The Book of Chilam Balam of Chumayel Ralph Loveland Roys,

Chilam Balam of Ixil: Facsimile and Study of an Unpublished Maya Book Laura Caso Barrera,2019-02-27 In Chilam Balam of Ixil Laura Caso Barrera translates for the first time a Yucatec Maya document that resulted from the meticulous reading by the Colonial Maya of various European texts such as the Bible and the Poem of the Mío Cid, as well as various studies on astronomy, astrology, calendars, and medicine. The Maya, showing considerable astuteness and insight, appropriated this knowledge. With this study and facsimile, experts can further their knowledge of Mayan calendars or traditional medicine; and Mayan enthusiasts can discover more about the culture's world view and history. En el Chilam Balam de Ixil Laura Caso Barrera traduce por primera vez un documento en maya yucateco, que resultó de la minuciosa lectura que realizaron los mayas coloniales de distintos textos europeos como la Biblia o el Cantar del Mío Cid, así como de diversos estudios de astronomía, astrología, calendarios y medicina. Con astucia y perspicacia, los mayas hicieron propio ese saber. Con esta edición, los expertos podrán ahondar en las anotaciones calendáricas o la medicina tradicional maya; y los amantes de esta cultura conocerán otros aspectos de su pensamiento e historia.

Maya Archaeology and Ethnohistory Norman Hammond,Gordon R. Willey,2012-01-11 Embracing a wide range of research, this book offers various views on the intellectual history of Maya archaeology and ethnohistory and the processes operating in the rise and fall of Maya civilization. The fourteen studies were selected from those presented at the Second Cambridge Symposium on Recent Research in Mesoamerican Archaeology and are presented in three major sections. The

first of these deals with the application of theory, both anthropological and historical, to the great civilization of the Classic Maya, which flourished in the Yucatan, Guatemala, and Belize during the first millennium A.D. The structural remains of the Classic Period have impressed travelers and archaeologists for over a century, and aspects of the development and decline of this strange and brilliant tropical forest culture are examined here in the light of archaeological research. The second section presents the results of field research ranging from the Highlands of Mexico east to Honduras and north into the Lowland heart of Maya civilization, and iconographic study of excavated material. The third section covers the ethnohistoric approach to archaeology, the conjunction of material and documentary evidence. Early European documents are used to illuminate historic Maya culture. This section includes transcriptions of previously unpublished archival material. Although not formally linked beyond their common field of inquiry, the essays here offer a conspectus of late-twentieth century Maya research and a series of case histories of the work of some of the leading scholars in the field.

Dictionary of Mexican Literature Eladio Cortes, 1992-11-24 This volume features approximately 600 entries that represent the major writers, literary schools, and cultural movements in the history of Mexican literature. A collaborative effort by American, Mexican, and Hispanic scholars, the text contains bibliographical, biographical, and critical material—placing each work cited within its cultural and historical framework. Intended to enrich the English-speaking public's appreciation of the rich diversity of Mexican literature, works are selected on the basis of their contribution toward an understanding of this unique artistry. The dictionary contains entries keyed by author and works, the length of each entry determined by the relative significance of the writer or movement being discussed. Each biographical entry identifies the author's literary contribution by including facts about his or her life and works, a chronological list of works, a supplementary bibliography, and, when appropriate, critical notes. Authors are listed alphabetically and cross-referenced both within the text and the index to facilitate easy access to information. Selected bibliographical entries are also listed alphabetically by author and include both the original title and English translation, publisher, date and place of publication, and number of pages.

The Gospel of the Toltecs Frank Díaz, 2002-06 The author has gathered Nahua and Maya codexes, Spanish chronicles of conquest, and native oral tradition to recount the life of Quetzalcoatl: his temptation and fall; his initiation with sacred mushrooms; his long journey in search of spiritual enlightenment; his triumphant return to the Toltec land; and his subsequent teaching, self-immolation, ascension, and promise of return.

The Brink of Freedom David Kazanjian, 2016-05-19 In *The Brink of Freedom* David Kazanjian revises nineteenth-century conceptions of freedom by examining the ways black settler colonists in Liberia and Mayan rebels in Yucatán imagined how to live freely. Focusing on colonial and early national Liberia and the Caste War of Yucatán, Kazanjian interprets letters from

black settlers in apposition to letters and literature from Mayan rebels and their Creole antagonists. He reads these overlooked, multilingual archives not for their descriptive content, but for how they unsettle and recast liberal forms of freedom within global systems of racial capitalism. By juxtaposing two unheralded and seemingly unrelated Atlantic histories, Kazanjian finds remarkably fresh, nuanced, and worldly conceptions of freedom thriving amidst the archived everyday. The Brink of Freedom's speculative, quotidian globalities ultimately ask us to improvise radical ways of living in the world.

Roots of Identity Linda King, 1994 Despite over 50 years of literacy training by the Mexican government, the National Census records an illiteracy rate of over 70 percent in most Indian communities. This book attempts to discover why so many Indians are illiterate today despite an indigenous literary tradition that dates back to the pre-Conquest period. The author sees language as the main factor explaining the high illiteracy rate in the Indian regions. Although alphabets have been created for most of Mexico's indigenous languages, there is no longer a literate tradition in the languages themselves, and writing is intrinsically associated with the official and dominant language, Spanish. Indians continue to reproduce their group identity through the maintenance of linguistic and cultural boundaries. How these boundaries have been built over time and how they continue to be maintained throughout the 20th century form the substance of this book.

Companion to Empire David Rojinsky, 2010-01-01 This volume traces a genealogy of the varied conceptions and functions of alphabetic writing in Hispanic cultures of the pre-modern and early colonial periods. The historical junctures selected are those at which the written word (in grammatical, historical and legal discourse) assumed increased ideological importance for bolstering different kinds of 'imperial' power. In effect, Companion to Empire posits a constellation of historical scenarios, rather than a singular mythical origin, in which the alliance between writing and imperium might be discerned. The corpus of primary texts considered in the volume derives from works by foundational figures in the history of pre-modern language theories (Isidore of Seville, Alfonso X the Wise, Antonio de Nebrija) and from those identified with the early transatlantic expansion of alphabetic writing (Peter Martyr D'Anghiera, Bernardino de Sahagún, Nuño Beltrán de Guzmán). By reading these canonical texts against the grain, the author avoids the totalizing gesture of histories of the language, and instead focuses upon the relationship between prestige written languages, the creation of a 'literate mentality' and the need to consolidate imperium on both sides of the Atlantic. Companion to Empire will thus be of interest to those adopting a 'post-philological' approach to Hispanic Studies, as well as those interested in medieval and transatlantic imperium studies.

Circling the Square Anthony Aveni, 2012 Since antiquity, time in the West has been represented in circular form, the gear wheels of time churning out duration in endless years. At the time of the Spanish conquest, dials on round clock faces looked down from facades of cathedrals, their tones chiming out the hours that directed people's religious and workaday lives. Spanish chroniclers assert that the circle was also the principal mode of temporal expression among the New World natives they sought to Catholicize. Here, Anthony Aveni demonstrates that this was decidedly not the case. Rather, the indigenous quadripartite way of perceiving rendered the expression of time to have been decidedly square. He examines an array of calendar circles appearing in manuscripts from Central Mexico and the Maya area of Yucatan from the time of 16th-century contact up to the 18th century and follows the gradual intrusion of Western calendrical particulars into the native format. Dr. Aveni offers insight into the tension in the first generation of native scribes after the conquest, who were working with radically different ways of knowing between the imposed requirement to change the way they thought about time and the desire to preserve their heritage and their identity.
