Experiencing Architecture, second edition Steen Eiler Rasmussen,1964-03-15 A classic examination of superb design through the centuries. Widely regarded as a classic in the field, *Experiencing Architecture* explores the history and promise of good design. Generously illustrated with historical examples of designing excellence—ranging from teacups, riding boots, and golf balls to the villas of Palladio and the fish-feeding pavilion of Beijing's Winter Palace—Rasmussen's accessible guide invites us to appreciate architecture not only as a profession, but as an art that shapes everyday experience. In the past,

Rasmussen argues, architecture was not just an individual pursuit, but a community undertaking. Dwellings were built with a natural feeling for place, materials and use, resulting in “a remarkably suitable comeliness.” While we cannot return to a former age, Rasmussen notes, we can still design spaces that are beautiful and useful by seeking to understand architecture as an art form that must be experienced. An understanding of good design comes not only from one's professional experience of architecture as an abstract, individual pursuit, but also from one's shared, everyday experience of architecture in real time—its particular use of light, color, shape, scale, texture, rhythm and sound. Experiencing Architecture reminds us of what good architectural design has accomplished over time, what it can accomplish still, and why it is worth pursuing. Wide-ranging and approachable, it is for anyone who has ever wondered “what instrument the architect plays on.”

Precedents in Architecture Roger H. Clark, Michael Pause, 1996 *Precedents in Architecture* provides a vocabulary for architectural analysis that will help you understand the works of others, and aid you in creating your own designs. Here, you will examine the work of internationally known architects with the help of a unique diagrammatic technique, which you can also use to analyze existing buildings. In addition to the sixteen original contributors, the Second Edition features seven new, distinguished architects. All 23 architects were selected because of the strength, quality, and interest of their designs.

Drafting House Plans June Curran, 1990 A natural outgrowth of Curran's earlier book, *Drawing house plans*, containing much of the same basic information, but also teaching you how to draw foundation plans, roof plans, sections, and details.

Architectural Design for Traditional Neighborhoods Korkut Onaran, Fernando Pages Ruiz, Ronnie Pelusio, Tom Lyon, 2019-07 *Architectural Design for Traditional Neighborhoods* offers simple concepts that will help developers and builders quickly grasp the basic ideas behind traditional neighborhood platting and block-face design. At the same time, designers must adapt to the methods and materials best suited to production builders, who build most of our nation's housing. Our guidelines help designers and planners work within the limitations of the construction industry while taking advantage of building material innovations that add value to TNDs.
