Science with Storytelling Jane Stenson, Sherry Norfolk, Lynette J. Ford, 2017-02-06 This book is about the intersection of storytelling and science. Recognizing that humans are hard-wired for narrative, this collection of new essays integrates the two in a special way to teach science in the K-6 classroom. As science education changes its focus to concepts that bridge various disciplines, along with science and engineering practices, storytelling offers opportunities to enhance the science classroom. Lesson plans are provided, each presenting a story, its alignment with science (Next Generation Science Standards), language arts (Common Core State Standards) and theater arts standards (National Core Arts Standards). Instructional plans include a rationale, preparation, activities and assessment.

Science And Human Behavior B.F Skinner, 2012-12-18 The psychology classic—a detailed study of scientific theories of human nature and the possible ways in which human behavior can be predicted and controlled—from one of the most influential behaviorists of the twentieth century and the author of *Walden Two*. “This is an important book, exceptionally well written, and logically consistent with the basic premise of the unitary nature of science. Many students of society and culture would take violent issue with most of the things that Skinner has to say, but even those who disagree most will find this a stimulating book.” —Samuel M. Strong, *The American Journal of Sociology* “This is a remarkable book—remarkable in that it presents a strong, consistent, and all but exhaustive case for a natural science of human behavior...It ought to be...valuable for those whose preferences lie with, as well as those whose preferences stand against, a behavioristic approach to human activity.” —Harry Prosch, *Ethics*

Stuck Marc Sommers, 2012 Young people are transforming the global landscape. As the human population today is younger and more urban than ever before, prospects for achieving adulthood dwindle while urban migration soars. Devastated by genocide, hailed as a spectacular success, and critiqued for its human rights record, the Central African nation of Rwanda provides a compelling setting for grasping new challenges to the world's youth. Spotlighting failed masculinity, urban desperation, and forceful governance, Marc Sommers tells the dramatic story of young Rwandans who are “stuck,” striving against near-impossible odds to become adults. In Rwandan culture, female youth must wait, often in vain, for male youth to build a house before they can marry. Only then can male and female youth gain acceptance as adults. However,

Rwanda's severe housing crisis means that most male youth are on a treadmill toward failure, unable to build their house yet having no choice but to try. What follows is too often tragic. Rural youth face a future as failed adults, while many who migrate to the capital fail to secure a stable life and turn fatalistic about contracting HIV/AIDS. Featuring insightful interviews with youth, adults, and government officials, Stuck tells the story of an ambitious, controlling government trying to govern an exceptionally young and poor population in a densely populated and rapidly urbanizing country. This pioneering book sheds new light on the struggle to come of age and suggests new pathways toward the attainment of security, development, and coexistence in Africa and beyond. Stuck Heidi J. Larson, 2020-07-01 Vaccine reluctance and refusal are no longer limited to the margins of society. Debates around vaccines' necessity -- along with questions around their side effects -- have gone mainstream, blending with geopolitical conflicts, political campaigns, celebrity causes, and natural lifestyles to win a growing number of hearts and minds. Today's anti-vaccine positions find audiences where they've never existed previously. Stuck examines how the issues surrounding vaccine hesitancy are, more than anything, about people feeling left out of the conversation. A new dialogue is long overdue, one that addresses the many types of vaccine hesitancy and the social factors that perpetuate them. To do this, Stuck provides a clear-eyed examination of the social vectors that transmit vaccine rumors, their manifestations around the globe, and how these individual threads are all connected.

Living in the State of Stuck Marcia Joslyn Scherer, 2000 Assistive technology has radically changed the lives of persons with disabilities, enabling them to work and perform in ways they might never have dreamed possible for themselves. But while these devices do improve physical capabilities, this functional gain is not synonymous with enhanced quality of life. The larger questions are too often ignored: What does the individual define as rehabilitation success? How does a given device contribute to fulfilling that person's needs? Are environmental factors -- from psychological resistance to insufficient training for use -- compromising the effectiveness of the device?

Stuck with Tourism Matilde Córdoba Azcárate, 2020-10-20 Tourism has become one of the most powerful forces organizing the predatory geographies of late capitalism. It creates entangled futures of exploitation and dependence, extracting resources and labor, and eclipsing other ways of doing, living, and imagining life. And yet, tourism also creates

jobs, encourages infrastructure development, and in many places inspires the only possibility of hope and well-being. *Stuck with Tourism* explores the ambivalent nature of tourism by drawing on ethnographic evidence from the Mexican Yucatán Peninsula, a region voraciously transformed by tourism development over the past forty years. Contrasting labor and lived experiences at the beach resorts of Cancún, protected natural enclaves along the Gulf coast, historical buildings of the colonial past, and maquilas for souvenir production in the Maya heartland, this book explores the moral, political, ecological, and everyday dilemmas that emerge when, as Yucatán's inhabitants put it, people get stuck in tourism's grip.

