The State of Play Daniel Goldberg, 2015-10-20 FEATURING: IAN BOGOST - LEIGH ALEXANDER - ZOE QUINN - ANITA

SARKEESIAN & KATHERINE CROSS - IAN SHANAHAN - ANNA ANTHROPY - EVAN NARCISSE - HUSSEIN IBRAHIM - CARA ELLISON & BRENDAN KEOGH - DAN GOLDING - DAVID JOHNSTON - WILLIAM KNOBLAUCH - MERRITT KOPAS - OLA WIKANDER

The State of Play is a call to consider the high stakes of video game culture and how our digital and real lives collide. Here, video games are not hobbies or pure recreation; they are vehicles for art, sex, and race and class politics. The sixteen contributors are entrenched—they are the video game creators themselves, media critics, and Internet celebrities. They share one thing: they are all players at heart, handpicked to form a superstar roster by Daniel Goldberg and Linus Larsson, the authors of the bestselling *Minecraft: The Unlikely Tale of Markus Notch Persson and the Game that Changed Everything*. The State of Play is essential reading for anyone interested in what may well be the defining form of cultural expression of our time. If you want to explain to anyone why videogames are worth caring about, this is a single volume primer on where we are, how we got here and where we're going next. In every way, this is the state of play. —Kieron Gillen, author of *The Wicked + the Divine*, co-founder of Rock Paper Shotgun

On the Shores of Politics Jacques Ranciere, 2021-08-17 It is frequently said that we are living through the end of politics, the end of social upheavals, the end of utopian folly. Consensual realism is the order of the day. But political realists, remarks Jacques Ranciere, are always several steps behind reality, and the only thing which may come to an end with their dominance is democracy. 'We could', he suggests, 'merely smile at the duplicity of the conclusion/suppression of politics which is simultaneously a suppression/conclusion of philosophy.' This is precisely the task which Ranciere undertakes in these subtle and perceptive essays. He argues persuasively that since Plato and Aristotle politics has always constructed itself as the art of ending politics, that realism is itself utopian, and that what has succeeded the polemical forms of class struggle is not the wisdom of a new millennium but the return of old fears, criminality and chaos. Whether he is discussing the confrontation between Mitterrand and Chirac, French working-class discourse after the 1830 revolution, or the ideology of recent student mobilizations, his aim is to restore philosophy to politics and give politics back its original and necessary meaning: the organization of dissent.

Democratizing Democracy Boaventura de Sousa Santos, 2020-05-05 The major conflicts between the Global North and the South can be expected to result from the confrontation of alternative conceptions of democracy, mainly between liberal or representative democracy and participatory democracy. The hegemonic model of democracy, while prevailing on a global scale, guarantees no more than low-intensity democracy. In recent times, participatory democracy has exhibited a new dynamic, engaging mainly subaltern communities and social groups that fight against social exclusion and the suppression of citizenship. In this collection of reports from the Global South—India, South Africa, Mozambique, Colombia, and Brazil—De Sousa Santos and his colleagues show how, in some cases, the deepening of democracy results from the development of dual forms of participatory and representative democracy, and points to the emergence of transnational networks of participatory

democracy initiatives. Such networks pave one of the ways to the reinvention of social emancipation. This is volume 1 of the Reinventing Social Emancipation project, edited by Boaventura de Sousa Santos.

Atlas d'anatomie humaine et de chirurgie Jean Marc Bourgery, Nicolas Henri Jacob, 2012 Anatomically correct: Bourgery's monumental and unsurpassed treatise We owe a great debt to Jean Baptiste Marc Bourgery (1797-1849) for his Atlas of Anatomy, which was not only a massive event in medical history, but also remains one of the most comprehensive and beautifully illustrated anatomical treatises ever published in any language. In 1830, having received his doctorate in medicine three years prior, Bourgery began work on his magnificent atlas in cooperation with illustrator Nicolas Henri Jacob (1782-1871), a student of the French painter Jacques Louis David. The first volumes were published the following year, but completion of the treatise required nearly two decades of dedication; Bourgery lived just long enough to finish his labor of love, but the last of the treatise's eight volumes was not published in its entirety until five years after his death. The four parts of Bourgery's treatise cover descriptive anatomy, surgical anatomy and techniques (exploring in detail nearly all the major operations that were performed during the first half of the 19th century), general anatomy and embryology, and microscopic anatomy. Jacob's spectacular hand-colored, life-size lithographs are remarkable for their clarity, color, and aesthetic appeal, reflecting a combination of direct laboratory observation and illustrative research; the images are to this day unsurpassed in anatomical illustration. Intelligent Cities Nicos Komninos, 2013-05-13 At the turn of the century some cities and regions in Europe, Japan and the USA, displayed an exceptional capacity to incubate and develop new knowledge and innovations. The favourable environment for research, technology and innovation created in these areas was not immediately obvious, yet it was of great significance for a development based on knowledge, learning, and innovation. Intelligent Cities focuses on these environments of innovation, and the major models (technopoles, innovating regions, intelligent cities) for creating an environment-supporting technology, innovation, learning, and knowledge-based development. The introduction and the first chapter deal with innovation as an environmental condition, and with the geography and typology of islands of innovation. The next three parts focus on the theoretical paradigms and the planning models of the 'industrial district', the innovating region', and the 'intelligent city', which offer three alternative ways to create an environment of innovation.
