The American Presidency William G. Howell,2023-02-21 How institutions shape the American presidency This incisive undergraduate textbook emphasizes the institutional sources of presidential power and executive governance, enabling students to think more clearly and systematically about the American presidency at a time when media coverage of the White House is awash in anecdotes and personalities. William Howell offers unparalleled perspective on the world's most powerful office, from its original design in the Constitution to its historical growth over time; its elections and transitions to governance; its interactions with Congress, the courts, and the federal bureaucracy; and its persistent efforts to shape public policy. Comprehensive in scope and rooted in the latest scholarship, *The American Presidency* is the perfect guide for studying the presidency at a time of acute partisan polarization and popular anxiety about the health and well-being of the republic. Focuses on the institutional structures that presidents must navigate, the incentives and opportunities that drive them, and the constraints they routinely confront Shows how legislators, judges, bureaucrats, the media, and the broader public shape the contours and limits of presidential power Encourages students to view the institutional presidency as not just an object of study but a way of thinking about executive politics Highlights the lasting effects of important historical moments on the institutional presidency Enables students to grapple with enduring themes of power, rules, norms, and organization that undergird democracy

Miscellanies Angelo Poliziano,2020 In the *Miscellanies*, the great Italian Renaissance scholar-poet Angelo Poliziano penned two sets of mini-essays focused on lexical or textual problems. He solves these with his characteristic deep learning and brash criticism. The two volumes presented here are the first translation of both collection into any modern language

Teaching and Learning at a Distance Michael Simonson,Susan Zvacek,2024-01-01 *Teaching and Learning at a Distance* is written for introductory distance education courses for preservice or in-service teachers, and for training programs that discuss teaching distant learners or managing distance education systems. This text provides readers with the basic

information needed to be knowledgeable distance educators and leaders of distance education programs. The teacher or trainer who uses this book will be able to design courses, evaluate programs, and identify issues and trends affecting the field. In this text we take the following themes: The first theme is the definition of distance education. Before we started writing the first edition of *Teaching and Learning at a Distance* we carefully reviewed the literature to determine the definition that would be at the foundation of our writing. This definition is based on the work of Desmond Keegan, but is unique to this book and has been adopted by the Association for Educational Communications and Technology and by the *Encyclopedia Britannica*. The second theme of the book is the importance of research to the development of effective courses and programs offered at a distance. The best practices presented in *Teaching and Learning at a Distance* are validated by scientific evidence. Certainly there are “rules of thumb,” but we have always attempted to only include recommendations that can be supported by research. The third theme of *Teaching and Learning at a Distance* is derived from Richard Clark’s famous quote published in the *Review of Educational Research* asserting that media are mere vehicles that do not directly influence achievement. Clark’s controversial work is discussed in the book, but is also fundamental to the book’s advocacy for distance education—in other words, we authors do not make the claim that education delivered at a distance is inherently better than other ways people learn. Distance delivered instruction is not a magical approach that makes learners achieve more. Equivalency theory is the fourth theme of the book. Here we present the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment. Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face-to-face classroom. The final theme for *Teaching and Learning at a Distance* is the idea that the book should be comprehensive—that it should cover as much of the various ways instruction is made available to distant learners as is possible. It can serve as a stand-alone source of information.

Warrior Generation 1865-1885 Richard Fulton,2020-07-09 Richard Fulton's Warrior Generation 1865-1885

fundamentally rethinks the efficacy of an institutional drive among influential middle-class opinion leaders to militarize lower-class boys in Victorian Britain. He contends that instead of engendering the desired cultural militarism, as has been commonly argued, their push had merely contributed to a fast-developing culture of adventure and masculinity. Challenging this popular assumption, Fulton carefully reexamines many of the oft cited touchstones of militaristic influence on lower-class boys, deeply assessing their actual effects on the behaviours and cultural practices of this generation. He explores a range of themes from, among others, the propagation of the military's message in school curricula (and its glorification in students' textbooks), to the military's heroic depiction and ubiquitous presence in lower-class boys' entertainment and popular media.

THE ACCIDENTAL EDUCATOR Eric Reno,2023-07-15 Eric Reno sought to write about the lives lived throughout a life.

Structuring his memoir similar to how one experiences French Impressionist paintings, nose to canvas dazzles the eye with riotous colors, but upon retreat, shapes and shadows emerge. The painting's beauty increases with changed distance and angles, generating different emotions while seeing multiple stories. In a similar experiential metaphor, his memoir tells life-defining stories and shares insights of people met, places lived, decisions made, and both tragedies and joyous experiences. Eric participated in many historical events of the latter 20th Century and the beginning of the 21st. A year after high school graduation he was an Air Force intelligence analyst in the United Kingdom monitoring Cold War events that included the building of the Berlin Wall, the Cuban Missile Crisis, the Kennedy assassination, and the beginning of the Viet Nam conflict. His three years in the UK prepared him to become the first college graduate in his family and fostered his late-in-life desire to become an educator. Famous encounters included: football player Brian Piccolo, holding the first-ever World Champion 1955 Brooklyn Dodgers in the palm of his hand, a week in awe of Maya Angelou, a semester mesmerized by novelist Harry Crews, an attitude-changing phone call with poet Judith Ortiz Cofer, a delightful afternoon encounter with Carmen McRae, a evening in the company of Dave Brubeck and family, dinner with and advice from Julian Bond, and a career-saving year of encouragement from Elizabeth Snead. Book Review: "The writing style . . is beautifully lyrical. In some places, the writing is stop-in-tracks insightful As ever, there is some truly beautiful writing in the ACCIDENTAL EDUCATOR, of genuine depth and insight Moreover, for a memoir in this form, there is great poignancy and tenderness to the writing in moments." -- Jon Curzon, The WRITING Consultancy
