Design and Distribution of Late Medieval Manuscripts in England Margaret Connolly, Linne R. Mooney, 2008 One of the most important developments in medieval English literary studies since the 1980s has been the growth of manuscript studies. The thirteen essays in this volume discuss aspects of the design and distribution of manuscripts in late medieval England, focusing particularly on vernacular manuscripts of the fifteenth and early sixteenth centuries. This binary focus on secular and devotional texts illuminates shared networks of production and dissemination, and considerably expands current knowledge of regional and metropolitan book production in the period before printing.--BOOK JACKET.

Medieval Manuscripts in the Digital Age Benjamin Albritton, Georgia Henley, Elaine Treharne, 2020-07-14 *Medieval Manuscripts in the Digital Age* explores one major manuscript repository's digital presence and poses timely questions about studying books from a temporal and spatial distance via the online environment. Through contributions from a large group of distinguished international scholars, the volume assesses the impact of being able to access and interpret these early manuscripts in new ways. The focus on Parker on the Web, a world-class digital repository of diverse medieval manuscripts, comes as that site made its contents Open Access. Exploring the uses of digital representations of medieval texts and their contexts, contributors consider manuscripts from multiple perspectives including production, materiality, and reception. In addition, the volume explicates new interdisciplinary frameworks of analysis for the study of the relationship between texts and their physical contexts, while centring on an appreciation of the opportunities and challenges effected by the digital representation of a tangible object. Approaches extend from the codicological, palaeographical, linguistic, and cultural to considerations of reader reception, image production, and the implications of new technologies for future discoveries. *Medieval Manuscripts in the Digital Age* advances the debate in manuscript studies about the role of digital and computational sources and tools. As such, the book will appeal to scholars and students working in the disciplines of Digital Humanities, Medieval Studies, Literary Studies, Library and Information Science, and Book History.

The Use of Models in Medieval Book Painting Monika E. Müller, 2014-06-02 Until recently, the phenomenon of copying in medieval book painting has been considered mainly in terms of the reconstruction of pictorial sources used for the composition or iconography of miniatures, initials, or decorative elements. Although historic sources only rarely mention the circumstances of manuscripts' production, one particular widely-accepted hypothesis has prevailed until now, according to which artists used model drawings or sketch books with the aim of facilitating the production of copies and the creation of new picture cycles. However, it is no longer sufficient to regard medieval book painting in its diachronic dimension only through these lenses. Rather, one should consider Robert W. Scheller's critique that "When using the model hypothesis one

must always be mindful of other factors which are known to have played a part in the transmission of art in the Middle Ages". The contributions of this volume deal with these issues by focusing on book painting between the 10th and 16th centuries.

Designing English Daniel Wakelin, 2018 Early manuscripts in the English language include religious works, plays, romances, poetry and songs, as well as charms, notebooks, science and medieval medicine. How did scribes choose to arrange the words and images on the page in each manuscript? How did they preserve, clarify and illustrate writing in English? What visual guides were given to early readers of English in how to understand or use their books?'*Designing English*' is an overview of eight centuries of graphic design in manuscripts and inscriptions from the Anglo-Saxon to the early Tudor periods. Working beyond the traditions established for Latin, scribes of English needed to be more inventive, so that each book was an opportunity for redesigning. '*Designing English*' focuses on the craft, agency and intentions of scribes, painters and engravers in the practical processes of making pages and artefacts. It weighs up the balance of ingenuity and copying, practicality and imagination in their work. It surveys bilingual books, format, ordinatio, decoration and reading

aloud, as well as inscriptions on objects, monuments and buildings. With over ninety illustrations, drawn especially from the holdings of the Bodleian Library in Old English and Middle English, 'Designing English' gives a comprehensive overview of English books and other material texts across the Middle Ages.

The Macclesfield Alphabet Book Christopher De Hamel, Patricia Lovett, 2010 Initially it was thought to be a 'model book', used by artists for the transmission of ideas to assistants, or as a sample book to show potential customers. But, as Christopher de Hamel and Patricia Lovett show in their introductory essays, this assumption must be questioned: the Macclesfield Alphabet Book is an enigmatic album, possibly a friar's personal commonplace book. --
