## J. David Lewis-Williams

**Voices of the San** Willemien Le Roux, Alison White, 2004 Over the years many books have been written about the San of southern Africa, who are widely known as the Bushmen and frequently viewed as one entity. This is the first international publication in which the San of today step forward to tell their own story in their own words. Covering eight language groups in South Africa, Namibia and Botswana, young San interviewers went out into their communities and collected the thoughts and feelings, knowledge and understanding, dreams and fears, of their elders and their peers. The interviews they transcribed present the spirit of their communities and highlight the traditional differences and similarities between the groups, the shared history of suffering, and their desire and enthusiasm for life and most of all, freedom. *Voices of the San* provides a glimpse into the hundreds of broad, open-ended discussions held amongst the San themselves. It begins with the story of this book and is then divided into four chapters covering the themes they themselves identified as reflecting their current existence. All of this is richly and beautifully illustrated with over 300 photographs, contemporary artworks and drawings. The photographs are both historic and modern; including images from the Bleek and Lloyd Collection (late 19th century), the Duggan-Cronin Collection dating from the early 20th century and the Denver Expedition of 1925, as well as internationally known photographers such as Jens Bjerre (circa 1955), JÃ1/4rgen Schadeberg (1959) and Paul Weinberg (1985- ), and the San organizations within the region.

**Myth and Meaning** J. D. Lewis-Williams, 2016-07 J.D. Lewis-Williams, one of the leading South African archaeologists and ethnographers, uses ethnographic, archival, and archaeological lines of research to understand San-Bushman mythological stories. From this, he establishes a more nuanced theory of the role of myths in cultures worldwide.

**Ethics Dumping** Doris Schroeder, Julie Cook, Franois Hirsch, Solveig Fenet, Vasantha Muthuswamy, 2017-12-04 This open access book provides original, up-to-date case studies of “ethics dumping” that were largely facilitated by loopholes in the ethics governance of low and middle-income countries. It is instructive even to experienced researchers since it provides a voice to vulnerable populations from the fore mentioned countries. Ensuring the ethical conduct of North-South collaborations in research is a process fraught with difficulties. The background conditions under which such collaborations take place include extreme differentials in available income and power, as well as a past history of colonialism, while differences in culture can add a new layer of complications. In this context, up-to-date case studies of unethical conduct are

essential for research ethics training.

*San Rock Art* J.D. Lewis-Williams,2013-02-15 San rock paintings, scattered over the range of southern Africa, are considered by many to be the very earliest examples of representational art. There are as many as 15,000 known rock art sites, created over the course of thousands of years up until the nineteenth century. There are possibly just as many still awaiting discovery. Taking as his starting point the magnificent Linton panel in the Iziko-South African Museum in Cape Town, J. D. Lewis-Williams examines the artistic and cultural significance of rock art and how this art sheds light on how San image-makers conceived their world. It also details the European encounter with rock art as well as the contentious European interaction with the artists' descendants, the contemporary San people.

**San Spirituality** J. David Lewis-Williams,David G. Pearce,2004 At the intersection between western culture and Africa, we find the San people of the Kalahari desert. Once called Bushmen, the San have survived many characterizations-from pre-human animals by the early European colonials, to aboriginal conservationists in perfect harmony with nature by recent New Age adherents. Neither caricature does justice to the complex world view of the San. Eminent anthropologists David Lewis-Williams and David Pearce present a instead balanced view of the spiritual life of this much-studied people, examining the interplay of their cosmology, myth, ritual, and art.

**Stories that Float from Afar** J. David Lewis-Williams,2000 In this unique collection of folk stories, the voices of long-dead Bushmen, or San people, of southern Africa speak to us about their lives and beliefs. We are given glimpses into their thought-world. We listen to them recounting their poignant myths and beliefs.--BOOKJACKET.

**Anthropology and the Bushman** Alan Barnard,2007-04-01 'The Bushman' is a perennial but changing image. The transformation of that image is important. It symbolizes the perception of Bushman or San society, of the ideas and values of ethnographers who have worked with Bushman peoples, and those of other anthropologists who use this work. Anthropology and the Bushman covers early travellers and settlers, classic nineteenth and twentieth-century ethnographers, North American and Japanese ecological traditions, the approaches of African ethnographers, and recent work on advocacy and social development. It reveals the impact of Bushman studies on anthropology and on the public. The book highlights how Bushman or San ethnography has contributed to anthropological controversy, for example in the debates on the degree of incorporation of San society within the wider political economy, and on the validity of the case for 'indigenous rights' as a special kind of human rights. Examining the changing image of the Bushman, Barnard provides a new contribution to an established anthropology debate. The Anatomy of a South African Genocide Mohamed Adhikari,2011-09-16 In 1998 David Kruiper, the leader of the

