Discard Studies Max Liboiron, Josh Lepawsky, 2022-05-24 An argument that social, political, and economic systems maintain power by discarding certain people, places, and things. Discard studies is an emerging field that looks at waste and wasting broadly construed. Rather than focusing on waste and trash as the primary objects of study, discard studies looks at wider systems of waste and wasting to explore how some materials, practices, regions, and people are valued or devalued, becoming dominant or disposable. In this book, Max Liboiron and Josh Lepawsky argue that social, political, and economic systems maintain power by discarding certain people, places, and things. They show how the theories and methods of discard studies can be applied in a variety of cases, many of which do not involve waste, trash, or pollution. Liboiron and Lepawsky consider the partiality of knowledge and offer a theory of scale, exploring the myth that most waste is municipal solid waste produced by consumers; discuss peripheries, centers, and power, using content moderation as an example of how dominant systems find ways to discard; and use theories of difference to show that universalism, stereotypes, and inclusion all have politics of discard and even purification—as exemplified in “inclusive” efforts to broaden the Black Lives Matter movement. Finally, they develop a theory of change by considering “wasting well,” outlining techniques, methods, and propositions for a justice-oriented discard studies that keeps power in view.

Why Loiter? Shilpa Phadke, Sameera Khan, Shilpa Ranade, 2011 Presenting an original take on women’s safety in the cities of twenty-first century India, *Why Loiter?* maps the exclusions and negotiations that women from different classes and communities encounter in the nation’s urban public spaces. Basing this book on more than three years of research in Mumbai, Shilpa Phadke, Sameera Khan and Shilpa Ranade argue that though women’s access to urban public space has increased, they still do not have an equal claim to public space in the city. And they raise the question: can women’s access to public space be viewed in isolation from that of other marginal groups? Going beyond the problem of the real and implied risks associated with women’s presence in public, they draw from feminist theory to argue that only by celebrating

loitering—a radical act for most Indian women—can a truly equal, global city be created.

Assessing Global Land Use Stefan Bringezu, 2014 Global cropland is expanding with changing trends in both the production and consumption of land-based products, increasing pressure on land resources across the globe. This report discusses the need to balance consumption with sustainable production. It focuses on land-based products and describes methods which enable countries to determine whether their consumption levels exceed sustainable supply capacities.

Under the Whaleback Richard Bean, 2012-06-18 It's the worst job in the world and only those what is born to it, what has gorrit in the blood, can do it. Three generations of Hull men struggle with the legacies left to them by their fathers. A powerful and moving story of fate, choices and men at work, Under the Whaleback opened at the Royal Court Theatre in August 2002.

The Economics of Ecosystems and Biodiversity: Ecological and Economic Foundations Pushpam Kumar, 2012-12-20 Human well-being relies critically on ecosystem services provided by nature. Examples include water and air quality regulation, nutrient cycling and decomposition, plant pollination and flood control, all of which are dependent on biodiversity. They are predominantly public goods with limited or no markets and do not command any price in the conventional economic system, so their loss is often not detected and continues unaddressed and unabated. This in turn not only impacts human well-being, but also seriously undermines the sustainability of the economic system. It is against this background that TEEB: The Economics of Ecosystems and Biodiversity project was set up in 2007 and led by the United Nations Environment Programme to provide a comprehensive global assessment of economic aspects of these issues. This book, written by a team of international experts, represents the scientific state of the art, providing a comprehensive assessment of the fundamental ecological and economic principles of measuring and valuing ecosystem services and biodiversity, and showing how these can be mainstreamed into public policies. This volume and subsequent TEEB outputs will provide the authoritative knowledge and guidance to drive forward the biodiversity conservation agenda for the next decade.

Sense of Place, Health and Quality of Life Allison Williams, 2016-12-05 A significant body of theoretical and empirical studies describes 'sense of place' as an outcome of interconnected psychological, social and environmental processes in relation to physical place(s). Sense of place has been examined, particularly in human geography, in terms of both the character intrinsic to a place as a localized, bounded and material entity, and the sentiments of attachment/detachment that humans experience and express in relation to specific places. Scholars in a wide range of disciplines are increasingly exploring the relationship between place and health, and recently, the field of public health has been encouraged to recognize sense of place as a potential contributing factor to well-being. It is evident that over the last few decades, sense of

place has developed into a versatile construct. This important book brings together work related to sense of place and health, broadly defined, from the perspective of a variety of fields and disciplines. It will give the reader an understanding of both the range of applications of this construct within approaches to human health as well as the breadth of research methodologies employed in its investigation.

Reconstructing Ashkenaz David Malkiel,2008-10-10 Reconstructing Ashkenaz shows that, contrary to traditional accounts, the Jews of Western Europe in the High Middle Ages were not a society of saints and martyrs. David Malkiel offers provocative revisions of commonly held interpretations of Jewish martyrdom in the First Crusade massacres, the level of obedience to rabbinic authority, and relations with apostates and with Christians. In the process, he also reexamines and radically revises the view that Ashkenazic Jewry was more pious than its Sephardic counterpart.

The Social Metabolism Manuel González de Molina,Víctor M. Toledo,2014-06-30 Over this last decade, the concept of Social Metabolism has gained prestige as a theoretical instrument for the required analysis, to such an extent that there are now dozens of researchers, hundreds of articles and several books that have adopted and use this concept. However, there is a great deal of variety in terms of definitions and interpretations, as well as different methodologies around this concept, which prevents the consolidation of a unified field of new knowledge. The fundamental aim of the book is to conduct a review of the past and present usage of the concept of social metabolism, its origins and history, as well as the main currents or schools that exist around this concept. At the same time, the reviews and discussions included are used by the authors as starting points to draw conclusions and propose a theory of socio-ecological transformations. The theoretical and methodological innovations of this book include a distinction of two types of metabolic processes: tangible and intangible; the analysis of the social metabolism at different scales (in space and time) and a theory of socio-ecological change overcoming the merely “systemic” or “cybernetic” nature of conventional approaches, giving special protagonism to collective action.

