Mao's Road to Power: Revolutionary Writings, 1912-49: v. 1: Pre-Marxist Period, 1912-20 Zedong Mao, Stuart Schram, 2015-06-03 Revolution in its Leninist guise has been a dominant force in the world for most of the 20th century, and the Chinese revolution has been, with the Russian revolution, one of its two most important manifestations. Mao Zedong, the architect of victory in China in 1949, stands out as one of the dominant figures of the century. Guerilla leader, strategist, conqueror, ruler, poet and philosopher, he placed his imprint on China, and on the world. Even though today communism is widely seen as bankrupt, Mao Zedong's achievements as an innovative disciple of Lenin and Stalin in the most populous nation on earth guarantees his place in history. Whatever the ultimate fate of communism in China, the fact of Mao's influence on events during more than five decades, and its resonance after his death, will remain. This edition of Mao Zedong's writings provides abundant documentation in his own words regarding his life and thought. It has been compiled from all available Chinese sources, including not only the 20-volume edition published in Tokyo years ago, but many new materials issued in China since 1978, both openly and for internal circulation. The editors have pursued a threefold goal: firstly, to translate every text by Mao which could be obtained, so as to make this English version as complete as possible; secondly, to annotate the materials in sufficient detail to make them accessible to the non-specialist reader; and thirdly, to combine accuracy with a level of literary quality which is intended to make the volumes agreeable as well as instructive to read. Volume 1 includes translations of the entire contents of the authoritative Mao Zedong Zaoqi Wengao 1912.6-1920.11 (Draft writings from Mao Zedong's early period, June 1912-November 1920), published in Beijing in 1990, plus some 15 additional texts for the same period which have been attributed to Mao. Among the items thus made available in English are his first surviving work, a middle school essay of 1912 in praise of Shang Yang; his very extensive Classroom Notes of late 1913 on the lectures of his most influential teachers, Yang Changji and Yuan the Big Beard; a dozen letters to his then close friend Xiao Zisheng (Siao-yu), who described a shared odyssey in Mao-Tse-tung and I were Beggars; his marginal annotations of 1918 to the German philosopher Friedrich Paulsen's work on ethics, in which Mao proclaimed himself a believer in individualism and an admirer of Nietzsche; and many important letters, articles, and other writings documenting his evolution from liberalism to anarchism and finally to Marxism in 1919-1920.

Mao Zedong and China in the Twentieth-Century World Rebecca E. Karl, 2010-08-13 Throughout this lively and concise

historical account of Mao Zedong's life and thought, Rebecca E. Karl places the revolutionary leader's personal experiences, social visions and theory, military strategies, and developmental and foreign policies in a dynamic narrative of the Chinese revolution. She situates Mao and the revolution in a global setting informed by imperialism, decolonization, and third worldism, and discusses worldwide trends in politics, the economy, military power, and territorial sovereignty. Karl begins with Mao's early life in a small village in Hunan province, documenting his relationships with his parents, passion for education, and political awakening during the fall of the Qing dynasty in late 1911. She traces his transition from liberal to Communist over the course of the next decade, his early critiques of the subjugation of women, and the gathering force of the May 4th movement for reform and radical change. Describing Mao's rise to power, she delves into the dynamics of Communist organizing in an overwhelmingly agrarian society, and Mao's confrontations with Chiang Kaishek and other nationalist conservatives. She also considers his marriages and romantic liaisons and their relation to Mao as the revolutionary founder of Communism in China. After analyzing Mao's stormy tenure as chairman of the People's Republic of China, Karl concludes by examining his legacy in China from his death in 1976 through the Beijing Olympics in 2008.

Leadership James MacGregor Burns, 2012-04-10 A Pulitzer Prize-winning historian examines transformational leaders from Moses to Machiavelli to Martin Luther King Jr. in this "impressive book" (The Washington Post). Historian and political scientist James MacGregor Burns has spent much of his career documenting the use and misuse of power by leaders throughout history. In this groundbreaking study, Burns examines the qualities that make certain leaders—in America and elsewhere—succeed as transformative figures. Through insightful anecdotes and historical analysis, Burns scrutinizes the charisma, vision, and persuasive power of individuals able to imbue followers with a common sense of purpose, from the founding fathers to FDR, Gandhi to Napoleon. Since its original publication in 1970, *Leadership* has set the standard for scholarship in the field.

