Cognitive-Behavioral Treatment of Borderline Personality Disorder Marsha M. Linehan, 1993-05-14 For the average clinician, individuals with borderline personality disorder (BPD) often represent the most challenging, seemingly insoluble cases. This volume is the authoritative presentation of dialectical behavior therapy (DBT), Marsha M. Linehan's comprehensive, integrated approach to treating individuals with BPD. DBT was the first psychotherapy shown in controlled trials to be effective with BPD. It has since been adapted and tested for a wide range of other difficult-to-treat disorders involving emotion dysregulation. While focusing on BPD, this book is essential reading for clinicians delivering DBT to any clients with complex, multiple problems. Companion volumes: The latest developments in DBT skills training, together with essential materials for teaching the full range of mindfulness, interpersonal effectiveness, emotion regulation, and distress tolerance skills, are presented in Linehan's DBT Skills Training Manual, Second Edition, and DBT Skills Training Handouts and Worksheets, Second Edition. Also available: Linehan's instructive skills training videos for clients--Crisis Survival Skills: Part One, Crisis Survival Skills: Part Two, From Suffering to Freedom, This One Moment, and Opposite Action.

Mediterranean Island Landscapes Ioannis N. Vogiatzakis, Gloria Pungetti, A.M. Mannion, 2008-02-26 Mediterranean islands exhibit many similarities in their biotic ecological, physical and environmental characteristics. There are also many differences in terms of their human colonization and current anthropogenic pressures. This book addresses in three sections these characteristics and examines the major environmental changes that the islands experienced during the Quaternary period. The first section provides details on natural and cultural factors which have shaped island landscapes. It describes the environmental and cultural changes of the Holocene and their effects on biota, as well as on the current human pressures that are now threats to the sustainability of the island communities. The second section focuses on the landscapes of the largest islands namely Sicily, Sardinia, Corsica, Cyprus, Crete, Malta and the Balearics. Each island chapter includes a special topic reflecting a particular characteristic of the island. Part three presents strategies for action towards sustainability in Mediterranean islands and concludes with a comparison between the largest islands. Despite several published books on Mediterranean ecosystems/landscapes there is no existing book dealing with Mediterranean islands in a collective manner. Students, researchers and university lecturers in environmental science, geography, biology and ecology will find this work invaluable as a cross-disciplinary text while planners and politicians will welcome the succinct summaries

as background material to planning decisions.

Systems Training for Emotional Predictability and Problem Solving for Borderline Personality Disorder Donald W. Black,Nancee Blum,2016-12-19 Borderline personality disorder (BPD) is a potentially severely debilitating psychiatric diagnosis that may affect up to 2% of the general population. Hallmarks of BPD include impulsivity, emotional instability, and poor self-image, and those with BPD have increased risk for self-harm and suicide. *Systems Training for Emotional Predictability and Problem Solving (STEPPS)* brings together research findings and information on implementation and best practices for a group treatment program for outpatients with BPD. A five-month long program easily learned and delivered by therapists from a wide range of theoretical orientations, STEPPS combines cognitive behavioral therapy, emotion management and behavioral skills training, and psychoeducation with a systems component that involves professional care providers, family, friends, and significant others of persons with BPD. The book provides a detailed description of the program, reviews the body of evidence supporting its use and implementation, and describes its dissemination worldwide and in different settings. Empirical data show that STEPPS is effective and produces clinically important improvement in mood and behavior, while reducing health care utilization. Unique among programs for BPD, STEPPS has been exhaustively studied in correctional systems (both prisons and community corrections), where it is shown to be as effective as in community settings. This volume will be a valuable guide to those in psychiatry, psychology, social work, nursing, and the counseling professions who treat people with BPD.
