A. L. Yarbus

Blue Eyes, Brown Eyes Stephen G. Bloom, 2021-10-05 The never-before-told true story of Jane Elliott and the “Blue-Eyes, Brown-Eyes Experiment” she made world-famous, using eye color to simulate racism. The day after Martin Luther King, Jr.’s assassination in 1968, Jane Elliott, a schoolteacher in rural Iowa, introduced to her all-white third-grade class a shocking experiment to demonstrate the scorching impact of racism. Elliott separated students into two groups. She instructed the brown-eyed children to heckle and berate the blue-eyed students, even to start fights with them. Without telling the children the experiment’s purpose, Elliott demonstrated how easy it was to create abhorrent racist behavior based on students’ eye color, not skin color. As a result, Elliott would go on to appear on Johnny Carson’s Tonight Show, followed by a stormy White House conference, The Oprah Winfrey Show, and thousands of media events and diversity-training sessions worldwide, during which she employed the provocative experiment to induce racism. Was the experiment benign? Or was it a cruel, self-serving exercise in sadism? Did it work? *Blue Eyes, Brown Eyes* is a meticulously researched book that details for the first time Jane Elliott’s jagged rise to stardom. It is an unflinching assessment of the incendiary experiment forever associated with Elliott, even though she was not the first to try it out. *Blue Eyes, Brown Eyes* offers an intimate portrait of the insular community where Elliott grew up and conducted the experiment on the town’s children for more than a decade. The searing story is a cautionary tale that examines power and privilege in and out of the classroom. It also documents small-town White America’s reflex reaction to the Civil Rights Movement of the 1970s and 1980s, as well as the subsequent meteoric rise of diversity training that flourishes today. All the while, *Blue Eyes, Brown Eyes* reveals the struggles that tormented a determined and righteous woman, today referred to as the “Mother of Diversity Training,” who was driven against all odds to succeed.

A Collar in My Pocket Jane Elliott, 2016-08-03 Jane Elliott is an educator who began her career in a third-grade classroom in Riceville, Iowa, and over the past fifty years has become an educator of people of all ages all over the U.S. and abroad. Elliott lives in a remodeled schoolhouse twenty-one miles from where she was born. She remains steadfast in her belief that there is only one race, THE HUMAN RACE, of which we are all members.

The Audacity of Inez Burns Stephen G. Bloom,2018-02-06 THE VIVID, SCANDAL-FILLED STORY OF A SHREWD, RAGS-TO-RICHES MILLIONAIRESS AND THE RUTHLESS POLITICIAN WHO PURSUED HER, TOLD AGAINST THE EFFERVESCENT BACKDROP OF AMERICA’S GOLDEN CITY—SAN FRANCISCO. San Francisco, until the mid-1940s, was a city that lived by its own rules, fast and loose. Formed by the gold rush and destroyed by the 1906 earthquake, it served as a pleasure palace for the legions of men who sought their fortunes in the California foothills. For the women who followed, their only choice was to support, serve, or submit. Inez Burns was different. She put everyone to shame with her dazzling, calculated, stone-cold ambition. Born in the slums of San Francisco to a cigar-rolling alcoholic, Inez transformed herself into one of California’s richest women, becoming a notorious powerbroker, grand dame, and iconoclast. A stunning beauty with perfumed charm, she rose from manicurist to murderess to millionaire, seducing one man after another, bearing children out of wedlock, and bribing politicians and cops along the way to secure her place in the San Francisco firmament. Inez ruled with incandescent flair. She owned five hundred hats and a closet full of furs, had two small toes surgically removed to fit into stylish high heels, and had two ribs excised to accentuate her hourglass figure. Her presence was defined by couture dresses from Paris, red-carpet strutting at the San Francisco Opera, and a black Pierce-Arrow that delivered her everywhere. She threw outrageous parties on her sprawling, eight-hundred-acre horse ranch, a compound with servants, cooks, horse groomers, and trainers, where politicians, judges, attorneys, Hollywood moguls, and entertainers gamboled over silver fizzes. Inez was adored by the desperate women who sought her out—and loathed by the power-hungry men who plotted to destroy her. During a time when women risked their lives with predatory practitioners lurking in back alleys, Inez and her team of women, clad in crisp, white nurse’s uniforms, worked night and day in her elegantly appointed clinic, performing fifty thousand of the safest, most hygienic abortions available during a time when even the richest wives, Hollywood stars, and mistresses had few options when they found themselves with an unwanted pregnancy. Inez’s illegal business bestowed upon her power and influence—until a determined politician by the name of Edmund G. (Pat) Brown—the father of current California Governor Jerry Brown—used Inez to catapult his nascent career to national prominence. In The Audacity of Inez Burns, Stephen G. Bloom, the author of the bestselling Postville, reveals a jagged slice of lost American history. From Inez’s riveting tale of glamour and tragedy, he has created a brilliant, compulsively readable portrait of an unforgettable woman during a moment when America’s pendulum swung from compassion to criminality by punishing those who permitted women to control their own destinies.

