Interior Design Masters Mark Hinchman, Elyssa Yoneda, 2018-06-27 *Interior Design Masters* contains 300 biographical entries of people who have significantly impacted design. They are the people, historical and contemporary, that students and practitioners should know. Coverage starts in the late Renaissance, with a focus on the twentieth and twenty-first centuries. The book has five sections, with the entries alphabetical in each, so it can serve as a history textbook and a reference guide. The seventeenth- and eighteenth-century section covers figures from Thomas Chippendale to Horace Walpole. The nineteenth-century section includes William Morris and Candace Wheeler. The early twentieth-century section presents modernism's design heroes, including Marcel Breuer, Eileen Gray, and Gilbert Rohde. The post-World War II designers range from Madeleine Castaing to Raymond Loewy. The final contemporary section includes Ron Arad and the Bouroullec brothers. These are the canonical figures who belong to any design history. The book also contains less well-known figures who deserve attention, such as Betty Joel, the British art deco furniture designer; Paul Veysseyre, the Frenchman active in China in the 1930s; and more recently Lanzavecchia-Wai, the Italian-Singaporean duo whose work ranges from health care to helicopters. Global in its coverage, the book is richly illustrated with over 600 black-and-white and color photographs.

Interior Design for Small Dwellings Sherrill Baldwin Halbe,Rose Mark,2018-12-07 Interior Design for Small Dwellings addresses the onrush of interest in smaller homes and the possibility that small dwellings might be the answer to housing needs and sustainability. The book explores key principles essential to residing and designing small interiors with emphasis on client involvement and implementation of participatory, inclusive design as advocated by the Council for Interior Design Accreditation. Does living in a small space mean living small? The authors believe that by simplifying one's life intelligently and applying certain principles of design, planning and organization, one can actually live a meaningful life in a smaller space. These tenets are based on the authors' professional experiences and living in small homes. To this end, the book provides discussion, images, case studies, interviews, worksheets, activities and suggested explorations. Reintroducing Materials for Sustainable Design Mette Bak-Andersen,2021-05-07 Reintroducing Materials for Sustainable Design provides instrumental theory and practical guidance to bring materials back into a central role in the design process and education. To create designs that are sustainable and respond to current environmental, economic and cultural concerns, practitioners and educators require a clear framework for materials use in design and product manufacturing. While much has been written about sustainable design over the last two decades, outlining systems of sustainability and product criteria, to design for material circularity requires a detailed understanding of the physical matter that constitutes products. Designers must not just know of materials but know how to manipulate them and work with them creatively. This book responds to the gap by offering a way to acquire the material knowledge necessary to design physical objects for sustainability. It reinforces the key role and responsibility of designers and encourages designers to take back control over the ideation and manufacturing process. Finally, it discusses the educational practice involved and the potential implications for design education following implementation, addressing didactics, facilities and expertise. This guide is a must-read for designers, educators and researchers engaged in sustainable product design and materials.

Designing Your Business Gordon T. Kendall,2005-04-22 Designing Your Business brings the expertise of a business and legal professional to the practice of interior design. Accordingly, the book serves as a strong reference for basic business and legal concepts. It aims to make students savvy business people as well as creative interior designers. In an accessible tone, the text explores business organisation, and legal and ethical issues that arise in the practice of interior design. Business finance and accounting are also explained by showing the necessity of adequately defining a designer's scope of

services and methods of charging. The textual explanations are augmented with chapter exercises and projects that simulate the actual, day-to-day work issues faced by interior designers. The book's hands-on approach and engaging interactive pedagogy bring relevance to the topics of law and business and show interior design students how their business decisions can facilitate their professional practices.

Human Dimension and Interior Space Julius Panero, Martin Zelnik, 2014-01-21 The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. *Human Dimension and Interior Space* is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With *Human Dimension and Interior Space*, these standards are now accessible to all designers of interior environments.
