The Comfort Book Matt Haig, 2021-07-06 THE INSTANT NUMBER ONE SUNDAY TIMES BESTSELLER 'Profound, witty and uplifting' Observer 'Full of eloquent, cogent and positive reminders of the beauty of life' Independent The Comfort Book is a collection of consolations learned in hard times and suggestions for making the bad days better. Drawing on maxims, memoir and the inspirational lives of others, these meditations offer new ways of seeing ourselves and the world. This is the book to pick up when you need the wisdom of a friend, the comfort of a hug or a reminder that hope comes from unexpected places.

Wallenstein's Tod / Death of Wallenstein Friedrich Schiller, Samuel Taylor Coleridge, 1816 This is the third and final part of the Wallenstein trilogy by German playwright and mastermind Friedrich Schiller. The work as a whole produced a profound impression, and it is certainly Schiller's masterpiece in dramatic literature. He brings out with extraordinary vividness the ascendancy of Wallenstein over the wild troops whom he has gathered around him, and at the same time we are made to see how the mighty general's schemes must necessarily end in ruin, not merely because a plot against him is skilfully prepared by vigilant enemies, but because he himself is lulled into a sense of security by superstitious belief in his supposed destiny as revealed to him by the stars. Wallenstein is the most subtle and complex of Schiller's dramatic conceptions, and it taxes the powers of the greatest actors to present an adequate rendering of the motives which explain his strange and dark

career. The love-story of Max Piccolomini and Thekla is in its own way not less impressive than the story of Wallenstein with which it is interwoven. This is the bilingual edition of this literary masterpiece including the English and German versions of the play.

The Colour of Milk Nell Leyshon, 2012-05-31 The Colour of Milk is the new novel by Orange longlisted author and playwright Nell Leyshon. 'this is my book and i am writing it by my own hand' The year is eighteen hundred and thirty one when fifteen-year-old Mary begins the difficult task of telling her story. A scrap of a thing with a sharp tongue and hair the colour of milk, Mary leads a harsh life working on her father's farm alongside her three sisters. In the summer she is sent to work for the local vicar's invalid wife, where the reasons why she must record the truth of what happens to her - and the need to record it so urgently - are gradually revealed. 'Haunting, distinctive voices... Mary's spare simple words paint brilliant pictures in the reader's mind . . . Nell Leyshon's imaginative powers are considerable' Independent 'Brontë-esque undertones . . . a disturbing statement on the social constraints faced by 19th-century women' FT 'A small tour de force - a wonderfully convincing voice, and a devastating story told with great skill and economy' Penelope Lively 'I loved it. The Colour of Milk is charming, Brontë-esque, compelling, special and hard to forget. I loved Mary's voice - so inspiring and likeable. Such a hopeful book' Marian Keyes 'Brilliant, devastating and unforgettable' Easy Living Nell Leyshon's first novel, Black Dirt, was longlisted for the Orange Prize, and shortlisted for the Commonwealth prize. Her plays include Comfort me with Apples, which won an Evening Standard Award, and Bedlam, which was the first play written by a woman for Shakespeare's Globe. She writes for BBC Radio 3 and 4, and won the Richard Imison Award for her first radio play. Nell was born in Glastonbury and lives in Dorset.

The Marshmallow Test Walter Mischel, 2014-09-25 'A brilliant book' Daniel Kahneman, author of Thinking, Fast and Slow 'A book that can show you how to change your behaviour' Evening Standard A child is presented with a marshmallow and given a choice: Eat this one now, or wait and enjoy two later. What will she choose? And what does her decision say about the person she'll become? Walter Mischel's now iconic 'marshmallow test,' one of the most famous experiments in the history of psychology, proved that the ability to delay gratification is critical to living a successful and fulfilling life: self-control not only predicts higher marks in school, better social and cognitive functioning, and a greater sense of self-worth; it also helps us manage stress, pursue goals more effectively, and cope with painful emotions. But is willpower prewired, or can it be taught? In his groundbreaking new book, Dr. Mischel draws on decades of compelling research and life examples to explore the nature of willpower, identifying the cognitive skills and mental mechanisms that enable it and showing how these can be applied to challenges in everyday life--from weight control to quitting smoking, overcoming heartbreak, making major decisions, and planning for retirement. With profound implications for the choices we make in parenting, education, public

policy and self-care, The Marshmallow Test will change the way we think about who we are and what we can be. And since, as Mischel argues, a life with too much self-control can be as unfulfilling as one with too little, this book will also teach you when it's time to ring the bell and enjoy that marshmallow. What readers are saying: ***** 'Accessible read that is both fascinating and has the potential to help change the way we approach self-control.' ***** 'Fascinating, empowering, a brilliant aid to taking ownership of your life.' ***** 'Encourages the reader that they have the power to change . . . thought-provoking.'

Systemic Interventions Arist von Schlippe,Jochen Schweitzer,2015-02-18 Systemic thinking has opened up further areas of specialization from one-on-one and couples therapy to clinical supervision and organizational development.Systemic intervention sees a problem as an incident involving a number of different, interacting individuals. In this sense, conflict, problems and occurrences are viewed and treated within the social context. This comprehensive introduction contains many examples and detailed suggestions for a practical approach to directed conversation.

Spectra of Transformation Benjamin Jörissen,Lisa Unterberg,Leopold Klepacki,Juliane Engel,Victoria Flasche,Tanja Klepacki,2018 Like every pedagogical field, the fields of aesthetics, arts and cultural education have been confronted with various transformational dynamics in recent decades. Transformation processes such as globalization, digitization or transculturalization not only characterize a change in social and cultural framework conditions, but also lead to changes in self-understanding, working methods, contents, and objectives in the research of these educational fields. The anthology *Spectra of Transformation* gathers a variety of perspectives on the question of the research on aesthetics, artistic and cultural education, which were discussed by international participants and speakers at the Winter School 2017 in Nuremberg.