Eyes Wide Open Isaac Lidsky,2017-03-14 In this New York Times bestseller, Isaac Lidsky draws on his experience of achieving immense success, joy, and fulfillment while losing his sight to a blinding disease to show us that it isn’t external

circumstances, but how we perceive and respond to them, that governs our reality. Fear has a tendency to give us tunnel vision—we fill the unknown with our worst imaginings and cling to what’s familiar. But when confronted with new challenges, we need to think more broadly and adapt. When Isaac Lidsky learned that he was beginning to go blind at age thirteen, eventually losing his sight entirely by the time he was twenty-five, he initially thought that blindness would mean an end to his early success and his hopes for the future. Paradoxically, losing his sight gave him the vision to take responsibility for his reality and thrive. Lidsky graduated from Harvard College at age nineteen, served as a Supreme Court law clerk, fathered four children, and turned a failing construction subcontractor into a highly profitable business. Whether we’re blind or not, our vision is limited by our past experiences, biases, and emotions. Lidsky shows us how we can overcome paralyzing fears, avoid falling prey to our own assumptions and faulty leaps of logic, silence our inner critic, harness our strength, and live with open hearts and minds. In sharing his hard-won insights, Lidsky shows us how we too can confront life's trials with initiative, humor, and grace.

Revolutionary Rehearsals in the Neoliberal Age Colin Barker, Gareth Dale, Neil Davidson, 2021-07-01 This ambitious volume examines revolutionary situations during a non-revolutionary historical conjuncture--the neoliberal era. The last three decades have seen an increase in the number of political upheavals that challenge existing power structures, many of them taking the form of urban revolts. This book compellingly explores a series of such upheavals--in Eastern Europe, South Africa, Indonesia, Argentina, Bolivia, Venezuela, sub-Saharan Africa (including Congo, Zimbabwe, Burkina Faso) and Egypt. Each chapter studies the ways in which protest movements developed into insurgent challenges to state power, and the strategies that regimes have deployed to contain and repress revolt. In addition to empirical chapters, the book engages in theorization of revolution, dealing with questions such as the patterning of revolution in contemporary history, the relationship between class struggle and social movements, and the prospects of socialist revolution in the twenty-first century.

Redirect Timothy D. Wilson, 2011-09-08 What if there were a magic pill that could make you happier, turn you into a better parent, solve a number of your teenager's behavior problems, reduce racial prejudice, and close the achievement gap in education? There is no such pill, but story editing -- the scientifically based approach described in *Redirect* -- can accomplish all of this. The world-renowned psychologist Timothy Wilson shows us how to redirect the stories we tell about ourselves and the world around us, with subtle prompts, in ways that lead to lasting change. Fascinating, groundbreaking, and practical, *Redirect* demonstrates the remarkable power small changes can have on the ways we see ourselves and our environment, and how we can use this in our everyday lives. There are few academics who write with as much grace and wisdom as Timothy Wilson. *Redirect* is a masterpiece. -- Malcolm Gladwell

