Psycholinguistic and Cognitive Inquiries into Translation and Interpreting Aline Ferreira,John W.

Schwieter,2015-01-15 Psycholinguistic and Cognitive Inquiries into Translation and Interpreting presents perspectives and original studies that aim to diversify traditional approaches in translation and interpreting research and improve the quality and generalizability of the field. The volume is divided into two parts: Part I includes an introductory discussion on the input of psycholinguistics and cognitive science to translation and interpreting along with two state-of-the-art chapters that discuss valid experimental designs while critically reviewing and building on existing work. Part II subsequently presents original studies which explore the performance of expert and novice translators using a variety of methodologies such as eye tracking, keystroke logging, retrospective protocols, and post-editing machine translation. It also presents contributions for exploratory studies on interpreting and for testing several constructs such as language competence and the role of expertise, redundancy, and working memory capacity. This volume is intended to act as a valuable reference for scholars, practitioners, translators, graduate and advanced undergraduate students, and anyone wishing to gain an overview of current issues in translation and interpreting from psycholinguistic and cognitive domains.

The Role of Pedagogical Translation in Second Language Acquisition Vanessa Leonardi, 2010 Translation can help improve foreign language teaching and learning - this study shows how. In an increasingly globalised world and in an increasingly multilingual Europe, translation plays an important role. Significant signs of a new revival of translation in language teaching have become visible, as shown by recent literature on applied linguistics. This book contributes to this movement, embracing both a theoretical and an empirical purpose by integrating viewpoints from Applied Linguistics, Translation Studies and Second Language Acquisition. In an attempt to show how the use of translation in foreign language classes can help enhance and further improve reading, writing, speaking and listening skills, this work calls for a re-evaluation and a rehabilitation of the translation activities in the foreign language classes.

Audiovisual translation in the foreign language classroom: applications in the teaching of English and other foreign languages Jennifer Lertola, 2019-02-28 The aim of this book is to systematically review studies on the applications of captioning (subtitling) and revoicing (dubbing, audio description, and voice-over) in the foreign language classroom, in order to offer an overview of the state of the art and encourage further research. The literature review presents research on the topic, paying particular attention to relevant experimental studies (i.e. empirical research that involves data collection, and

not just a mere description of the experience or the learners' outcomes), examined in terms of research focus, target languages, participants, learning settings, audiovisual materials, captioning/revoicing software, and type of analysis (i.e. qualitative and/or quantitative).

Pragmatics Stephen C. Levinson, 2018-05-28 Those aspects of language use that are crucial to an understanding of language as a system, and especially to an understanding of meaning, are the acknowledged concern of linguistic pragmatics. This textbook provides a lucid and integrative analysis of the central topics in pragmatics - deixis, implicature, presupposition, speech acts, and conversational structure. A central concern of the book is the relation between pragmatics and semantics, and Dr Levinson shows clearly how a pragmatic approach can resolve some of the problems semantics have been confronting and simplifying semantic analyses. The exposition is always clear and supported by helpful exemplification. The detailed analyses of selected topics give the student a clear view of the empirical rigour demanded by the study of linguistic pragmatics, but Dr Levinson never loses sight of the rich diversity of the subject. An introduction and conclusion relate pragmatics to other fields in linguistics and other disciplines concerned with language usage - psychology, philosophy, anthropology and literature.

Linguistics and the Teacher Ronald Carter, 2012 *Linguistics and the Teacher* is a collection of essays by linguists on different aspects of the relationship between linguistics and education. All the contributors are united in their belief that linguistics should be a central element in the education of teachers, and argue for principled and systematic analysis in the study of the role of language in learning. The essays range from theoretical accounts of the nature of language study in teacher education to practical examples of how linguistics can help the teacher in such diverse contexts as the assessment of difficulty in textbooks, the teaching of literature, and analysing children's writing. The book offers models for analysis, specific syllabus and course proposals, and, in a key essay, discussion of those areas relevant to language and learning upon which most linguists would agree. The collection as a whole presents teachers with all the materials they need to make informed judgements about what has hitherto been regarded as a difficult area.

Knowing and Learning Mathematics for Teaching National Research Council, Mathematical Sciences Education Board, Center for Education, Mathematics Teacher Preparation Content Workshop Program Steering Committee, 2001-02-25 There are many questions about the mathematical preparation teachers need. Recent recommendations from a variety of sources state that reforming teacher preparation in postsecondary institutions is central in providing quality mathematics education to all students. The Mathematics Teacher Preparation Content Workshop examined this problem by considering two central questions: What is the mathematical knowledge teachers need to know in order to teach well? How can teachers

develop the mathematical knowledge they need to teach well? The Workshop activities focused on using actual acts of teaching such as examining student work, designing tasks, or posing questions, as a medium for teacher learning. The Workshop proceedings, *Knowing and Learning Mathematics for Teaching*, is a collection of the papers presented, the activities, and plenary sessions that took place.

Intercultural Business Communication and Simulation and Gaming Methodology Victoria Guillén-Nieto, 2009 This book received the Enrique Alcaraz research award in 2010. This volume derives from the COMINTER-SIMULNEG research project which aims at designing a pragmatic model for the analysis of intercultural communication between Spaniards and Britons, as well as developing a teaching methodology for cultural awareness based on computer simulation of real business settings. Contributions to this volume focus on three main issues: (a) explaining intercultural communication; (b) research on intercultural business communication; (c) the use of simulation and gaming methodology for the acquisition of communicative and cross-cultural competence in business settings. This book adopts an interdisciplinary approach to the study and practice of intercultural business communication, borrowing concepts from social anthropology, social cognition, cognitive linguistics, and intercultural pragmatics.

Phase Theory Ángel J. Gallego, 2010 This book provides a detailed and up to date review of the framework of phases (Chomsky 2000 and subsequent work). It explores the interaction between the narrow syntactic computation and the external systems from a minimalist perspective. As has sometimes been noted, Phase Theory is the current way to study the cyclic nature of the system, and 'phases' are therefore the natural locality hallmark, being directly relevant for phenomena such as binding, agreement, movement, islands, reconstruction, or stress assignment. This work discusses the different approaches to phases that have been proposed in the recent literature, arguing in favor of the thesis that the points of cyclic transfer are to be related to uninterpretable morphology (the ϕ -features on the heads C and v*). This take on phases is adopted in order to investigate raising structures, binding, subjunctive dependents, and object shift (word order) in Romance languages, as well as the nature of islands.
