Reading for Storyness Susan Lohafer, 2020-03-03 The short story has been a staple of American literature since the nineteenth century, taught in virtually every high school and consistently popular among adult readers. But what makes a short story unique? In *Reading for Storyness*, Susan Lohafer, former president of the Society for the Study of the Short Story, argues that there is much more than length separating short stories from novels and other works of fiction. With its close readings of stories by Kate Chopin, Julio Cortázar, Katherine Mansfield, and others, this book challenges assumptions about the short story and effectively redefines the genre in a fresh and original way. In her analysis, Lohafer combines traditional literary theory with a more unconventional mode of research, monitoring the reactions of readers as they progress through a story—to establish a new poetics of the genre. Singling out the phenomenon of imminent closure as the genre's defining trait, she then proceeds to identify preclosure points, or places where a given story could end, in order to access hidden layers of the reading experience. She expertly harnesses this theory of preclosure to explore interactions between pedagogy and theory, formalism and cultural studies, fiction and nonfiction. Returning to the roots of storyness, Lohafer illuminates the intricacies of classic short stories and experimental forms of surreal, postmodern, and minimalist fiction. She also discusses the impact of social constructions, such as gender, on the identification of preclosure points by individual readers. *Reading for Storyness* combines cognitive science with literary theory to present a compelling argument for the uniqueness of the short story.

Alcoholism and Drug Dependence J. Madden,2012-12-06 It is for me, as President of the Merseyside Lancashire & Cheshire Council on Alcoholism, a signal privilege to write a brief foreword to these Proceedings of the Third International Conference on Alcoholism and Drug Dependence. During the week experts, from the world over, in all those disciplines which have a contribution to make to the solution of the problems of alcoholism and drug dependence, surveyed recent advances in our knowledge of the aetiology, epidemiology, early recognition, management, and the social and industrial implications of these twin scourges of the contemporary scene. The discussions were most helpful and enlightening even when a wide spectrum of conflicting views and experiences were revealed. The justification for adding yet another volume to the growing literature in this field is two-fold; first, that those taking part in the conference can study at leisure and in depth the transactions of the conference; and secondly, that those who were unable to attend might benefit from the most recent views of international experts in the diverse facets of one of the major current problems in world health. Exploring Social Sustainability and Economic Practices ,2020 Given the three pillars of sustainability, besides the environment, the interplay of social and economic dimensions provides valuable insight into how society is molded and the key components that should be considere. In terms of social sustainability, processes and framework objectives promote the wellbeing that is integral to the balance of people, planet, and profit. Economic practices consider the system of production, resource allocation, and distribution of goods and services with respect to demand and supply between economic agents. As a result, an economic system is a variant of the social system in which it exists. At present, the forefront of social sustainability research partially encompasses the impact of economic practices on people and society, with notable emphasis centered on the urban environment. Specific interdisciplinary analyses within the scope of sustainability, social development, competitiveness, and motivational management, as well as decision making within the urban landscape, are considered. This

book contains nine thoroughly refereed contributions that interconnect detailed research into the two pillars reviewed.

Windows on Mathematical Meanings Richard Noss, Celia Hoyles, 2012-12-06 This book challenges some of the conventional wisdoms on the learning of mathematics. The authors use the computer as a window onto mathematical meaning-making. The pivot of their theory is the idea of webbing, which explains how someone struggling with a new mathematical idea can draw on supportive knowledge, and reconciles the individual's role in mathematical learning with the part played by epistemological, social and cultural forces.

Reading-Writing Connections Mary F. Heller, 1999-04 Reading-Writing Connections: From Theory to Practice is an extraordinary language arts methods text that enables elementary and middle school teachers to create classroom environments where all students can become lifelong readers and writers. Focusing on developmentally appropriate methods and materials, this remarkably readable book empowers a new generation of teachers to integrate reading, writing, listening, and speaking in K-8 classrooms. Heller's highly accessible writing style makes this book suitable as a primary text for undergraduate and graduate courses in language arts, reading, writing, and literacy.