Master Flea E. T. A. Hoffmann,2023-06-08 Ernst Theodor Amadeus Hoffmann was a contemporary of Ludwig von Beethoven: a composer himself, a music critic, and a late-German-Romantic-movement writer of novels and numerous short stories. His incisive wit and poetic imagery allow the reader to peer into the foibles of society and the follies of human psychology. (In fact, Hoffmann's wit may have gotten him into a bit of legal trouble, as parts of *Master Flea* were censored and had to be reworked when authorities disliked certain satirical criticisms of contemporary dealings of the court system.) Join gentleman bachelor Peregrine Tyss as his life as a recluse takes a twist, when he gains an epic advantage of tiny proportions. Part proto-science-fiction and part Romantic fantasy, *Master Flea* follows the fate of a mysterious, captivating princess at the intersection of numerous suitors, human and insect. Like a lesson from a fable or a tale of classical mythology, Hoffmann's fairy-tale allegory shows how seeking forbidden knowledge can poison the soul, and how following the heart can

heal it.

Tender Violence Laura Wexler, 2000 Examines the work of such female photojournalists as Alice Austen, Jessie Tarbox Beals, and Frances Benjamin Johnston, arguing that they produced images that helped to reinforce the imperialistic ideals that were forming at the beginning of the 20th century.

Knowing What Students Know National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Testing and Assessment, Committee on the Foundations of Assessment, 2001-10-27 Education is a hot topic. From the stage of presidential debates to tonight's dinner table, it is an issue that most Americans are deeply concerned about. While there are many strategies for improving the educational process, we need a way to find out what works and what doesn't work as well. Educational assessment seeks to determine just how well students are learning and is an integral part of our quest for improved education. The nation is pinning greater expectations on educational assessment than ever before. We look to these assessment tools when documenting whether students and institutions are truly meeting education goals. But we must stop and ask a crucial question: What kind of assessment is most effective? At a time when traditional testing is subject to increasing criticism, research suggests that new, exciting approaches to assessment may be on the horizon. Advances in the sciences of how people learn and how to measure such learning offer the hope of developing new kinds of assessments—assessments that help students succeed in school by making as clear as possible the nature of their accomplishments and the progress of their learning. Knowing What Students Know essentially explains how expanding knowledge in the scientific fields of human learning and educational measurement can form the foundations of an improved approach to assessment. These advances suggest ways that the targets of assessment—what students know and how well they know it—as well as the methods used to make inferences about student learning can be made more valid and instructionally useful. Principles for designing and using these new kinds of assessments are presented, and examples are used to illustrate the principles. Implications for policy, practice, and research are also explored. With the promise of a productive research-based approach to assessment of student learning, Knowing What Students Know will be important to education administrators, assessment designers, teachers and teacher educators, and education advocates.

Efraim's Book Alfred Andersch, 1994 Efraim's Book is the sophisticated, offbeat novel about the peculiar society of post-World-II Berlin. Its hero George Efraim is a Jewish reporter who has fought for the British on the Italian front and lost both parents to Auschwitz. He returns home to Berlin in 1962 for the first time since the war to investigate the wartime disappearance of his editor's daughter, only to begin writing a novel, which helps him to embark on a certain arrangement of signs with the help of which I hope to chart my position. Like the great German novels of Günter Grass and Heinrich Böll, Alfred Andersch's Efraim's Book grapples with the legacy of World War II and the Holocaust in all its horror and sad humanity. A troubling yet often humorous book, it offers a poignant account of the traumatized German state.

Copse 125 Ernst Jünger,2021-02-19 Originally published in 1924, Copse 125 (Das Wäldchen 125) is Ernst Jünger's third book, where he further recounts his experiences in one particularly treacherous stretch of the Western Front. In Copes 125, Jünger chronicles the deadlocked positions of battle located in an isolated little patch of wood during the last year of the war. Along with his later recollections of the event, Jünger also shares his ruminations concerning the material and spiritual implications of the front line warrior. This is a new English translation of Das Wäldchen 125, published by E.S. Mittler & Son, Berlin, Germany, 1925.

America and the Armenian Genocide of 1915 Jay Winter,2004-01-08 Before Rwanda and Bosnia, and before the Holocaust, the first genocide of the twentieth century happened in Turkish Armenia in 1915, when approximately one million people were killed. This volume is an account of the American response to this atrocity. The first part sets up the framework for understanding the genocide: Sir Martin Gilbert, Vahakn Dadrian and Jay Winter provide an analytical setting for nine scholarly essays examining how Americans learned of this catastrophe and how they tried to help its victims. Knowledge and compassion, though, were not enough to stop the killings. A terrible precedent was born in 1915, one which has come to haunt the United States and other Western countries throughout the twentieth century and beyond. To read the essays in this volume is chastening: the dilemmas Americans faced when confronting evil on an unprecedented scale are not very different from the dilemmas we face today.

Characters in Fictional Worlds Jens Eder,Fotis Jannidis,Ralf Schneider,2010-11-19 Although fictional characters have long dominated the reception of literature, films, television programs, comics, and other media products, only recently have they begun to attract their due attention in literary and media theory. The book systematically surveys today's diverse and at times conflicting theoretical perspectives on fictional character, spanning research on topics such as the differences between fictional characters and real persons, the ontological status of characters, the strategies of their representation and characterization, the psychology of their reception, as well as their specific forms and constellations in - and across - different media, from the book to the internet.
