Commercial Aircraft Propulsion and Energy Systems Research National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Committee on Propulsion and Energy Systems to Reduce Commercial Aviation Carbon Emissions, 2016-08-09 The primary human activities that release carbon dioxide (CO₂) into the atmosphere are the combustion of fossil fuels (coal, natural gas, and oil) to generate electricity, the provision of energy for transportation, and as a consequence of some industrial processes. Although aviation CO₂ emissions only make up approximately 2.0 to 2.5 percent of total global annual CO₂ emissions, research to reduce CO₂ emissions is urgent because (1) such reductions may be legislated even as commercial air travel grows, (2) because it takes new technology a long time to propagate into and through the aviation fleet, and (3) because of the ongoing impact of global CO₂ emissions. Commercial Aircraft Propulsion and Energy Systems Research develops a national research agenda for reducing CO₂ emissions from commercial aviation. This report focuses on propulsion and energy technologies for reducing carbon emissions from large, commercial aircraft—single-aisle and twin-aisle aircraft that carry 100 or more passengers—because such aircraft account for more than 90 percent of global emissions from commercial aircraft. Moreover, while smaller aircraft also emit CO₂, they make only a minor contribution to global emissions, and many technologies that reduce CO₂ emissions for large aircraft also apply to smaller aircraft. As commercial aviation continues to grow in terms of revenue-passenger miles and cargo ton miles, CO₂ emissions are expected to increase. To reduce the contribution of aviation to climate change, it is essential to improve the effectiveness of ongoing efforts to reduce emissions and initiate research into new approaches.

Maritime Informatics Mikael Lind, Michalis Michaelides, Robert Ward, Richard T. Watson, 2020-11-14 This first book on

Maritime Informatics describes the potential for Maritime Informatics to enhance the shipping industry. It examines how decision making in the industry can be improved by digital technology, and introduces the technology required to make Maritime Informatics a distinct and valuable discipline. Based on participating in EU funded research over the last six years to improve the shipping industry, the editors stipulate that there is a need for the new discipline of Maritime Informatics, which studies the application of information systems to increasing the efficiency, safety, and ecological sustainability of the world's shipping industry. This book examines competition and collaboration between shipping companies, and also companies who serve shipping needs, such as ports and terminals. Practical examples from leading experts give the reader real world examples for better understanding.

We Who Proudly Served Peter Francis Kenny,2015-05-27 Although Australia is only a young country in comparison to other nations, it can hold its head up high and proudly proclaim that it is one of the giants in this world of toil and trouble in which we live. When the odds are stacked against Australians, they dont turn and run; instead, they stand and fight and overcome the obstacles that face them. The contents of this volume are a tribute to all the men and women of this proud and great country, who have come from all walks of life to give of their time, and unfortunately, some have even given their lives, to defend this great land and keep it free. There have been politicians, doctors, nurses, police officers, average everyday citizens, musicians, actors, artists, farmers, graziers, authors, sportsmen and women, journalists, and a host of others who have taken up the cause for their country and the monarchy, serving from the Crimean to the war in Vietnam and beyond. Their heroic deeds and their many sacrifices have ensured that todays generation can rest easier, proud in the knowledge that these servicemen and women have paved the way for our freedom. Now they come together once again as one big family to shed an insight on their achievements so that you can fully understand and appreciate what they have and had experienced. I dedicate this work to the memory of all those who have made the supreme sacrifice in order that we may live in peace and prosperity and also to the families of those who did not return. The book is not a glorification of war but a glorification of the individual and his or her actions and deeds.

Oral Tradition and Book Culture Pertti Anttonen,Cecilia af Forselles,Kirsti Salmi-Niklander,2018 Traditionally, oral traditions were considered to diffuse only orally, outside the influence of literature and other printed media. Eventually, more attention was given to interaction between literacy and orality, but it is only recently that oral tradition has come to be seen as a modern construct both conceptually and in terms of accessibility. Oral traditions cannot be studied independently from the culture of writing and reading. Lately, a new interdisciplinary interest has risen to study interconnections between oral tradition and book culture. In addition to the use and dissemination of printed books, newspapers etc., book culture denotes manuscript media and the circulation of written documents of oral tradition in and through the archive, into published

collections. Book culture also intertwines the process of framing and defining oral genres with literary interests and ideologies. In addition to writing and reading, the study of oral traditions must also take into consideration the culture of publishing. The present volume highlights varied and selected aspects of the expanding field of research into oral tradition and book culture. The questions discussed include the following: How have printing and book publishing set terms for oral tradition scholarship? How have the practices of reading affected the circulation of oral traditions? Which books and publishing projects have played a key role in this and how? How have the written representations of oral traditions, as well as the roles of editors and publishers, introduced authorship to materials customarily regarded as anonymous and collective? The editors represent some of the key institutions in the study of oral traditions in Finland: the University of Helsinki, the Finnish Literature Society, and the University of Eastern Finland. The authors are folklorists, anthropologists, historians and literary historians, and scholars in information studies from Finland, Sweden, Norway, Ireland, and the United States.