Foundations of Data Science Avrim Blum, John Hopcroft, Ravindran Kannan, 2020-01-23 Covers mathematical and algorithmic foundations of data science: machine learning, high-dimensional geometry, and analysis of large networks.

Troubled Transit Antje Missbach, 2015-09-11 *Troubled Transit* considers the situation of asylum seekers stuck in limbo in Indonesia from a number of perspectives. It presents not only the narratives of many transit migrants but also the perceptions of Indonesian authorities and of representatives of international and non-government organizations responsible for the care of transiting asylum seekers. Fascinated by the extraordinary and seemingly limitless resilience shown by asylum seekers during their often lengthy and dangerous journeys, the author highlights one particular fragment of their journeys — their time in Indonesia, which many expect to be the last stepping stone to a new life. While they long for their new life to unfold, most asylum seekers become embroiled in the complexities of living in transit. Indonesia, a vast archipelago of more than 17,000 islands, is more than a location where people spend time waiting; it is a nation state that interacts with transiting asylum seekers and formulates policies that have a profound impact on their experience in transit there. *Troubled Transit* tries to explain the complexities faced by the transiting migrants within the context of the Indonesian government and its political challenges, including its relationship with Australia. The Australia-centric view of recent asylum seeker issues has tended to ignore the larger socio-political context of the migratory routes and the perspectives of transit states towards asylum seekers stuck in transit. This book hopes to direct the Australia-centric gaze northwards to take Indonesian policies and policymaking into account, thereby giving Indonesia more relevance as a transit country and as an important partner in regional protection schemes and migration management. Even though some Indonesian policies and practices are less than favourable for asylum seekers, and even reprehensible from a human rights perspective, more attention must be paid to ongoing developments that impact on transiting asylum seekers in Indonesia if any of the hardships they suffer there are to be alleviated.

No Place To Go Leslie Lowe, 2018-09-11 Adults don't talk about the business of doing our business. We work on one

assumption: the world of public bathrooms is problem- and politics-free. *No Place To Go: Answering the Call of Nature in the Urban Jungle* reveals the opposite is true. *No Place To Go* is a toilet tour from London to San Francisco to Toronto and beyond. From pay potties to deserted alleyways, *No Place To Go* is a marriage of urbanism, social narrative, and pop culture that shows the ways — momentous and mockable — public bathrooms just don't work. Like, for the homeless, who, faced with no place to go sometimes literally take to the streets. (Ever heard of a municipal poop map?) For people with invisible disabilities, such as Crohn's disease, who stay home rather than risk soiling themselves on public transit routes. For girls who quit sports teams because they don't want to run to the edge of the pitch to pee. Celebrities like Lady Gaga and Bruce Springsteen have protested bathroom bills that will stomp on the rights of transpeople. And where was Hillary Clinton after she arrived back to the stage late after the first commercial break of the live-televised Democratic leadership debate in December 2015? Stuck in a queue for the women's bathroom. Peel back the layers on public bathrooms and it's clear many more people want for good access than have it. Public bathroom access is about cities, society, design, movement, and equity. The real question is: Why are public toilets so crappy?

Houston, We Have a Narrative Randy Olson, 2015-09-15 Communicate more effectively about science—by taking a page from Hollywood and improving your storytelling skills. Ask a scientist about Hollywood, and you'll probably get eye rolls. But ask someone in Hollywood about science, and they'll see dollar signs: Moviemakers know that science can be the source of great stories, with all the drama and action that blockbusters require. That's a huge mistake, says Randy Olson: Hollywood has a lot to teach scientists about how to tell a story—and, ultimately, how to do science better. With *Houston, We Have a Narrative*, he lays out a stunningly simple method for turning the dull into the dramatic. Drawing on his unique background, which saw him leave his job as a working scientist to launch a career as a filmmaker, Olson first diagnoses the problem: When scientists tell us about their work, they pile one moment and one detail atop another moment and another detail—a stultifying procession of “and, and, and.” What we need instead is an understanding of the basic elements of story, the narrative structures that our brains are all but hardwired to look for—which Olson boils down, brilliantly, to “And, But, Therefore,” or ABT. At a stroke, the ABT approach introduces momentum (“And”), conflict (“But”), and resolution (“Therefore”)—the fundamental building blocks of story. As Olson has shown by leading countless workshops worldwide, when scientists' eyes are opened to ABT, the effect is staggering: suddenly, they're not just talking about their work—they're telling stories about it. And audiences are captivated. Written with an uncommon verve and enthusiasm, and built on principles that are applicable to fields far beyond science, *Houston, We Have a Narrative* has the power to transform the way science is understood and appreciated, and ultimately how it's done.
