Introduction to Modeling and Simulation of Technical and Physical Systems with Modelica Peter Fritzson, 2011-10-03

Master modeling and simulation using Modelica, the new powerful, highly versatile object-based modeling language Modelica, the new object-based software/hardware modeling language that is quickly gaining popularity around the world, offers an almost universal approach to high-level computational modeling and simulation. It handles a broad range of application domains, for example mechanics, electrical systems, control, and thermodynamics, and facilitates general notation as well as powerful abstractions and efficient implementations. Using the versatile Modelica language and its associated technology, this text presents an object-oriented, component-based approach that makes it possible for readers to quickly master the basics of computer-supported equation-based object-oriented (EEO) mathematical modeling and simulation. Throughout the text, Modelica is used to illustrate the various aspects of modeling and simulation. At the same time, a number of key concepts underlying the Modelica language are explained with the use of modeling and simulation examples. This book: Examines basic concepts such as systems, models, and simulations Guides readers through the Modelica language with the aid of several step-by-step examples Introduces the Modelica class concept and its use in graphical and textual modeling Explores modeling methodology for continuous, discrete, and hybrid systems Presents an overview of the Modelica Standard Library and key Modelica model libraries Readers will find plenty of examples of models that simulate distinct application domains as well as examples that combine several domains. All the examples and exercises in the text are available via DrModelica. This electronic self-teaching program, freely available on the text's companion website, guides readers from simple, introductory examples and exercises to more advanced ones. Written by the Director of the Open Source Modelica Consortium, Introduction to Modeling and Simulation of Technical and Physical Systems with Modelica is recommended for engineers and students interested in computer-aided design, modeling, simulation, and analysis of technical and natural systems. By building on basic concepts, the text is ideal for students who want to learn modeling, simulation, and object orientation.

Tackling Climate Change Through Livestock Food and Agriculture Organization of the United Nations,2013 Greenhouse gas emissions by the livestock sector could be cut by as much as 30 percent through the wider use of existing best practices and technologies. FAO conducted a detailed analysis of GHG emissions at multiple stages of various livestock supply chains, including the production and transport of animal feed, on-farm energy use, emissions from animal digestion and manure decay, as well as the post-slaughter transport, refrigeration and packaging of animal products. This report represents the most comprehensive estimate made to-date of livestock's contribution to global warming as well as the sector's potential to help tackle the problem. This publication is aimed at professionals in food and agriculture as well as policy makers.

Creación de bosques y sistemas de producción agrosilvopastorales resilientes en las tierras áridas Organización de las Naciones Unidas para la Agricultura y la Alimentación,2021-09-09 Los esfuerzos de transformación de los bosques de tierras secas y los sistemas agrosilvopastorales se centran con mayor frecuencia en los diferentes aspectos técnicos de la gestión de sistemas. Normalmente se dirigen a aspectos como el manejo del pastoreo, la restauración o adición de árboles y el manejo de la materia orgánica, el agua y la fertilidad del suelo. Los impactos primarios anticipados y los efectos secundarios pueden variar con el contexto de las tierras secas y con el propósito e intención de los actores intervinientes. Sin embargo, los impactos previstos de la transformación a menudo se dirigen a aspectos amplios que abarcan la seguridad alimentaria y la reducción de la pobreza y la mejora de la gestión de los ecosistemas, que también apoyan el logro de los ODS. El Programa de Desarrollo Sostenible de 2030 es el proyecto de desarrollo sostenible y transformación de los sistemas alimentarios y agrícolas para poner fin a la pobreza y proteger el planeta. Hace hincapié en la necesidad de una labor integrada intersectorial que ponga a las personas, la paz y la prosperidad en el centro. La visión común de la FAO para la alimentación y la agricultura sostenibles proporciona un marco holístico. En él se esbozan cinco principios generales (véase el recuadro 5) para orientar la acción política y estratégica hacia la sostenibilidad agrícola productiva, económicamente viable y ambientalmente racional y que contribuya a la equidad. Las transformaciones esperadas cuando se combinan pueden reforzar las conexiones entre los pilares económico, social y ambiental de la sostenibilidad. Los posibles beneficios y compensaciones deberían evaluarse, sopesar y gestionarse en consecuencia, teniendo en cuenta los conocimientos tradicionales y la equidad de género. No obstante, la percepción de los beneficios y las compensaciones puede ser diferente para los diferentes grupos de partes interesadas.

*Qualitative and Nutritional Improvement of Cereal-Based Foods and Beverages* Antonella Pasqualone, Carmine Summo, 2021-06-09 Increased consumer awareness of the effects of food in preventing nutrient-related diseases and maintaining physical and mental well-being has made nutritional improvement an important goal for the food and beverage industry, including the cereal sector. The Book “Qualitative and Nutritional Improvement of Cereal-Based Foods and Beverages” collects research articles aimed at exploring innovative ways to improve cereal-based foods and beverages; an old—if not ancient—group of products which are still on our table every day. The main directions of research aimed at nutritional improvement have to face either excess or deficiency in the diet. To this end, different strategies may be adopted, such as the reformulation of products, the introduction of functional ingredients, and the application of biotechnologies to increase the bioavailability of bioactive compounds. These interventions, however, can alter the physico-chemical and sensory properties of final products, making it necessary to achieve a balance between nutritional and quality modification. This book offers readers information on innovative ways to improve cereal-based foods and beverages, useful for researchers and for industry operators.

