Bearers of Meaning John Onians,1990-02-04 For all those interested in the relationship between ideas and the built environment, John Onians provides a lively illustrated account of the range of meanings that Western culture has assigned to the Classical orders. Onians shows that during the 2,000 years from their first appearance in ancient Greece through their codification in Renaissance Italy, the orders--the columns and capitals known as Doric, Ionic, Corinthian, Tuscan, and Composite--were made to serve expressive purposes, engaging the viewer in a continuing visual dialogue.

Alexandria and Alexandrianism J. Paul Getty Museum,1996-09-26 One of the great seats of learning and repositories of knowledge in the ancient world, Alexandria, and the great school of thought to which it gave its name, made a vital contribution to the development of intellectual and cultural heritage in the Occidental world. This book brings together twenty papers delivered at a symposium held at the J. Paul Getty Museum on the subject of Alexandria and Alexandrianism. Subjects range from "The Library of Alexandria and Ancient Egyptian Learning" and "Alexander's Alexandria" to "Alexandria and the Origins of Baroque Architecture." With nearly two hundred illustrations, this handsome volume presents some of the world's leading scholars on the continuing influence and fascination of this great city. The Palazzo Vecchio, 1298-1532 Nicolai Rubinstein, 1995 * The author is the world's leading expert on Florentine politics in the Renaissance period Nicolai Rubinstein's unique command of the complexities of Florentine political history has resulted in this extremely impressive study of the Palazzo Vecchio and the way in which it functioned as a seat of the Florentine republican government from the late thirteenth century to 1530. He traces the history of the construction and successive changes to the building in the republican period, documents where the various committees and officers of the government were housed, and relates the consecutive campaigns of decoration of the interior very closely and subtly to changes in the political temperature of the city. Rubinstein's extraordinarily scrupulous approach to the evidence, together with the exhaustive archival research he has carried out, have produced an important study, which arrives at a number of new and important conclusions to particular problems of concern to art historians as well as political historians.

Modern Architecture in Africa Antoni S. Folkers, Belinda A. C. van Buiten, 2019-07-22 This book offers unique insights into modern African architecture, influenced by modern European architecture, and at the same time a natural successor to existing site-specific and traditional architecture. It brings together the worlds of traditional site-specific architecture with the Modernist Project in Africa, which to date have only been considered in isolation. The book covers the four architectural disciplines: urban planning, building technology, building physics, and conservation. It includes an introduction with a historical outline and an analysis and comparison of a number of projects in various countries in Africa. On the basis of examples drawn from practice, the author documents and describes the hybrid architectural forms that have emerged from the confrontation and fusion with (pre)modern Western architecture and urban planning, and in so doing he also narrates the history of African architecture.

Pazzi Chapel (c1441-1460) and his remarkable dome of S Maria del Fiore (c.1420-1436). It also includes his military projects and his work as a goldsmith and sculptor.
