**Customs Modernization Handbook** Luc De Wulf, Jose B. Sokol, 2005-01-03 Trade integration contributes substantially to economic development and poverty alleviation. In recent years much progress was made to liberalize the trade regime, but customs procedures are often still complex, costly and non-transparent. This situation leads to misallocation of resources. 'Customs Modernization Handbook' provides an overview of the key elements of a successful customs modernization strategy and draws lessons from a number of successful customs reforms as well as from customs reform projects that have been undertaken by the World Bank. It describes a number of key import procedures, that have proved particularly troublesome for customs administrations and traders, and provides practical guidelines to enhance their efficiency. The Handbook also reviews the appropriate legal framework for customs operations as well as strategies to combat corruption.

**Trade and Transport Facilitation** John Raven, 2001-01-01 The report focuses on transport facilitation in developing countries in order to help promote trade in exports and economic growth. Each country has its own set of special characteristics, including significant border entry and import points. This report provides an analytical tool for those working in the field, complemented by practical suggestions, in order to identify facilitation problems and create effective remedial action plans. This report is an expanded version of the publication 'Trade and Transport Facilitation: An Audit Methodology' (ISBN: 0821347195), published by the World Bank in 2000.

**The Order of Things** Michel Foucault, 2002 Possibly one of the most significant, yet most overlooked, works of the twentieth century, it was *The Order of Things* that established Foucault's reputation as an intellectual giant.

*Making Global Value Chains Work for Development* Daria Taglioni, Deborah Winkler, 2016-06-10 Economic, technological, and political shifts as well as changing business strategies have driven firms to unbundle production processes and disperse them across countries. Thanks to these changes, developing countries can now increase their participation in global value chains (GVCs) and thus become more competitive in agriculture, manufacturing and services. This is a paradigm shift from the 20th century when countries had to build the entire supply chain domestically to become competitive internationally. For policymakers, the focus is on boosting domestic value added and improving access to resources and technology while advancing development goals. However, participating in global value chains does not automatically improve living standards and social conditions in a country. This requires not only improving the quality and quantity of production factors and

redressing market failures, but also engineering equitable distributions of opportunities and outcomes - including employment, wages, work conditions, economic rights, gender equality, economic security, and protecting the environment. The internationalization of production processes helps with very few of these development challenges. Following this perspective, *Making Global Value Chains Work for Development* offers a strategic framework, analytical tools, and policy options to address this challenge. The book conceptualizes GVCs and makes it easier for policymakers and practitioners to discuss them and their implications for development. It shows why GVCs require fresh thinking; it serves as a repository of analytical tools; and it proposes a strategic framework to guide policymakers in identifying the key objectives of GVC participation and in selecting suitable economic strategies to achieve them.

**Orientalism** Edward W Said, 2016-10-25 'A stimulating, elegant yet pugnacious essay'—Observer In this highly acclaimed seminal work, Edward Said surveys the history and nature of Western attitudes towards the East, considering Orientalism as a powerful European ideological creation—a way for writers, philosophers and colonial administrators to deal with the 'otherness' of Eastern culture, customs and beliefs. He traces this view through the writings of Homer, Nerval and Flaubert, Disraeli and Kipling, whose imaginative depictions have greatly contributed to the West's romantic and exotic picture of the Orient. In the Afterword, Said examines the effect of continuing Western imperialism.

Hitchcock Francois Truffaut, 2015-12-04 Iconic, groundbreaking interviews of Alfred Hitchcock by film critic François Truffaut—providing insight into the cinematic method, the history of film, and one of the greatest directors of all time. In *Hitchcock*, film critic François Truffaut presents fifty hours of interviews with Alfred Hitchcock about the whole of his vast directorial career, from his silent movies in Great Britain to his color films in Hollywood. The result is a portrait of one of the greatest directors the world has ever known, an all-round specialist who masterminded everything, from the screenplay and the photography to the editing and the soundtrack. Hitchcock discusses the inspiration behind his films and the art of creating fear and suspense, as well as giving strikingly honest assessments of his achievements and failures, his doubts and hopes. This peek into the brain of one of cinema's greats is a must-read for all film aficionados.

**Journal of a Residence in Chile During the Year 1822** Lady Maria Callcott, 2003 In 1821, Maria Dundas Graham sailed for South America. After her husband, the ship's captain, died en route, the newly widowed Maria Graham resisted all efforts to hustle her back to England. She rented a cottage in Valparaiso and spent nine months travelling in Chile. This is her journal.

**Pigmentocracies** Edward Telles,2014-10-22 Pigmentocracies--the fruit of the multiyear Project on Ethnicity and Race in Latin America (PERLA)--is a richly revealing analysis of contemporary attitudes toward ethnicity and race in Brazil, Colombia, Mexico, and Peru, four of Latin America's most populous nations. Based on extensive, original sociological and anthropological data generated by PERLA, this landmark study analyzes ethnoracial classification, inequality, and discrimination, as well as public opinion about Afro-descended and indigenous social movements and policies that foster greater social inclusiveness, all set within an ethnoracial history of each country. A once-in-a-generation examination of contemporary ethnicity, this book promises to contribute in significant ways to policymaking and public opinion in Latin America. Edward Telles, PERLA's principal investigator, explains that profound historical and political forces, including multiculturalism, have helped to shape the formation of ethnic identities and the nature of social relations within and across nations. One of Pigmentocracies's many important conclusions is that unequal social and economic status is at least as much a function of skin color as of ethnoracial identification. Investigators also found high rates of discrimination by color and ethnicity widely reported by both targets and witnesses. Still, substantial support across countries was found for multicultural-affirmative policies--a notable result given that in much of modern Latin America race and ethnicity have been downplayed or ignored as key factors despite their importance for earlier nation-building.
