The Crossroads: Privacy, Disability and Employment Enrique Opi Tufet, 2020-05-31 Privacy, dignity, equality, and non-discrimination are fundamental values upon which the European Union was founded. They are firmly embedded in the Treaties of the European Union, the Charter of Fundamental Rights of the European Union, and secondary legislation. Combatting discrimination in the labour market and protecting the rights of persons with disabilities are core obligations of the European Union. Not many are aware that more than 15 per cent of the total potential workforce of the European Union has some form of disability - of which over 50 per cent are unemployed. This is all the more reason for the EU to maintain its

commitment to include these individuals in the labour force and to guarantee their fair treatment and protection of their particularly sensitive data. It is precisely in this light that *The Crossroads: Privacy, Disability and Employment* must be seen: a sort of driving manual for disability organizations. It will be important to collect, process and handle personal data and to embrace new technologies without compromising privacy in the process. This manual also provides the various stakeholders with relevant articles of the GDPR and other legislative texts to equip them with sufficient knowledge and useful tools to ensure and to successfully navigate the crossroads between privacy and employment for persons with disabilities. Enrique Opi Tufet is an “actibilist”, a term he coined some time ago to describe an activist on disability issues. He has an LL.M. in International Law from Vrije Universiteit Brussel and he is a certified Data Protection Officer (DPO) by Maastricht University. Currently, Enrique acts as a Regional Director of Inserta/Fundación ONCE in Spain, an employment and disability program funded by the European Social Fund. He himself has a visual disability and is therefore intimately familiar with the challenges persons with disabilities face. Before Inserta, Enrique was the Corporate Vice President and General Counsel of Epson Europe. Previously, he led the Brussels operations of two major worldwide public relations agencies. He has written a number of articles and contributions addressing environmental policy, sustainability and communications. Enrique lives in Barcelona with his wife and son.

Data Localization Laws and Policy W. Kuan Hon, 2017 Countries are increasingly introducing data localization laws, threatening digital globalization and inhibiting cloud computing adoption despite its acknowledged benefits. This multi-disciplinary book analyzes the EU restriction (including the Privacy Shield and General Data Protection Regulation) through a cloud computing lens, covering historical objectives and practical problems, showing why the focus should move from physical data location to effective jurisdiction over those controlling access to intelligible data, and control of access to data through security.

Security, Privacy, and Forensics Issues in Big Data Joshi, Ramesh C., Gupta, Brij B., 2019-08-30 With the proliferation of devices connected to the internet and connected to each other, the volume of data collected, stored, and processed is increasing every day, which brings new challenges in terms of information security. As big data expands with the help of public clouds, traditional security solutions tailored to private computing infrastructures and confined to a well-defined security perimeter, such as firewalls and demilitarized zones (DMZs), are no longer effective. New security functions are required to work over the heterogeneous composition of diverse hardware, operating systems, and network domains. Security, Privacy, and Forensics Issues in Big Data is an essential research book that examines recent advancements in big data and the impact that these advancements have on information security and privacy measures needed for these networks. Highlighting a range of topics including cryptography, data analytics, and threat detection, this is an excellent reference source for students, software developers and engineers, security analysts, IT consultants, academicians, researchers, and professionals.

Cyber Security: Law and Guidance Helen Wong MBE, 2018-09-28 Implementing appropriate security measures will be an advantage when protecting organisations from regulatory action and litigation in cyber security law: can you provide a defensive shield? Cyber Security: Law and Guidance provides an overview of legal developments in cyber security and data protection in the European Union and the United Kingdom, focusing on the key cyber security laws and related legal instruments, including those for data protection and payment services. Additional context is provided through insight into

how the law is developed outside the regulatory frameworks, referencing the 'Consensus of Professional Opinion' on cyber security, case law and the role of professional and industry standards for security. With cyber security law destined to become heavily contentious, upholding a robust security framework will become an advantage and organisations will require expert assistance to operationalise matters. Practical in approach, this comprehensive text will be invaluable for legal practitioners and organisations. It covers both the law and its practical application, helping to ensure that advisers and organisations have effective policies and procedures in place to deal with cyber security. Topics include: - Threats and vulnerabilities - Privacy and security in the workplace and built environment - Importance of policy and guidance in digital communications - Industry specialists' in-depth reports - Social media and cyber security - International law and interaction between states - Data security and classification - Protecting organisations - Cyber security: cause and cure Cyber Security: Law and Guidance is on the indicative reading list of the University of Kent's Cyber Law module.

Privacy and Data Protection Challenges in the Distributed Era Eugenia Politou, Efthimios Alepis, Maria Virvou, Constantinos Patsakis, 2021-10-22 This book examines the conflicts arising from the implementation of privacy principles enshrined in the GDPR, and most particularly of the "Right to be Forgotten", on a wide range of contemporary organizational processes, business practices, and emerging computing platforms and decentralized technologies. Among others, we study two ground-breaking innovations of our distributed era: the ubiquitous mobile computing and the decentralized p2p networks such as the blockchain and the IPFS, and we explore their risks to privacy in relation to the principles stipulated by the GDPR. In that context, we identify major inconsistencies between these state-of-the-art technologies with the GDPR and we propose efficient solutions to mitigate their conflicts while safeguarding the privacy and data protection rights. Last but not least, we analyse the security and privacy challenges arising from the COVID-19 pandemic during which digital technologies are extensively utilized to surveil people's lives.

GDPR and Cyber Security for Business Information Systems Antoni Gobeo, Connor Fowler, William J.

Buchanan, 2022-09-01 The General Data Protection Regulation is the latest, and one of the most stringent, regulations regarding Data Protection to be passed into law by the European Union. Fundamentally, it aims to protect the Rights and Freedoms of all the individuals included under its terms; ultimately the privacy and security of all our personal data. This requirement for protection extends globally, to all organisations, public and private, wherever personal data is held, processed, or transmitted concerning any EU citizen. Cyber Security is at the core of data protection and there is a heavy emphasis on the application of encryption and state of the art technology within the articles of the GDPR. This is considered to be a primary method in achieving compliance with the law. Understanding the overall use and scope of Cyber Security principles and tools allows for greater efficiency and more cost effective management of Information systems. GDPR and Cyber Security for Business Information Systems is designed to present specific and practical information on the key areas of

compliance to the GDPR relevant to Business Information Systems in a global context.
