El misterio del acueducto de Segovia Dominica Contreras López de Ayala, 2023-11-15 El Acueducto de Segovia es una de las obras de ingeniería civil romana más importantes y espectaculares que se conservan. Pese a ello, ha mantenido hasta ahora un poético misterio, tanto en torno a su fecha de construcción como respecto al nombre de su arquitecto e incluso bajo qué emperador se inició la magna obra. Este libro parte de un análisis epigráfico de las escasas inscripciones sobre el monumento de las que se tiene noticia, continúa con el apoyo del análisis estilístico de las formas del propio Acueducto y un estudio comparativo con otras construcciones de diversas épocas romanas para concluir ofreciendo posibles respuestas a los principales interrogantes planteados. Por todo ello, creemos marcar un hito, un antes y un después en la Historia del Arte Romano en España, poniendo a disposición del público esta obra, escrita en un lenguaje poético y casi coloquial, con expresivas ilustraciones, que acercará al lector medio al sempiterno problema de la datación del Acueducto de Segovia y a su propuesta de solución, dejándole en libertad para formarse su propio criterio a través de los datos existentes.

SUCEDIÓ EN SEGOVIA MAGDA R. MARTÍN, 2013-09-28 ¿Existe la reencarnación? Nadie lo sabe. En esta novela los protagonistas viven sucesos inexplicables que les enfrentan a este dilema. Son las mismas almas pero con diferentes personalidades. Seres que se encuentran vida tras vida para poner punto final a hechos que han quedado pendientes. Segovia es la ciudad mágica que sirve de marco a estos hechos.

Los Moreno Eduardo Segovia, Teresa Zaragoza, 2005 La obra constituye lo que Los Moreno, padre e hijo, llamaron el Archivo Español de Arte, una de las colecciones fotográficas más importantes sobre esta temática. Entre las imágenes incluidas en el libro destacan las que documentan los efectos de la Guerra Civil en el patrimonio madrileño, no sólo en su destrucción, sino, en algunos casos, en las medidas que se tomaron para su protección e, incluso, de varios proyectos para su reconstrucción.

Urbanisation in Roman Spain and Portugal Pieter Houten,2021 The principal aims of *Urbanisation in Roman Spain and Portugal: Civitates Hispaniae in the Early Empire* are to provide a comprehensive reconstruction of the urban systems of the Iberian Peninsula during the Early Empire and to explain why these systems looked the way they did. While some chapters focus on settlements that were cities or towns from a juridical point of view, the implications of using a purely functional definition of towns are also explored. Key themes include continuities and discontinuities between pre-Roman and Roman settlement patterns, the geographical distribution of cities belonging to various size brackets, economic relationships between self-governing cities and their territories and the role of cities as nodes in road systems and maritime networks. In addition, it is argued that a considerable number of self-governing communities in Roman Spain and Portugal were poly-centric rather than based on a single urban centre. The volume will be of interest to anyone working on Roman urbanism as well as those interested in the Iberian Peninsula in the Roman period.

The Pencil of Nature William Henry Fox Talbot,2022-09-16 William Henry Fox Talbot's 'The Pencil of Nature' is a groundbreaking work in the history of photography, being one of the first books to contain photographic images. Published in 1844, the book consists of a series of plates capturing landscapes, architectural views, and still life compositions. Talbot's literary style is concise and informative, providing detailed descriptions of the images and the technical processes used to create them. As a pioneer in the field of photography, Talbot's book marks a significant shift in the way images were reproduced and distributed in the 19th century. It opened up new possibilities for artistic expression and documentation. Talbot's meticulous attention to detail and innovative approach to image-making set 'The Pencil of Nature' apart from other publications of its time. William Henry Fox Talbot, a British scientist and inventor, was driven by a passion for exploring the potential of photography as a means of visual representation. His background in the sciences and his interest in optics and chemistry contributed to his groundbreaking experiments in photography. Talbot's desire to create a more permanent and reproducible form of image-making led him to invent the calotype process, which revolutionized the field of photography. His expertise in both the scientific and artistic realms allowed him to push the boundaries of visual communication. I highly recommend 'The Pencil of Nature' to anyone interested in the history of photography, the intersection of art and science, and the evolution of visual culture. Talbot's groundbreaking work offers valuable insights into the development of photography as both a technological innovation and an artistic medium. This book is a must-read for scholars and enthusiasts alike who wish to deepen their understanding of the transformative power of the photographic image.

Vivir viajando Diego Varela, 2020-06-30 Mi pasión por viajar y buscar nuevas historias, aprendizajes y horizontes están expresadas en este libro donde transmito desde mi punto de vista las enseñanzas y aventuras que fui teniendo durante mi vida. Mis memorias van desde que era muy chico hasta el año pasado, viajes en donde fui con el colegio, solo, con amigos, con pareja y con hijos, dando tonalidades y matices a cada una de las historias.

Sylvie and Bruno Lewis Carroll, 1889 First published in 1889, this novel has two main plots; one set in the real world at the time the book was published (the Victorian era), the other in the fictional world of Fairyland.

Burning with Desire Geoffrey Batchen, 1999-03-15 In an 1828 letter to his partner, Nicéphore Niépce, Louis Daguerre wrote, I am burning with desire to see your experiments from nature. In this book, Geoffrey Batchen analyzes the desire to photograph as it emerged within the philosophical and scientific milieus that preceded the actual invention of photography. Recent accounts of photography's identity tend to divide between the postmodern view that all identity is determined by context and a formalist effort to define the fundamental characteristics of photography as a medium. Batchen critiques both approaches by way of a detailed discussion of photography's conception in the late eighteenth and early nineteenth centuries. He examines the output of the various nominees for first photographer, then incorporates this information into a mode of historical criticism informed by the work of Michel Foucault and Jacques Derrida. The result is a way of thinking about photography that persuasively accords with the medium's undeniable conceptual, political, and historical complexity.