*Sistema de Equações Lineares* Augusto Ribeiro, 2022-04-25 Este livro é um trabalho dissertativo que sugere o ensino de Sistemas Lineares, por meio de uma sequência didática. O seu principal objetivo é proporcionar a assimilação do conceito de sistemas equivalentes e a construção das habilidades para resolução de problemas que por esta ferramenta podem ser modelados. Para a composição desse texto, buscamos apoio na engenharia didática, nas teorias que apoiam o jogo como recurso pedagógico, na teoria dos registros e representação semiótica, na transposição didática e em trabalhos anteriores sobre sequência didática. Pela transposição didática, o leitor verificará a forma de engajar o conteúdo científico ao meio onde o aluno vive; pelos registros e representação semiótica, verificará um guia para interpretar os registros deixados pelos alunos ao resolver cada item da atividade usada na experimentação e pela nossa sequência didática, pode verificar nossa proposta de ensino de sistemas lineares. O produto educacional, que é a atividade de experimentação geradora deste volume, poderá ser publicado à parte mais adiante, isto por se tratar especificamente da sequência didática experimentada, e por compreendermos não comprometer a perfeita compreensão do conteúdo do presente volume, pois mesmo sendo uma obra em duas partes, cada uma delas pode ser lida e apreciada de forma independente.

Hambre Cero. Narraciones y esfuerzos institucionales Pablo Ayala Enríquez, Luz Natalia Berrún Castañón, José Carlos Vázquez Parra, 2024-01-08 Sin lugar a duda, el rasgo que mejor define a este libro es el de la oportunidad, ya que pone el acento en uno de los peores dramas que afectan a la humanidad: el hambre. El resultado de las investigaciones aquí reunidas da para convencerse que no es un exceso adjetivar con dicha palabra el problema del hambre en el mundo. Si se produce y desperdicia mucho más alimento del requerido para sostener a la población que habita el planeta, ¿por qué día tras día continúan muriendo más de veinticinco personas por causas asociadas a la pobreza alimentaria? ¿Por qué permitimos que nazcan y mueran personas condenadas a causa de la pobreza alimentaria, si existen los recursos económicos, tecnológicos y científicos necesarios para evitar que eso suceda? La respuesta a estas preguntas, pero, sobre todo, las propuestas para revertir las situaciones que las detonan, son la ventana de esperanza que este esfuerzo interuniversitario ofrece a través de sus páginas, llevándonos a pensar y creer que podremos atestiguar el fin de este innecesario y vergonzante flagelo.

*Glosario Del Banco Mundial* World Bank, 1996 This edition of the World Bank has been revised and expanded by the Terminology Unit in the Languages Services Division of the World Bank in collaboration with the English, Spanish, and French Translation Sections. The Glossary is intended to assist the Bank's translators and interpreters, other Bank staff using French and Spanish in their work, and free-lance translator's and interpreters employed by the Bank. For this reason, the Glossary contains not only financial and economic terminology and terms relating to the Bank's procedures and practices, but also terms that frequently occur in Bank documents, and others for which the Bank has a preferred equivalent. Although many of these terms, relating to such fields as agriculture, education, energy, housing, law, technology, and transportation, could be found in other sources, they have been assembled here for ease of reference. A list of acronyms occurring frequently in Bank texts (the terms to which they refer being found in the Glossary) and a list of international, regional, and national

organizations will be found at the end of the Glossary.

Nutritional Care of Preterm Infants B. Koletzko, B. Poindexter, R. Uauy, 2014-04-15 Improved conditions of care for premature infants have led to markedly increased survival rates over the last few decades, particularly in very low and extremely low birth weight infants. Nutritional measures play a central role in the long-term outcome, health and quality of life of these premature infants. In this publication, leading experts from all 5 continents present the most recent evidence and critical analyses of nutrient requirements and the practice of nutritional care (with the focus on very low birth weight infants) to provide guidance for clinical application. After the introductory chapters, covering nutritional needs and research evidence in a more general manner, topics such as amino acids and proteins, lipids, microminerals and vitamins, parenteral and enteral nutrition as well as approaches to various disease conditions are addressed. Due to its focus on critical appraisals and recommendations, this book is of interest not only for the researcher who wants to keep up to date, but also for the clinician faced with premature infants in his practice.

*Mini Nutritional Assessment (MNA)* Bruno J. Vellas, Philip J. Garry, Yves Guigoz, Nestlé Nutrition Services, 1999 This book is the first of a new series which will present the proceedings of the newly established Nestlé Nutrition Workshop Series: Clinical & Performance Programme aimed at adult nutrition. Undernutrition is a common phenomenon in elderly people, and malnutrition reaches significant levels in those being in hospital, nursing homes or home care programs. Consequences of malnutrition often go unrecognised owing to the lack of specific validated instruments to assess nutritional status in frail elderly persons. The Mini Nutritional Assessment (MNA) provides a single, rapid assessment of nutritional status in the elderly of different degrees of independence, allowing the prevalence of protein-energy malnutrition to be determined and to evaluate the efficacy of nutritional intervention and strategies. Easy, quick and economical to perform, it enables staff to check the nutritional status of elderly people when they enter hospitals or institutions and to monitor changes occurring during their stay. Moreover, the MNA is predictive of the cost of care and length of stay in hospital. This publication will be

of immense assistance to heads of geriatric teaching units, teachers in nutrition, clinicians general practitioners and dieticians, enabling them to better detect, recognise and start treatment of malnutrition in the elderly.
