**Landslide Hazard in a Changing Environment** Davide Tiranti,Roberto Cremonini,2019-04-03 Landslides are one of the most dangerous geomorphological processes, responsible for losses of human lives and damages to structures, infrastructures, cultural and natural heritage. During the Anthropocene, impacts of human activity on the environment, including recent climate changes, have caused deep alterations to the natural evolution of surficial geologic processes, causing a progressive increase in in the occurrence of landslides. The goal of this Research Topic is to provide an updated overview of the progress in the field of landslide research, covering all the aspects related to the geological event: geomorphological characterization and understanding of triggering and predisposing factors, new technologies applied to the study of evolution of slope phenomena, new methodologies to foresee and mitigate landslide hazards.

*The Springtide of Life - Poems of Childhood - Illustrated by Arthur Rackham* Algernon Charles Swinburne,2013-04-16 The Springtide of Life - Poems of Childhood is an anthology, collected by Edmund Gosse, containing Algernon Charles Swinburne's enchanting verses for children. Swinburne (1837 - 1909) was a celebrated English poet and playwright, who was nominated for the Nobel Prize in every year from 1903 to 1907, and again in 1909. His poems are here decorated with

the delicate and romantic illustrations of Arthur Rackham. Gosse once told Rackham that 'this volume will not merely be the best book of the present art-season, but a joy to all sensitive people for years and years to come.' He was correct in his estimations, and this text continues to delight readers both young and old, almost a century after its initial publication. Arthur Rackham (1867-1939), was one of the most celebrated painters of the British Golden Age of Illustration (which encompassed the years from 1850 until the start of the First World War), Rackham's artistry is quite simply, unparalleled. Throughout his career, he developed a unique style, combining haunting humour with dream-like romance. Presented alongside the text of 'The Springtide of Life - Poems of Childhood', his illustrations further refine and elucidate Swinburne and Gosse's masterful storytelling.

Historical Materialism and the Economics of Karl Marx Benedetto Croce, 2020-09-28 Historical materialism is what is called a fashionable subject. The theory came into being fifty years ago, and for a time remained obscure and limited; but during the last six or seven years it has rapidly attained great fame and an extensive literature, which is daily increasing, has grown up around it. It is not my intention to write once again the account, already given many times, of the origin of this doctrine; nor to restate and criticise the now well-known passages in which Marx and Engels asserted the theory, nor the different views of its opponents, its supporters, its exponents, and its correctors and corruptors. My object is merely to submit to my colleagues some few remarks concerning the doctrine, taking it in the form in which it appears in a recent book by Professor Antonio Labriola, of the University of Rome. For many reasons, it does not come within my province to praise Labriola's book. But I cannot help saying as a needful explanation, that it appears to me to be the fullest and most adequate treatment of the question. The book is free from pedantry and learned tattle, whilst it shows in every line signs of the author's complete knowledge of all that has been written on the subject: a book, in short, which saves the annoyance of controversy with erroneous and exaggerated opinions, which in it appear as superseded. It has a grand opportunity in Italy, where the materialistic theory of history is known almost solely in the spurious form bestowed on it by an ingenious professor of economics, who even pretends to be its inventor.
