Fishery Co-Management Robert S. Pomeroy, Rebecca Rivera-Guieb, 2005 During the last decade, there has been a shift in the governance and management of fisheries to a broader approach that recognizes the participation of fishers, local stewardship, and shared decision-making. Through this process, fishers are empowered to become active members of the management team, balancing rights and responsibilities, and working in partnership with government. This approach is called co-management. This handbook describes the process of community-based co-management from its beginning, through implementation, to turnover to the community. It provides ideas, methods, techniques, activities, checklists, examples, questions and indicators for the planning and implementing of a process of community-based co-management. It focuses on small-scale fisheries (freshwater, floodplain, estuarine, or marine) in developing countries, but is also relevant to small-scale fisheries in developed countries and to the management of other coastal resources (such as coral reefs, mangroves, sea grass, and wetlands). This handbook will be of significant interest to resource managers, practitioners, academics and students of small-scale fisheries.

The Complete Guide to the Great Ocean Road Richard Everist,2009 The Great Ocean Road region - the southwest coastline of Victoria - is simply extraordinary. This book unlocks the sights, activities and background context for visitors and locals - using maps, pictures and words. It is for everyone who is interested in exploring and learning about the region from Geelong to Portland. Sustainability depends first on knowledge, second on discerning customers and communities, and third on responsible businesses. This book features a number of businesses that are responding to the challenge, and: * details on hundreds of accessible sights * maps and information on over fifty sustainable activities including beach and surf guides, walking track notes, national parks and reserves and over fifty cities, towns and villages with more than sixty heritage sites. * fascinating background context including environmental issues, Aboriginal and European heritage, geology, ecosystems, flora and fauna.