The Rhetoric of Mao Zedong Xing Lu, 2017-05-24 This thorough examination of Mao's speeches and writings and how they reshaped a nation "is critical to an understanding of modern China" (Choice). Mao Zedong fundamentally transformed China from a Confucian society characterized by hierarchy and harmony into a socialist state guided by communist ideologies of class struggle and radicalization. It was a transformation made possible largely by Mao's rhetorical ability to attract, persuade, and mobilize millions of Chinese people. In this book, Xing Lu analyzes Mao's speeches and writings over a span of sixty years, tracing the sources and evolution of his discourse, analyzing his skills as an orator and mythmaker, assessing his symbolic power and continuing presence in contemporary China, and observing that Mao's rhetorical legacy has been commoditized, culturally consumed, and politically appropriated since his death. Applying both Western rhetorical theories and Chinese rhetorical concepts to reach a more nuanced and sophisticated understanding of his rhetorical legacy, Lu shows how Mao employed a host of rhetorical appeals and strategies drawn from Chinese tradition and how he interpreted the

discourse of Marxism-Leninism to serve foundational themes of his message. She traces the historical contexts in which these themes, his philosophical orientations, and his political views were formed and how they transformed China and Chinese people. Lu also examines how certain ideas are promoted, modified, and appropriated in Mao's rhetoric. His appropriation of Marxist theory of class struggle, his campaigns of transforming common people into new communist advocates, his promotion of Chinese nationalism, and his stand on China's foreign policy all contributed to and were responsible for reshaping Chinese thought patterns, culture, and communication behaviors.

Illness and Image Sander L. Gilman, 2018-01-16 The humanities in higher education are too often labeled as impractical and are not usually valued in today's marketplace. Yet in professional fields, such as the health sciences, interest in what the humanities can offer has increased. Advocates claim the humanities offer health care professionals greater insight into how to work with those who need their help. *Illness and Image* introduces undergraduates and professionals to the medical humanities, using a series of case studies, beginning with debates about male circumcision from the ancient world to the present, to the meanings of authenticity in the face transplantation arena. The case studies address the interpretation of mental illness as a disability and the new category of mental illness, self-harm. Sander L. Gilman shows how medicine projects such categories' existence into the historical past to show that they are not bound in time and space and, therefore, are real. *Illness and Image* provides students and researchers with models and possible questions regarding categories often assumed to be either trans-historical or objective, making it useful as a textbook.

Stand Up Straight! Sander L. Gilman, 2018-02-15 Our bodies are not fixed. They expand and contract with variations in diet, exercise, and illness. They also alter as we age, changing over time to be markedly different at the end of our lives from what they were at birth. In a similar way, our attitudes to bodies, and especially posture—how people hold themselves, how they move—are fluid. We interpret stance and gait as healthy or ill, able or disabled, elegant or slovenly, beautiful or ugly. In *Stand Up Straight!*, Sander L. Gilman probes these shifting concepts of posture to explore how society's response to our bodies' appearance can illuminate how society views who we are and what we are able to do. The first comprehensive history of the upright body at rest and in movement, *Stand Up Straight!* stretches from Neanderthals to modern humans to show how we have used our understanding of posture to define who we are—and who we are not. Gilman traverses theology and anthropology, medicine and politics, discarded ideas of race and the most modern ideas of disability, theories of dance and

concepts of national identity in his quest to set straight the meaning of bearing. Fully illustrated with an array of striking images from medical, historical, and cultural sources, *Stand Up Straight!* interweaves our developing knowledge of anatomy and a cultural history of posture to provide a highly original account of our changing attitudes toward stiff spines, square shoulders, and flat tummies through time.

Performance Art in China Thomas J. Berghuis, 2006 Performance Art in China takes as its subject one of the most dynamic and controversial areas of experimental art practice in China. In his comprehensive study, Sydney-based theorist and art historian Thomas J. Berghuis introduces and investigates the idea of the mediated subject of the acting body in art, a notion grounded in the realization that the body is always present in art practice, as well as its subsequent, secondary representations. Through a series of in-depth case studies, Berghuis reveals how, during the past 25 years,

Chinese performance artists have acted out their art, often in opposition to the principles governing correct behavior in the public domain. In addition to a 25-year chronology of events, a systematic index of places, names and key terms, as well as a bibliography and a glossary in English and Chinese, this study also offers the reader numerous previously unpublished photos and documents.

Asian Fighting Arts Donn F. Draeger, Robert W. Smith, 1969 Fighting arts are as old as man himself and as varied as his languages. In Asia they developed to a degree of effectiveness probably unsurpassed elsewhere in the world. This book explains the relationships between fighting arts, assesses their strengths and weaknesses, and presents new material about hitherto unknown fighting methods. Written by two of the best-known and most widely published authorities in the field, it covers fighting methods and techniques found in eleven Asian countries-fighting techniques that range from the artful Chinese tai-chi and Burmese bando to Japanese jujutsu and the lethal pentjak-silat of Indonesia. Documentation of these has been supplemented with a wealth of fascinating anecdotes. The reader learns of the daring exploits of the Japanese ninja, of Gama, perhaps the greatest of the great Indian wrestlers, of the Indonesian trance fighters-and hundreds of other tales that serve to illustrate some of the most deadly fighting systems that the world has known. The volume is illustrated with over two hundred photographs and drawings, many of them depicting combat styles and techniques that have never been seen in the West.
