Landscape Architectural Graphic Standards Leonard J. Hopper, 2007-09-28 The new student edition of the definitive reference on landscape architecture Landscape Architectural Graphic Standards, Student Edition is a condensed treatment of the authoritative Landscape Architectural Graphic Standards, Professional Edition. Designed to give students the critical information they require, this is an essential reference for anyone studying landscape architecture and design. Formatted to meet the serious student's needs, the content in this Student Edition reflects topics covered in accredited landscape architectural programs, making it an excellent choice for a required text in landscape architecture, landscape design, horticulture, architecture, and planning and urban design programs. Students will gain an understanding of all the critical material they need for the core classes required by all curriculums, including: * Construction documentation * Site planning * Professional practice * Site grading and earthwork * Construction principles * Water supply and management * Pavement and structures in the landscape * Parks and recreational spaces * Soils, asphalt, concrete, masonry, metals, wood, and recreational surfaces * Evaluating the environmental and human health impacts of materials Like Landscape Architectural Graphic Standards, this Student Edition provides essential specification and detailing information on the fundamentals of landscape architecture, including sustainable design principles, planting (including green roofs), stormwater management, and wetlands construction and evaluation. In addition, expert advice guides readers through important considerations such as material life cycle analysis, environmental impacts, site security, hazard control, environmental restoration and remediation, and accessibility. Visualising Physical Geography: The How and Why of Using Diagrams to Teach Geography 11-16 Luke Tayler,2023-09-29

This practical guide breaks down the complex and broad field of physical geography, demonstrating how diagrams can be used by teachers to effectively explain the key concepts behind many natural processes and landforms. Featuring over 200 diagrams that cover the key topics taught in Key Stage 3 and 4 Geography, the book shows teachers how they can convey age-appropriate concepts without overwhelming or oversimplifying. Supported by summaries of background knowledge, common misconceptions, questions to check understanding, and extension activities, the concepts and topics explored include: Rocks and weathering Plate tectonics Rivers Coasts Weather and climate Ecosystems Glaciation Backed by research and evidence to support the use of diagrams in the classroom, this is an essential read for any geography teacher or subject lead who wants to support their students in learning key concepts in physical geography.

Solar System Thomas Hockey, Jennifer Lynn Bartlett, Daniel C. Boice, 2021-08-20 Combining the latest astronomical results with a historical perspective, *Solar System: Between Fire and Ice* takes you on a fabulous tour of our intriguing Solar System. Not content with a conventional discourse restricted to the major and minor bodies, astronomers Hockey, Bartlett, and Boice venture beyond the limits of our system to look at exoplanets and to consider future trends in space exploration and tourism. They discuss not only what scientists know about planets, asteroids, and comets but how the discoveries were made. With extensive teaching experience, their accessible prose clearly explains essential physical concepts. Lavishly illustrated as well as carefully researched, *Solar System: Between Fire and Ice* delights the eyes as well as feeding the mind. Detailed appendices provide additional technical data and resources for your own on-line voyage of discovery. Whether you are an educated layperson, student, teacher, amateur astronomer, or merely curious, you will come away having learned the most up-to-date knowledge and enjoyed the process. The authors bring a unique perspective to this subject, combining their years of experience in research, teaching, and history of planetary science. Prof. Thomas Hockey is a professor of astronomy, specializing in planetary science and the history of science. Dr. Jennifer Bartlett is an astronomer with a forte in dynamical motions of asteroids with liberal arts teaching experience. Dr. Daniel Boice is an active research astronomer in planetary science, especially comets, with considerable teaching experience. In the 1980s and 90s the Viking and Voyager missions provided droves of exciting information, generating a new level of public interest. Textbooks were rewritten and scientists worked to understand the data during mission poor period that followed. In recent times, however, we have entered a new era. There has been a multinational effort to expand our knowledge of the Solar System. Data from these missions has been freely shared and has again raised the level of public interest. Within this era of renewed interest, it is appropriate, as is done in this book, to provide the public with an effort to present an integrated view of our Solar System and questions that the discovery of extrasolar planets have raised with regard to the Solar System as a whole. Professor Reta Beebe, recipient of

NASA's Exceptional Public Service Medal I understand this book to be aimed at a general audience, but I can also see its use as a text in astronomy classes, especially in a community school or situations where students typically resist reading the textbook. The writing is light and entertaining, and will engage students, yet it thoroughly covers all the basic concepts of a typical Astro 101 class. - Dr. Katy Garmany, winner of the American Astronomical Society's Annie J. Cannon Award.

Earthtrek Geography □ 5 Rita Fernandez, Earthtrek, a NEW series in Geography for classes 3-8, based on the latest ICSE syllabus, aims at introducing and developing concepts of Geography in a captivating style. The books attempt to create curiosity and interest in the mind of the learners through interesting activities and map work.

Painless Earth Science Edward J. Denecke, 2021-06 Presents a guide to the fundamentals of Earth science, including the studies of geology, earthquakes, volcanoes, and climate, and provides quizzes with full explanations of each answer.
