Fox and McDonald's Introduction to Fluid Mechanics John W. Mitchell, Robert W. Fox, Alan T. McDonald, 2020-01-23

This text is written for an introductory course in fluid mechanics. Our approach to the subject emphasizes the physical concepts of fluid mechanics and methods of analysis that begin from basic principles. One primary objective of this text is to help users develop an orderly approach to problem solving. Thus, we always start from governing equations, state assumptions clearly, and try to relate mathematical results to corresponding physical behavior. We emphasize the use of control volumes to maintain a practical problem-solving approach that is also theoretically inclusive

The Art of Network Architecture Russ White, Denise Donohue, 2014-04-02 The Art of Network Architecture Business-Driven Design The business-centered, business-driven guide to architecting and evolving networks The Art of Network Architecture is the first book that places business needs and capabilities at the center of the process of architecting and evolving networks. Two leading enterprise network architects help you craft solutions that are fully aligned with business strategy, smoothly accommodate change, and maximize future flexibility. Russ White and Denise Donohue guide network designers in asking and answering the crucial questions that lead to elegant, high-value solutions. Carefully blending business and technical concerns, they show how to optimize all network interactions involving flow, time, and people. The authors review important links between business requirements and network design, helping you capture the information you need to design effectively. They introduce today's most useful models and frameworks, fully addressing modularity, resilience, security, and management. Next, they drill down into network structure and topology, covering virtualization, overlays, modern routing choices, and highly complex network environments. In the final section, the authors integrate all these ideas to consider four realistic design challenges: user mobility, cloud services, Software Defined Networking (SDN), and today's radically new data center environments.

- Understand how your choices of technologies and design paradigms will impact your business
- Customize designs to improve workflows, support BYOD, and ensure business continuity
- Use modularity, simplicity, and network management to prepare for rapid change
- Build resilience by addressing human factors and redundancy
- Design for security, hardening networks without making them brittle
- Minimize network management pain, and maximize gain
- Compare topologies and their tradeoffs
- Consider the implications of network virtualization, and walk through an MPLS-based L3VPN example
- Choose routing protocols in the context of business and IT requirements

Maximize mobility via ILNP, LISP, Mobile IP, host routing, MANET, and/or DDNS • Learn about the challenges of removing and changing services hosted in cloud environments • Understand the opportunities and risks presented by SDNs • Effectively design data center control planes and topologies

Product Design and Development Karl T. Ulrich, Steven D. Eppinger, 2004 This text presents a set of product development techniques aimed at bringing together the marketing, design, and manufacturing functions of the enterprise. The integrative methods facilitate problem-solving and decision-making.

BIG Ideas to BIG Results Robert H. Miles, Michael T. Kanazawa, 2015-12-15 A PROVEN, NO-NONSENSE, STEP-BY-STEP, RESULTS-DRIVEN APPROACH TO DRIVING CORPORATE TRANSFORMATION AND BREAKTHROUGH PERFORMANCE IN A DISRUPTIVE WORLD Why do most corporate transformation leaders fail to achieve breakthrough performance? They make things too complex. They clutter it with jargon and confusion. They pancake new initiatives on top of old ones. They dither on the launch pad. They chase too many fads. And they fail to make it “safe” for leaders to lead the transformation at their own level. In short, they don’t have a reliable corporate transformation game plan. Whatever your corporate transformation challenge, whatever your role, Robert H. Miles and Michael T. Kanazawa introduce a simple, proven, results-driven approach that has underpinned some of the most successful corporate transformations of our time. Drawing on their experience as principal process architects working with dozens of CEOs and executive teams, and hundreds of senior executives and staff professionals, they show you how to develop a compelling and potent corporate transformation game plan that enables you to align your organization behind just a few core initiatives; bias your people toward speed; create leaders at every level; integrate in new “disruptive” tools to accelerate progress; and achieve traction and accountability in all phases of execution. Whether you’re a new CEO taking charge to transform your company, an executive redirecting a major business or function, or one of the hundreds of managers and thousands of employees trying to make sense of a transformation and contribute to it, this book will help you decipher the complexity, find your place on the transformation roadmap, and ensure that the effort rapidly reaches its intended breakthrough results. A PROVEN, STEP-BY-STEP ROADMAP FOR TRANSFORMATION LEADERS — FAST, SIMPLE, AND COMPRESSED Corporate transformation and breakthrough performance without the confusion and complexity GEARED TO RAPIDLY ENGAGE THE FULL ORGANIZATION To equip leaders at all levels to lead your transformation in an aligned and engaging manner FOCUSES EVERYONE ON “DOING MORE ON LESS” Generates focused execution and avoid layering initiative upon initiative to conquer organizational gridlock DESIGNED TO “DISRUPT” HOW TRADITIONAL TRANSFORMATION PROGRAMS ARE DONE Introduces disruptive transformation competencies that drive innovation, growth, and a new way of activating change Corporate transformation is tough work, but extraordinarily rewarding for all involved when led successfully. Somebody’s got to do it, and do it well. What if that someone happens to be you? Where will you start? How will you frame your

transformation game plan and lay out its roadmap? What will you do first, and who will you engage when in the enterprise? How will you keep it alive after the early excitement? And how will you make it part of your management process so that it can become a reliable core competency for rising to the increasing rate of disruptive transformation challenges facing your company? Now there's a breakthrough methodology to enable CEOs and executive leaders to rise to these corporate transformation challenges.