Using German Synonyms Martin Durrell,2000-05-29 This book, designed for students who have already developed a basic competence in German, aims to broaden and improve their vocabulary by providing detailed information on groups of German words with related meanings. It is invaluable as a guide to finding the right word for the context. In order to enhance understanding of the structure of the German vocabulary, groups of synonyms are organised under German (rather than English) headwords. All entries are accompanied by an example of usage and English glosses and there are two indexes allowing users quickly to locate words in German or English. The book takes full account of register variation, indicating the degree of formal or informal use, and reflects regional usage especially in Austria and Switzerland. It is an essential reference for intermediate and advanced students as well as teachers and other professional linguists seeking access to the finer nuances of the German language.

LIFE Michael 1958-2009 Editors of Life,2009-08-18 From this book's first chapter: To be able to float free, with gravity

exerting no impact. To live in Neverland. To be idolized-to be loved-by millions around the world. These seem completely unreasonable dreams. But from a boy from Gary, Indiana, who was special from the first, they became more than dreams. They became fundamental needs. And they were achieved during a lifetime that was stunning in its highs and lows, and that was, ultimately, far, far too short. Far too short and, more sadly still, perhaps poised for a triumphant next chapter. We will never know. While that is true-we will never know-we can revisit and celebrate that extraordinary life, and we do so in words and pictures in this special commemorative book. Although Michael Jackson lived just 50 years, he spent the great majority of that time in the public eye. We loved his as a boy, radiating joy and dancing up a storm in the Jackson 5, his falsetto tenor pouring forth from car radios coast to coast. We were subsequently thrilled by his reinvention as the biggest pop star on the planet, with Billie Jean and Beat It blasting from boom boxes around the world. The best pictures from each era are here. As you would expect, LIFE magazine, then the country's preeminent photo journal, was onto the Jackson 5 story early-in fact, we put the family on our cover when Michael was still a lad. He made the cover several more times, and he allowed LIFE exclusive access to his private California sanctum called Neverland. We have combed through our archives and found all the famous shots as well as several surprises, including never-before-seen pictures that show the boy and then the man in an unguarded, personal way. Also, we have taken the best from the portfolios of the world's top rock 'n' roll photographers and created, we think, a complete picture of this endlessly compelling entertainer. Michael Jackson was, like Sinatra, Elvis, the Beatles and few others, a celebrity who not only made us smile but changed the culture-who altered the way that we looked and behaved. In this book, we relive his thrilling life and times, which were our time too.

Intricate Interfaith Networks in the Middle Ages Ephraim Shoham-Steiner, 2016 Recent scholarship has suggested that the religious divide between Jews and Christians in the Middle Ages, although ever-present (and at times even violently so), did not stop individuals and groups from forming ties and expanding them in more intricate ways than previously thought. Moreover, these networks appear to have functioned with an apparent disregard towards any confessional and religious differences. Nevertheless, this was by no means a straightforward or simple situation; both the theological background to how each faith viewed 'other' beliefs, as well as the strong social, religious, and authoritative circles that at the least critiqued, even if they did not entirely discourage such contacts, created a formidable opposition to these networks. The articles in this book were presented as papers during an international workshop at the Central European University in Budapest in February 2010. In these presentations and discussions, the premise of interfaith relations and networks was thoroughly explored across Europe from the Iberian Peninsula to the eastern Hungarian frontier, and from England to Italy throughout the high and later medieval period. In this volume, the contributors explore a number of phenomena through different disciplinary approaches. Ties of an economic and cultural nature are examined, and attention is paid to social contacts and networks in the fields of art and the sciences, and matters of daily life. The picture that emerges is altogether

more nuanced and diverse than the bipolar paradigm that has dominated previous scholarship.

Sermon to the Princes Thomas Muntzer,2010-05-25 Thomas Müntzer was a radical pastor frustrated by the Reformation. He believed that Martin Luther's stand against the Church did not go far enough and demanded the realization of the Kingdom of Heaven on Earth. To that end, in 1524 he led the Peasants' War in Germany, an insurrection that culminated in his brutal execution. Gathered here, along with Müntzer's final confession, are some of his key rousing sermons attacking the princes and preaching an early form of communism. Wu Ming, the Italian authors' collective, brought the Radical Reformation to life in their bestselling novel Q (written under the pseudonym Luther Blissett). In an introduction, they examine how Müntzer has continued to inspire visionaries and radicals for the last 500 years.

Tiergarten, Landscape of Transgression Sandra Bartoli,Jörg Stollmann,2019 Tiergarten is Berlin's oldest park, with more than five hundred acres of woodland in the heart of the city. Before it was absorbed by the city, the area that became Tiergarten was a naturally occurring forest. Throughout its history, it was used as royal hunting grounds and as a landscaped public park, and--in the years of hardship following World War II-- an area where trees were felled for firewood, before changing social and political circumstances and the growing ecological movement led to measures to restore and replant the vast public space. Thus, Tiergarten has become not only a very popular place of recreation but as well a biotope of extraordinarily high biodiversity. Generously illustrated with historical and contemporary photographs, Tiergarten, Landscape of Transgression takes readers through the history of the park, with an eye toward exploring it as a radical spatial expression--a space where humans and other species and conflicting histories coexist in close proximity, and a model for future environments in areas of intense urbanization. Born of a recent symposium staged by the Technische Universität Berlin, the book brings together twelve essays with a range of archival documents, including newspaper articles, maps, reports, plans, and photographs.