The hierarchy of caste is not about feelings or morality. It is about power—which groups have it and which do not.” In this brilliant book, Isabel Wilkerson gives us a masterful portrait of an unseen phenomenon in America as she explores, through an immersive, deeply researched, and beautifully written narrative and stories about real people, how America today and throughout its history has been shaped by a hidden caste system, a rigid hierarchy of human rankings. Beyond race, class, or other factors, there is a powerful caste system that influences people’s lives and behavior and the nation’s fate. Linking the caste systems of America, India, and Nazi Germany, Wilkerson explores eight pillars that underlie caste systems across civilizations, including divine will, bloodlines, stigma, and more. Using riveting stories about people—including Martin Luther King, Jr., baseball’s Satchel Paige, a single father and his toddler son, Wilkerson herself, and many others—she shows the ways that the insidious undertow of caste is experienced every day. She documents how the Nazis studied the racial systems in America to plan their outcasting of the Jews; she discusses why the cruel logic of caste requires that there be a bottom rung for those in the middle to measure themselves against; she writes about the surprising health costs of caste, in depression and life expectancy, and the effects of this hierarchy on our culture and politics. Finally, she points forward to ways America can move beyond the artificial and destructive separations of human divisions, toward hope in our common humanity. Original and revealing, *Caste: The Origins of Our Discontents* is an eye-opening story of people and history, and a reexamination of what lies under the surface of ordinary lives and of American life today.

Blue Eyes, Brown Eyes Stephen G. Bloom, 2021-10-05 The day after Martin Luther King, Jr.'s assassination, Jane Elliott, a third-grade schoolteacher in rural Iowa, tried out a shocking experiment to show the scorching impact of racism on children. Elliott separated her students according to the color of their eyes. Those with brown eyes would lord over those with blue eyes. The brown-eyed students were given permission to heckle and berate the blue-eyed students, even to start fights with them. The Blue-Eyed, Brown-Eyed Experiment would become world famous. Elliott would go on to appear on Johnny Carson's *Tonight Show*, followed by a stormy White House conference, and tens of thousands of media events and diversity training sessions around the world. Elliott taught 'Black Lives Matter' fifty years before the phrase was ever uttered. Yet the small town where Elliott began the incendiary experiment never forgot or forgave her. She paid a price for her hard-fought fame. But was Elliott the benign and enlightened mother of diversity she claimed to be? The damage she caused still reverberates. An indelible, confounding portrait of a woman driven to succeed, set against the backdrop of a proud and

upright farming community.--

Making Eye Health a Population Health Imperative National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on Public Health Approaches to Reduce Vision Impairment and Promote Eye Health,2017-01-15 The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. Making Eye Health a Population Health Imperative: Vision for Tomorrow proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.

The Invisible Gorilla Christopher Chabris,Daniel Simons,2010-05-18 Reading this book will make you less sure of yourself—and that's a good thing. In *The Invisible Gorilla*, Christopher Chabris and Daniel Simons, creators of one of psychology's most famous experiments, use remarkable stories and counterintuitive scientific findings to demonstrate an important truth: Our minds don't work the way we think they do. We think we see ourselves and the world as they really are,

but we're actually missing a whole lot. Chabris and Simons combine the work of other researchers with their own findings on attention, perception, memory, and reasoning to reveal how faulty intuitions often get us into trouble. In the process, they explain: • Why a company would spend billions to launch a product that its own analysts know will fail • How a police officer could run right past a brutal assault without seeing it • Why award-winning movies are full of editing mistakes • What criminals have in common with chess masters • Why measles and other childhood diseases are making a comeback • Why money managers could learn a lot from weather forecasters Again and again, we think we experience and understand the world as it is, but our thoughts are beset by everyday illusions. We write traffic laws and build criminal cases on the assumption that people will notice when something unusual happens right in front of them. We're sure we know where we were on 9/11, falsely believing that vivid memories are seared into our minds with perfect fidelity. And as a society, we spend billions on devices to train our brains because we're continually tempted by the lure of quick fixes and effortless self-improvement. *The Invisible Gorilla* reveals the myriad ways that our intuitions can deceive us, but it's much more than a catalog of human failings. Chabris and Simons explain why we succumb to these everyday illusions and what we can do to inoculate ourselves against their effects. Ultimately, the book provides a kind of x-ray vision into our own minds, making it possible to pierce the veil of illusions that clouds our thoughts and to think clearly for perhaps the first time.