‡Khomani San who today live in the Kalahari Desert in South Africa, lamented, “We have been made into nothing.” His comment applies equally to the fate of all the hunter-gatherer societies of the Cape Colony who were destroyed by the impact of European colonialism. Until relatively recently, the extermination of the Cape San peoples has been treated as little more than a footnote to South African narratives of colonial conquest. During the eighteenth and nineteenth centuries, Dutch-speaking pastoralists who infiltrated the Cape interior dispossessed its aboriginal inhabitants. In response to indigenous resistance, colonists formed mounted militia units known as commandos with the express purpose of destroying San bands. This ensured the virtual extinction of the Cape San peoples. In *The Anatomy of a South African Genocide*, Mohamed Adhikari examines the history of the San and persuasively presents the annihilation of Cape San society as genocide.

**The Ju/'hoan San of Nyae Nyae and Namibian Independence** Megan Biesele, Robert K. Hitchcock, 2010-11-01 The Ju/'hoan San, or Ju/'hoansi, of Namibia and Botswana are perhaps the most fully described indigenous people in all of anthropology. This is the story of how this group of former hunter-gatherers, speaking an exotic click language, formed a grassroots movement that led them to become a dynamic part of the new nation that grew from the ashes of apartheid South West Africa. While coverage of this group in the writings of Richard Lee, Lorna Marshall, Elizabeth Marshall Thomas, and films by John Marshall includes extensive information on their traditional ways of life, this book continues the story as it has unfolded since 1990. Peopled with accounts of and from contemporary Ju>/'hoan people, the book gives newly-literate Ju/'hoansi the chance to address the world with their own voices. In doing so, the images and myths of the Ju/'hoan and other San (previously called “Bushmen”) as either noble savages or helpless victims are discredited. This important book demonstrates the responsiveness of current anthropological advocacy to the aspirations of one of the best-known indigenous societies.

*The Healing Land* Rupert Isaacson, 2004-02 Brought up on stories and myths of the Kalahari Bushmen, Rupert Isaacson journeys to the dry vast grassland -- which stretches across South Africa, Botswana, and Namibia -- to find out the truth behind these childhood stories. Deep in the Kalahari, Isaacson meets the last groups of Bushmen still living the traditional way, caught between their ancient culture and the growing need to protect and reclaim their dwindling hunting grounds. Little by little he is drawn into the fascinating web of ritual and prophecy that make up the Bushman reality. He hears of shamans who turn into lions, sees leopards conjured from the landscape as though by magic. He attends trance-inducing dances and witnesses incredible healings. But he also sees the heart-wrenching social problems of a dispossessed people. What follows is an adventure of an intensity he could never have predicted. *The Healing Land* records Isaacson's personal transformation amid these extraordinary people, and his passionate contribution to their political struggle. It captures his enchantment with the character, corruption, kindness, and confusion of a place that has wrenched itself from the Stone Age into the new millennium.

**The Heart Of The Hunter** Laurens Van Der Post,2010-10-31 In this moving sequel to *The Lost World of the Kalahari* van der Post records everything he has learned of the life and lore of Africa's first inhabitants. *The Heart of the Hunter* is a journey into the mind and spirit of the Bushmen, a people outlawed by the advance of blacks and whites alike.

*Medicinal Plants and Foods* Gema Nieto,2020-11-20 Medicinal plants or medicinal herbs have been identified and used since ancient times to improve the sensory characteristics of food. The main compounds found in plants correspond to four major biochemical classes: Polyphenols, terpenes, glycosides and alkaloids. Plants synthesize these compounds for a variety of purposes, including protection of the plant against fungi and bacteria, defense against insects and attraction of pollinators and dispersal agents to favor the dispersion of seeds and pollens.

*The Bushman Winter has Come* Paul John Myburgh,2013-03-01 This is a true story of exodus, the inevitable journey of the last of the First People, as they leave the Great Sand Face and head for the modern world and cultural oblivion. Paul John Myburgh spent seven years with the 'People of the Great Sand Face', a group of /Gwikwe Bushmen in the Kalahari Desert. They were years of physical and spiritual immersion into a way of life of which only an echo remains in living memory. But all does not end there. In *The Bushman Winter Has Come*, the author imagines a continuing journey towards a place where we may, once again, know who we are in the context of our life on this earth ... towards a time when we may answer the /Gwikwe's morning greeting, Tsamkwa/tge? (Are your eyes nicely open?) with a confident Yes.