88 Instruments Chris Barton, 2016-08-16 The rhythmic, onomatopoeic text dances across exuberant watercolors with lots of movement. This celebration of a child's agency in choosing a means of artistic expression strikes just the right note. -- Kirkus A delightful offering for reading aloud, especially during music-themed storytimes. --School Library Journal From New York Times bestselling author Chris Barton and new illustrator Louis Thomas comes a fun, rhythmic picture book about finding the music that is perfect for you! A boy who loves to make noise gets to pick only one instrument (at his parents urging) in a music store, but there is too much to choose from! There's triangles and sousaphones! There's guitars and harpsichords! Bagpipes and cellos and trombones! How can he find the one that is just right for him out of all those options?

Weather on the Air Robert Henson, 2013-01-05 From low humor to high drama, TV weather reporting has encompassed an enormous range of styles and approaches, triggering chuckles, infuriating the masses, and at times even saving lives. In *Weather on the Air*, meteorologist and science journalist Robert Henson covers it all—the people, technology, science, and show business that combine to deliver the weather to the public each day. Featuring the long-term drive to professionalize weathercasting; the complex relations between government and private forecasters; and the effects of climate-change

science and the Internet on today's broadcasts. With dozens of photos and anecdotes illuminating the many forces that have shaped weather broadcasts over the years, this engaging study will be an invaluable tool for students of broadcast meteorology and mass communication and an entertaining read for anyone fascinated by the public face of weather.

Temples of Sound William Clark, Jim Cogan, 2003 All great music has a birthplace. *Temples of Sound* tells the stories of the legendary studios where musical genius and a magical space came together to capture some of the most exciting jazz, pop, funk, soul, and country records ever made. From the celebrated Southern studios of Sun and Stax, to the John Coltrane/Miles Davis sessions in producer Rudy Van Gelders living room, to Frank Sinatra's swinging cuts at state-of-the-art Capitol Records, each of the 15 profiles in this book brings great music to life at the moment of its creation. With a trove of never-before-seen photographs and fascinating, all-new interviews with the musicians and producers who made the records, *Temples of Sound* is a rich inspiration for music fans.

The Social and Economic Impact of Covid-19: Rapid Transformation of the 21st Century Society Marcel Mečiar, Hamza Şimşek, 2021-05-05 The contributions in this book demonstrate that the Covid-19 pandemic has led to negative socioeconomic impacts, put a tremendous strain on social institutions in many countries, and changed the lives of people around the world. Society, economy, business companies, management structures of companies, consumption habits of society, education, and health sector have been significantly affected by the Covid-19 pandemic. Some of these effects are thought to be permanent even after the pandemic subsides. It is obvious that the process of digitization will continue in making a consumer's life more comfortable and safer. Some researchers estimate that approximately 60 percent of companies plan to let their employees continue working remotely from home offices in the post-pandemic period. Many experts emphasize that online shopping, which increased rapidly during the pandemic period, will continue to dominate after the pandemic. Therefore, the social effects of the Covid-19 pandemic will be the subject of many academic studies today and in the future.

Detroit: I Do Mind Dying Marvin Surkin, Dan Georgakas, 2022-02-17 *Detroit: I Do Mind Dying* tracks the extraordinary development of the Dodge Revolutionary Union Movement and the League of Revolutionary Black Workers as they became two of the landmark political organizations of the 1960s and 1970s. It is widely heralded as one of the most important books on the black liberation movement. Marvin Surkin received his PhD in political science from New York University and is a specialist in comparative urban politics and social change. He worked at the center of the League of Revolutionary Black Workers in Detroit. Dan Georgakas is a writer, historian, and activist with a long-time interest in social movements. He is the author of *My Detroit, Growing up Greek and American in Motor City*.

Ubiquitous Computing Stefan Poslad,2009-03-30 This book provides an introduction to the complex field of ubiquitous computing Ubiquitous Computing (also commonly referred to as Pervasive Computing) describes the ways in which current technological models, based upon three base designs: smart (mobile, wireless, service) devices, smart environments (of embedded system devices) and smart interaction (between devices), relate to and support a computing vision for a greater range of computer devices, used in a greater range of (human, ICT and physical) environments and activities. The author details the rich potential of ubiquitous computing, the challenges involved in making it a reality, and the prerequisite technological infrastructure. Additionally, the book discusses the application and convergence of several current major and future computing trends. Key Features: Provides an introduction to the complex field of ubiquitous computing Describes how current technology models based upon six different technology form factors which have varying degrees of mobility wireless connectivity and service volatility: tabs, pads, boards, dust, skins and clay, enable the vision of ubiquitous computing Describes and explores how the three core designs (smart devices, environments and interaction) based upon current technology models can be applied to, and can evolve to, support a vision of ubiquitous computing and computing for the future Covers the principles of the following current technology models, including mobile wireless networks, service-oriented computing, human computer interaction, artificial intelligence, context-awareness, autonomous systems, micro-electromechanical systems, sensors, embedded controllers and robots Covers a range of interactions, between two or more UbiCom devices, between devices and people (HCI), between devices and the physical world. Includes an accompanying website with PowerPoint slides, problems and solutions, exercises, bibliography and further reading Graduate students in computer science, electrical engineering and telecommunications courses will find this a fascinating and useful introduction to the subject. It will also be of interest to ICT professionals, software and network developers and others interested in future trends and models of computing and interaction over the next decades.
