Advocating for English Learners Diane Staehr Fenner,2013-09-11 Embrace the future by ensuring English Learners have a voice in school. English Learners (ELs) are the fastest-growing segment of the K-12 population. But ELs and their families—who are in the process of learning English and navigating an often-unfamiliar education system—may not have a powerful enough voice to articulate their needs. Consequently, all teachers and administrators must advocate for this all-important diverse group of students who will become tomorrow's workforce. This book demystifies the techniques of advocacy for ELs, including: A shared sense of responsibility for EL success—Providing tools that every educator can use to ensure that ELs are effectively served. An overview for administrators—Influencing policy and fostering a culture that meets EL needs Advocacy for ELs' success beyond Grade 12—Equipping ELs for life after graduation, from higher education to career decisions ELs will continue to grow in number, and leaving them and their families voiceless is simply not an option. No educator can miss this essential book. In many ways, the history of American Education is the history of a quest for equality. Dr. Staehr Fenner lends a human face to the experience of English Learners and encourages us to think in terms of what attributes ELs bring to their learning experience and how others can benefit from their presence in the classroom. This book is a promising, uplifting, and much-needed call for action! — Rosa Aronson, Executive Director TESOL International Association, Alexandria, VA On-line book study-available now! Author Staehr Fenner's company, SupportEd, has created an on-demand LMS book study for readers of *Advocating for English Learners A Guide for Educators*. The self-paced book study works around your schedule and when you're done, you'll earn a certificate for 20 hours of PD. **Literacy and Reading Programmes for Children and Young People: Case Studies from Around the Globe** Patrick Lo, Stephanie H. S. Wu, Andrew J. Stark, Bradley Allard, 2022-01-26 *Literacy and Reading Programmes for Children and Young People: Case Studies from Around the Globe* presents interviews with over 40 librarians from around the world who tell of their library programs. The volumes are arranged geographically with Volume 1 offering interviews from library professionals from the USA and Europe, and with Volume 2 sharing programs from Asia, Africa, Australia, and the Middle East. The volumes highlight the diversity of the types of programs catering to the varying needs of children and young adults throughout the world. Case studies featured in this book outline the details of programs, events, and activities provided by over 40 organizations in the context of social capital and social inclusion. Each interview chapter discusses the contributions made to literacy development and community building of children and teens. With the many variations and examples of best practice, librarians and educators can glean new ideas for their own programs. The interviews reveal the challenges and issues faced and the work being achieved in vastly different environments, in many geographic areas, and in diverse economic, social, and cultural contexts. The programs include those of national and state libraries, public libraries, and mobile libraries carried out by public libraries, NGOs, and commercial organizations in both developed and developing countries. They also feature programs of multicultural libraries, libraries for indigenous people, and libraries for refugees. This publication complements the range of initiatives and activities carried out by IFLA's Libraries for Children and Young Adults Section that supports library services and reading promotion initiatives catering to children and young adults around the world. These volumes are rich in variety and will provide much food for thought for creating unique and successful library programs.

Little, 2021-09-03 *Content-Based Curriculum for High-Ability Learners* (3rd ed.) provides a solid introduction to core elements of curriculum development in gifted education and implications for school-based implementation. These emphases form threads across chapters in core content areas, including language arts, mathematics, science, social studies, world languages, and the arts. Trilingualism in Education in China: Models and Challenges Anwei Feng,Bob Adamson,2014-09-26 This book examines language policies and practices in schools in regions of China populated by indigenous minority groups. It focuses on models of trilingual education, i.e. education in the home language, Putonghua (Mandarin Chinese, the national language), and English (the main foreign language). Special attention is given to the study of the vitality of the minority home language in each region and issues relating to and the effects of the teaching and learning of the minority home language on minority students' acquisition of Mandarin Chinese and English and on their school performance in general. The book also examines the case of Cantonese in Guangdong, where the local Chinese 'dialect' is strong but distant from the mainstream language, Putonghua. It takes a new approach to researching sociolinguistic phenomena, and presents a new methodology that emerged from studies of bi/trilingualism in European societies and was then tailored to the trilingual context in China. The methodology encompasses policy analysis and community language profiles, as well as school-based fieldwork, and provides rich data that facilitate multilevel analysis of policy-in-context.

**Public High School Graduates who Participated in Vocational/technical Education, 1982-1998** Karen Levesque,2003 Patterns and trends in the vocational-technical course taking of public high school graduates between 1982 and 1998 were examined in a study of high school transcripts for the graduating classes of 1982, 1990, 1992, 1994, and 1998. The source data came from the following five studies: (1) High School and Beyond Sophomore Cohort, First Follow-up Survey, (2) High School Transcripts Study, 1982; (3) National Education Longitudinal Study of 1988, Second Follow-up Survey; (4) High School Transcript Study, 1992; and (5) High School Transcript Studies of 1990, 1994, and 1998. The analysis revealed differences in participation in vocational-technical education based on the following variables: race/ethnicity; sex; disability status; English proficiency; academic achievement; and school urbanicity and poverty level. Generally, graduates took fewer vocational courses between 1982 and 1998, although their occupational course taking was relatively steady. Graduates with disabilities as of grade 12 took more vocational and occupational course work by the end of the period studied. Asians and Pacific Islanders and high academic achievers did not exhibit the declines in vocational course taking that were observed for other groups. (Fifty-four tables/figures are included. The bibliography lists 22 references.

Appendixes constituting approximately 80% of the document contain the following items: 52 standard error tables; a glossary; and technical notes and a description of the study methodology.) (MN).
