Patricia A. Potter, Anne G. Perry, Patricia A. Stockert, Amy Hall

Community Oriented Primary Care Institute of Medicine, Division of Health Care Services, 1983-01-01

Foundations of Community Health Nursing Marcia Stanhope, Jeanette Lancaster, 2002 This new, concise community health nursing text draws all the essential, must-know information from the popular text, *COMMUNITY AND PUBLIC HEALTH NURSING* by the same authors, into one accessible, streamlined resource. It offers the same community-oriented focus, with an emphasis on health promotion and disease prevention highlighting practical applications throughout. Separate sections are devoted to key aspects of community health nursing, including the roles a community health nurse might undertake, family and individual care, and care of vulnerable populations.

Community-Oriented Health Services Elias Mpofo, PhD, DEd, CRC, 2014-12-08 Grounded in a transdisciplinary approach, this groundbreaking text provides extensive, evidence-based information on the value of communities as the primary drivers of their own health and well-being. It describes foundational community health concepts and procedures and presents proven strategies for engaging communities as resources for their own health improvement—an important determinant of individual well-being. It is based on recommendations by the World Health Organization's International Classification of Functioning, Disability and Health and on the premise that healthy communities are those with populations that participate in their own health promotion, maintenance, and sustenance. The book is unique in its integration of environmental and social justice issues as they significantly affect the advancement of community health. The text focuses on community-oriented health interventions informed by prevention, inclusiveness, and timeliness that both promote better health and are more cost effective than individually focused interventions. It addresses the foundations of community-oriented health services including their history, social determinants, concepts, and policies as well as the economics of community-oriented health services and health disparities and equity. It covers procedures for designing, implementing, monitoring, and evaluating sustainable community health coalitions along with tools for measuring their success. Detailed case studies describe specific settings and themes in U.S. and international community health practice in which communities are both enactors and beneficiaries. An accompanying instructor's manual provides learning exercises, field-based experiential assignments, and multiple-choice questions. A valuable resource for students and practitioners of education, public policy, and social services, this book bridges the perspectives of environmental justice, public health, and community well-being and development,

which, while being mutually interdependent, have rarely been considered together. KEY FEATURES: Offers a new paradigm for improving public health through community-driven health coalitions Includes evidence-based strategies for engaging communities in the pursuit of health Demonstrates how to design, implement, monitor, and evaluate community health partnerships Presents transdisciplinary approaches that consider environmental and social justice variables Includes contributions of international authors renowned in community health research and practice

The Future of Nursing 2020-2030 National Academies of Sciences Engineering and Medicine, Committee on the Future of Nursing 2020-2030, 2021-09-30 The decade ahead will test the nation's nearly 4 million nurses in new and complex ways. Nurses live and work at the intersection of health, education, and communities. Nurses work in a wide array of settings and practice at a range of professional levels. They are often the first and most frequent line of contact with people of all backgrounds and experiences seeking care and they represent the largest of the health care professions. A nation cannot fully thrive until everyone - no matter who they are, where they live, or how much money they make - can live their healthiest possible life, and helping people live their healthiest life is and has always been the essential role of nurses. Nurses have a critical role to play in achieving the goal of health equity, but they need robust education, supportive work environments, and autonomy. Accordingly, at the request of the Robert Wood Johnson Foundation, on behalf of the National Academy of Medicine, an ad hoc committee under the auspices of the National Academies of Sciences, Engineering, and Medicine conducted a study aimed at envisioning and charting a path forward for the nursing profession to help reduce inequities in people's ability to achieve their full health potential. The ultimate goal is the achievement of health equity in the United States built on strengthened nursing capacity and expertise. By leveraging these attributes, nursing will help to create and contribute comprehensively to equitable public health and health care systems that are designed to work for everyone. *The Future of Nursing 2020-2030: Charting a Path to Achieve Health Equity* explores how nurses can work to reduce health disparities and promote equity, while keeping costs at bay, utilizing technology, and maintaining patient and family-focused care into 2030. This work builds on the foundation set out by *The Future of Nursing: Leading Change, Advancing Health* (2011) report.

Introduction to Community Based Nursing Roberta Hunt, Eileen Loy Zurek, 1997 This introduction to community based nursing roles and concepts focuses on nursing care of the individual in a community setting. The text is divided into four units that cover the knowledge base for concepts and the application of concepts. Basic concepts are presented in the first unit, with discussion of practice settings, levels of prevention, health promotion, the family and cultural considerations. Three basic skills of the community based nursing - communicating, educating and managing - are examined in the second unit. The third unit explains the application of skills and concepts to continuity of care, discharge planning, community resources and referrals and home health practice. The fourth unit prepares the reader for what's ahead, with a look into future trends in community based nursing.
