiger, 2013-06-29 Biodiversity, sometimes simply understood as diversity of species, is a specific quality of life on our planet, the dimensions and importance of which have just lately been fully realized. Today we know that biological diversity is a global asset of incalculable value to present and future generations (Kofi Annan). Biodiversity is spread unequally over the world: in fact, the main share of biological resources worldwide is harboured predominantly by the so-called developing countries in the tropics and sub tropics. Therefore, Biodiversity - A Challenge for Development Research and Policy was chosen as the title for an international conference which was held in Bonn in 1997 as one of the first major events organized by the then newly established North-South Centre for Development Research (ZEF) at Rheinische Friedrich-Wilhelms-Universität Bonn (Germany). Since the ZEF, founded by the Senate of the University of Bonn in 1995, has played a central role in turning Bonn into a centre for international cooperation and North-South dialogue. The Centre is a product of the Bonn Berlin agreement of July 1994 which was adopted to offset the effects caused by the Parliament and much of the Government moving to Berlin. It fits in well with the double strategy to strengthen Bonn's position as an international science arena and as an eminent place for development policy and the national and supranational agencies dealing with this issue.

The Golden Flower Pot (Fantasy and Horror Classics) E. T. A. Hoffmann, 2015-10-21 This early work by E. T. A. Hoffmann was originally published in 1814. Born in Königsberg, East Prussia in 1776, Hoffmann's family were all jurists, and during his youth he was initially encouraged to pursue a career in law. However, in his late teens Hoffman became increasingly interested in literature and philosophy, and spent much of his time reading German classicists and attending lectures by, amongst others, Immanuel Kant. Hoffman went on to produce a great range of both literary and musical works. Probably Hoffman's most well-known story, produced in 1816, is 'The Nutcracker and the Mouse King', due to the fact that - some seventy-six years later - it inspired Tchaikovsky's ballet The Nutcracker. In the same vein, his story 'The Sandman' provided both the inspiration for Léo Delibes's ballet Coppélia, and the basis for a highly influential essay by Sigmund Freud, called 'The Uncanny'. (Indeed, Freud referred to Hoffman as the unrivalled master of the uncanny in literature.) Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions.

Vulvovaginal Candidosis Werner Mendling, 2012-12-06 Fungal infections in the female play an increasingly large role in everyday gynecological practice. This is the first book to deal comprehensively with vulvovaginal candidosis. Following an introduction outlining the incidence of yeasts in man, genital colonization in the female sex, yeast in pregnancy and neonatal mycoses, there is a description of the modes of infection and the known host reactions, as well as of the symptoms for diagnosis and therapy. Some 150 color illustrations depict all known facultative pathogenetic candida species and other potentially pathogenetic yeasts in pure culture and under the microscope. Clinical examples help explain the diagnosis and differential diagnosis. The volume provides the physician with handy, concise and practice-oriented guidelines to correct diagnosis and effective treatment of yeasts in the female patient.

The Berlin Aging Study Paul B. Baltes,Karl Ulrich Mayer,2001-03-19 The present and future of our society are shaped by an ever-increasing proportion of old and very old people. The Berlin Aging Study is one of the largest interdisciplinary efforts to explore old age and aging. Unique aspects of the Berlin Aging Study are the spectrum of scientific disciplines involved, the range of discipline-specific and interdisciplinary research topics, the focus on very old age (70 to over 100 years), and the empirical reference to a representative heterogenous urban population. The study's first cross-sectional findings on intellectual abilities, self and personality, social relationships, physical health, functional capacity, medical treatment, mental disorders such as depression and dementia, socioeconomic conditions, activities, everyday competence, subjective well-being, and gender differences are reported in depth in this book. The study was carried out in the context of the Berlin-Brandenburg Academy of Sciences study group on 'Aging and Social Development'. The authors primarily conduct their research at the Berlin Max Planck Institute for Human Development, the Free University of Berlin, and the Humboldt University, Berlin.

