A Commonwealth of Knowledge Saul Dubow,2006-10-19 A Commonwealth of Knowledge addresses the relationship between social and scientific thought, colonial identity, and political power in nineteenth- and twentieth-century South Africa. It hinges on the tension between colonial knowledge, conceived of as a universal, modernizing force, and its realization in the context of a society divided along complex ethnic and racial fault-lines. By means of detailed analysis of colonial cultures, literary and scientific institutions, and expert historical thinking about South Africa and its peoples, it demonstrates the ways in which the cultivation of knowledge has served to support white political ascendancy and claims to nationhood. In a sustained commentary on modern South African historiography, the significance of 'broad' South Africanism - a political tradition designed to transcend differences between white English- and Afrikaans-speakers - is emphasized. A

Commonwealth of Knowledge also engages with wider comparative debates. These include the nature of imperial and colonial knowledge systems; the role of intellectual ideas and concepts in constituting ethnic, racial, and regional identities; the dissemination of ideas between imperial metropole and colonial periphery; the emergence of amateur and professional intellectual communities; and the encounter between imperial and indigenous or local knowledge systems. The book has broad scope. It opens with a discussion of civic institutions (eg. museums, libraries, botanical gardens and scientific societies), and assesses their role in creating a distinctive sense of Cape colonial identity; the book goes on to discuss the ways in which scientific and other forms of knowledge contributed to the development of a capacious South Africanist patriotism compatible with continued membership of the British Commonwealth; it concludes with reflections on the techno-nationalism of the apartheid state and situates contemporary concerns like the 'African Renaissance', and responses to HIV/AIDS, in broad historical context.

Resource Therapy Gordon Emmerson, 2014-07-02 Resource Therapy is a parts therapy, like Ego State Therapy, but it

does not require the use of hypnosis. It has detailed diagnostic criteria with precisely defined treatment regimens for each classification. This enables therapists to respond to difficult issues with straightforward techniques. Clear guidelines help therapists to diagnose patients into categories relating to whether they present with unwanted emotions, unwanted behaviors, or unwanted internal conflicts. RT Actions allow therapists to quickly locate Resources that need change. Personality parts are Resources and when a Resource becomes pathological the result is distress. It is my contention that some personality parts carry negative affect (Vaded States), some carry out unwanted behavior (Retro States), and some are conflicted with other states (Conflicted States). The precise condition of each pathological state can be diagnosed to understand the dynamic role it has assumed within the personality. This book will assist in the understanding of the etiology of issues including, but not limited to, OCD, depression, eating disorders, addictions, and PTSD. Technique regimens for working directly with the different Pathological States are clearly presented and illustrated. These techniques will enable therapists to gain direct access to the personality parts that hold pathology and to assist in resolution. Resolving the pathology of the Resource States alleviates the causes of psychological distress, and frees Personality Resources to resume positive functions.