The Bushmen Megan Biesele,1978

The Bushmen of Southern Africa Andrew Brown Smith,2000 Small-scale societies like that of the Bushmen have social lessons to teach a world that is becoming increasingly homogenised. Their lifestyle needs to be understood and respected.--  
Jacket.

Way of the Bushman Bradford Keeney,Hillary Keeney,2015-05-29 The first comprehensive presentation of the core teachings of the Kalahari Bushmen as told by the Tribal Elders • Reveals how the Bushmen are able to receive direct transmissions of God's love for healing and spiritual transformation • Explores tribal legends and teaching tales, the importance of dreams and animals, and the origins of their dances, rituals, and ceremonies Step into the imaginative realm of one of the oldest continuous cultures on Earth, the Kalahari Ju/'hoansi Bushmen. Translated by Beesa Boo, a Bushman, and interspersed with detailed commentary from Bradford and Hillary Keeney, this book presents the core teachings of the Kalahari Bushmen as told by the tribal elders themselves. Decades in the making, it constitutes the first comprehensive work on the world's oldest tradition of healing and spiritual experience. Told in their own words, these teachings reveal how the Bushmen are able to receive direct transmissions of God's love in the form of the universal life force, n/om. The individuals who are filled with this force describe it as an awakened, energized feeling of love that inspires a spontaneous and heightened ecstatic awareness that opens mystical perception. Having your heart transfixed by this force enables true

healing and spiritual growth to occur. Experiencing the force in your entire being, through a vision of “God’s egg”, awakens deep spiritual wisdom and extraordinary healing gifts. Those who “own the egg” are blessed with the ability to have direct communication with the Divine, a “rope to God,” and can communicate with others for all “ropes” are connected. Conveying the deep love that is the dominant emotion of Bushman spirituality, the book explores tribal legends and teaching tales, the importance of dreams and encounters with animals, the origins of their dances, such as the giraffe dance, and specific rituals and ceremonies, including puberty rites for boys and girls. “As the elder teachers of the Ju’/hoan Bushman (San) people, we hold the most enduring traditional wisdom concerning healing and spiritual experience. This book is a testimony of our ecstatic ways. We happily share our basic teachings about spirituality and healing with those whose hearts are sincerely open.”

Drawdown Paul Hawken, 2018-02-22 NEW YORK TIMES BESTSELLER For the first time ever, an international coalition of leading researchers, scientists and policymakers has come together to offer a set of realistic and bold solutions to climate change. All of the techniques described here - some well-known, some you may have never heard of - are economically viable, and communities throughout the world are already enacting them. From revolutionizing how we produce and consume food to educating girls in lower-income countries, these are all solutions which, if deployed collectively on a global scale over the next thirty years, could not just slow the earth's warming, but reach drawdown: the point when greenhouse gasses in the atmosphere peak and begin to decline. So what are we waiting for?

Africa Tom Phillips, 1999 This magnificent celebration of the world's oldest and most diverse artistic traditions is considered the definitive book on African art. Ranging from the oldest known human artifact, circa 1.6 million BC, to pieces made within living memory, the objects collected in this extraordinary volume reflect a continent of enormous cultural and historical scope. Arranged chronologically within seven geographical sections, it offers an astonishing array of sculptures in wood, bronze, stone, and gold, as well as rock paintings, ceremonial pieces, ceramics, jewelry, and textiles culled from private and public collections around the world. Commentary by renowned scholars illuminates the cultural and historical significance of these pieces, and in-depth authoritative texts highlight critical aspects of each region. Together these words and images take readers on an artistic grand tour through a continent of unparalleled diversity, and towards the thrilling discovery of not one Africa, but many.

**Toxicology in Antiquity**, 2018-10-22 Toxicology in Antiquity provides an authoritative and fascinating exploration into the use of toxins and poisons in antiquity. It brings together the two previously published shorter volumes on the topic, as well as adding considerable new information. Part of the History of Toxicology and Environmental Health series, it covers key accomplishments, scientists, and events in the broad field of toxicology, including environmental health and chemical safety. This first volume sets the tone for the series and starts at the very beginning, historically speaking, with a look at toxicology

in ancient times. The book explains that before scientific research methods were developed, toxicology thrived as a very practical discipline. People living in ancient civilizations readily learned to distinguish safe substances from hazardous ones, how to avoid these hazardous substances, and how to use them to inflict harm on enemies. It also describes scholars who compiled compendia of toxic agents. New chapters in this edition focus chiefly on evidence for the use of toxic agents derived from religious texts. - Provides the historical background for understanding modern toxicology - Illustrates the ways previous civilizations learned to distinguish safe from hazardous substances, how to avoid the hazardous substances and how to use them against enemies - Explores the way famous historical figures used toxins - New chapters focus on evidence of the use of toxins derived from religious texts