Greek Medical Papyri Nicola Reggiani,2019-09-23 The volume collects papers presented at the International Conference Greek Medical Papyri - Text, Context, Hypertext held at the University of Parma on November 2-4, 2016, as the final event of the ERC project DIGMEDTEXT, aimed primarily at creating an online textual database of the Greek papyri dealing with medicine. The contributions, authored by outstanding papyrologists and historians of the ancient medicine, deal with a variety of topics focused on the papyrological evidence of ancient medical texts and contexts. The first part, devoted to medical texts, contains some new reflections on important sources such as the Anonymus Londinensis and the Hippocratic corpus, as well as on specific themes like the pharmacological vocabulary, the official medical reports, the medical care in

the Roman army. The second part collects papers about the doctors' context, providing highlights from broader viewpoints like the analysis of the writing supports, the study of the ostraka from the Eastern Desert, the evidence of inscriptions and philosophical texts. The third part is entirely focused on the DIGMEDTEXT project itself: the team members present some relevant key issues raised by the digitisation of the medical papyri.

Advances in Noninvasive Cardiology J. Meyer, Peter Schweizer, Raimund Erbel, 1983-09-30 Many noninvasive examination methods of the heart have not held out against the invasive methods, which modern cardiac therapy, surgically or with catheterization, requires. They have disappeared completely or are only used by isolated groups of researchers. However, there is an obvious tendency to apply the invasive procedures as the last diagnostic possibility. In the attempt to select clinically relevant methods, the expert authors of this book demonstrate that echocardiography, expanded with contrast and Doppler, has been developed into one of the most important noninvasive methods. The results with tissue characterization show that the possibilities of this method have not yet been fully explored. Nuclear procedures are widely used, although they should only be applied in direct connection with clinical cardiology. The new lead methods of the ecg, such as ecg-mapping, show that standard electrocardiography of electrical functions is not yet fully exploited. The rapidly developing method of computer tomography is also being applied to cardiology. Since nuclear magnetic resonance requires extensive equipment construction, its future is as yet unsure. Of course, a book like this does not intend to treat the subject of noninvasive cardiology in extensive detail. Established methods like standard electrocardiography, phonocardiography and sphygmography are not discussed. The aim of this book is rather to demonstrate the trend of present developments in the field. Sleepiness Michael J. Thorpy, Michel Billiard, 2011-01-27 Written and edited by leading clinicians and researchers in sleep medicine, this is the first book to focus on the causes, consequences and treatment of disorders of excessive sleepiness. Extensive coverage is provided for all known causes of sleepiness, including sleep deprivation, obstructive sleep apnea syndrome, narcolepsy and other hypersomnias of central origin, shift work, and medical and psychiatric disorders. Since many causes of sleepiness are difficult to differentiate from each other, and treatment modalities can vary greatly from one disorder to another, this book helps the clinician to formulate a differential diagnosis that will ultimately lead to the correct diagnosis. Epidemiology, evaluation of the sleepy patient, diagnostic investigations including neuroimaging, subjective and objective testing, cognitive effects of sleepiness, motor vehicle driving issues, medico-legal aspects of sleepiness, and therapy are also discussed in detail. This is an essential resource for neurologists, psychiatrists and sleep specialists.

The Social Benefits of Education Jere R. Behrman, Nevzer Stacey, 2010-08-04 For decades, the primary argument in justifying education has been based on its direct economic effects. Yet education also provides social benefits for individuals and society at large, including a better way of taking care of ourselves, and consequently creating a better society to live in. Though it is difficult to quantify these social benefits, a more systematic analysis would improve our understanding of the full effects of education and provide a basis for considering related policies. The Office of Research of the United States Department of Education commissioned a series of papers on measuring these effects of education. Those papers, revised and updated, are collected here. Kenneth J. Arrow provides perspective on education and preference formation, and Jere R. Behrman considers general conceptual and measurement issues in assessing the social benefits of education and policies related to education. These issues are taken up by experts in four fields--health, parenting, the environment, and crime. Themes addressed include measurement issues regarding what we mean by education and its benefits; basic analytical issues in assessing the impact of education on these social benefits using behavioral data; and whether the social benefits of education justify public policy interventions. Jere R. Behrman is William R. Kenan Jr. Professor of Economics, University of Pennsylvania. Nevzer G. Stacey is Senior Research Analyst, Office of Educational Research, U.S. Department of Education.
