Creative Chess Opening Preparation Viacheslav Eingorn, 2006 Grandmaster Eingorn is an chess opening trendsetter.

Throughout his career, he has introduced many novel concepts in the openings, and some of the systems he has introduced have gone on to become absolute main lines, such as the Rb1 Exchange Grünfeld. Here he explains the methods by which he prepares his openings and works out new systems from scratch, and how readers can do the same. The broad topics he discusses include Experiments in the Opening, Disturbing the Equilibrium, Strategic Planning, and Opening Formations. He follows this up with a section of examples from modern practice, and theoretical articles on several of the opening lines that he has pioneered, taking us through the creative process, and the highs and lows of the practical testing and refinement of the ideas.

Deep Listening Jillian Pransky, Jessica Wolf, 2017-10-19 World-renowned restorative yoga teacher Jillian Pransky came to the practice of yoga to heal herself. For much of her life, she subscribed to a relentless work hard/play hard mentality, burying parts of herself beneath the pursuit of busy-ness and accomplishment. It wasn't until a devastating personal loss and health crisis thrust her into suffocating anxiety that she stopped racing around. As she began to pause and examine her actions and emotions, she found herself able to unlock deeply seated tension in her mind and body. Since then, Pransky has been devoted to studying and teaching mindfulness practices, deep relaxation, and compassionate listening. In *Deep Listening*, Pransky presents her signature Calm Body, Clear Mind, Open Heart program—a 10-step journey of self-exploration that she's taught around the world. Derived from the techniques that healed her, the practice of *Deep Listening* invites you to pay close attention to your body, mind, and heart. You're taught how to tune inward and relax into a state of openness, ease, and clarity. This is the new frontier in integrative wellness—mindfulness designed for healing. Pransky doesn't ask you to "be your best self," or "do more!" She asks you to "be here" and "do less." She guides you gently through the stages of *Deep Listening*, from being present and noticing your tension to welcoming what you discover with softness and compassion. She integrates tools like guided meditations, journaling prompts, and restorative yoga poses to help you regard yourself with kindness and curiosity. Immersing yourself in the practice of *Deep Listening* will allow you to nurture your own well-being.

Hexaflexagons and Other Mathematical Diversions Martin Gardner, 2020-10-05 Martin Gardner's *Mathematical Games* columns in *Scientific American* inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal-clear prose illuminated corners of mathematics, especially recreational mathematics, that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one--before Gardner--had written about mathematics like this. They continue to be a marvel. This volume, originally published in 1959, contains the first sixteen columns published in the magazine from 1956-1958. They were reviewed and briefly updated by Gardner for this 1988 edition.
