Understanding Racial and Ethnic Differences in Health in Late Life National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Race, Ethnicity, and Health in Later Life, 2004-09-08 As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various stressors, patient attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for instance, looking at health differentials across the life course and deciphering the links between factors presumably producing differentials and biopsychosocial mechanisms that lead to impaired health.

Introduction to Sociology 2e Heather Griffiths, Nathan Keirns, Gail Scaramuzzo, Susan Cody-Rydzewski, Eric

Strayer, Sally Vyrain, 2017-12-31 Introduction to Sociology adheres to the scope and sequence of a typical introductory sociology course. In addition to comprehensive coverage of core concepts, foundational scholars, and emerging theories, we have incorporated section reviews with engaging questions, discussions that help students apply the sociological imagination, and features that draw learners into the discipline in meaningful ways. Although this text can be modified and reorganized to suit your needs, the standard version is organized so that topics are introduced conceptually, with relevant, everyday experiences.

Communities in Action National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-03-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Introducing Sociology Using the Stuff of Everyday Life Josee Johnston, Kate Cairns, Shyon Baumann, 2017-01-06 The challenges of teaching a successful introductory sociology course today demand materials from a publisher very different from the norm. Texts that are organized the way the discipline structures itself intellectually no longer connect with the majority of student learners. This is not an issue of pandering to students or otherwise seeking the lowest common denominator. On the contrary, it is a question of again making the practice of sociological thinking meaningful, rigorous, and relevant to today's world of undergraduates. This comparatively concise, highly visual, and affordable book offers a refreshingly new way forward to reach students, using one of the most powerful tools in a sociologist's teaching arsenal—the familiar stuff in students' everyday lives throughout the world: the jeans they wear to class, the coffee they drink each morning, or the phones their professors tell them to put away during lectures. A focus on consumer culture, seeing the strange in the familiar, is not only interesting for students; it is also (the authors suggest) pedagogically superior to more traditional approaches. By engaging students through their stuff, this book moves beyond teaching about sociology to helping instructors teach the practice of sociological thinking. It moves beyond describing what sociology is, so that students can practice what sociological thinking can do. This pedagogy also posits a relationship between teacher and learner that is bi-directional. Many students feel a sense of authority in various areas of consumer culture, and they often enjoy sharing their knowledge with fellow students and with their instructor. Opening up the sociology classroom to discussion of these topics validates students' expertise on their own life-worlds. Teachers, in turn, gain insight from the goods, services, and cultural expectations that shape students' lives. While innovative, the book has been carefully crafted to make it as useful and flexible as possible for instructors aiming to build core sociological foundations in a single semester. A map on pages ii-iii identifies core sociological concepts covered so that a traditional syllabus as well as individual lectures can easily be maintained. Theory, method, and active learning exercises in every chapter constantly encourage the sociological imagination as well as

the doing of sociology.

Critical Perspectives on Racial and Ethnic Differences in Health in Late Life National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Race, Ethnicity, and Health in Later Life, 2004-10-16 In their later years, Americans of different racial and ethnic backgrounds are not in equally good-or equally poor-health. There is wide variation, but on average older Whites are healthier than older Blacks and tend to outlive them. But Whites tend to be in poorer health than Hispanics and Asian Americans. This volume documents the differentials and considers possible explanations. Selection processes play a role: selective migration, for instance, or selective survival to advanced ages. Health differentials originate early in life, possibly even before birth, and are affected by events and experiences throughout the life course. Differences in socioeconomic status, risk behavior, social relations, and health care all play a role. Separate chapters consider the contribution of such factors and the biopsychosocial mechanisms that link them to health. This volume provides the empirical evidence for the research agenda provided in the separate report of the Panel on Race, Ethnicity, and Health in Later Life.

White Fragility Robin DiAngelo, 2019-02-07 The International Bestseller 'With clarity and compassion, DiAngelo allows us to understand racism as a practice not restricted to bad people. In doing so, she moves our national discussions forward. This is a necessary book for all people invested in societal change' Claudia Rankine Anger. Fear. Guilt. Denial. Silence. These are the ways in which ordinary white people react when it is pointed out to them that they have done or said something that has - unintentionally - caused racial offence or hurt. After, all, a racist is the worst thing a person can be, right? But these reactions only serve to silence people of colour, who cannot give honest feedback to 'liberal' white people lest they provoke a dangerous emotional reaction. Robin DiAngelo coined the term 'White Fragility' in 2011 to describe this process and is here to show us how it serves to uphold the system of white supremacy. Using knowledge and insight gained over decades of running racial awareness workshops and working on this idea as a Professor of Whiteness Studies, she shows us how we can start having more honest conversations, listen to each other better and react to feedback with grace and humility. It is not enough to simply hold abstract progressive views and condemn the obvious racists on social media - change starts with us all at a practical, granular level, and it is time for all white people to take responsibility for relinquishing their own racial supremacy. 'By turns mordant and then inspirational, an argument that powerful forces and tragic histories stack the deck fully against racial justice alongside one that we need only to be clearer, try harder, and do better' David Roediger, Los Angeles Review of Books 'The value in *White Fragility* lies in its methodical, irrefutable exposure of racism in thought and action, and its call for humility and vigilance' Katy Waldman, New Yorker 'A vital, necessary, and beautiful book' Michael Eric Dyson

Migration and Discrimination Rosita Fibbi, Arnfinn H. Midtbøen, Patrick Simon, 2021-04-08 This open access short

reader provides a state of the art overview of the discrimination research field, with particular focus on discrimination against immigrants and their descendants. It covers the ways in which discrimination is defined and conceptualized, how it is measured, how it may be theorized and explained, and how it might be combated by legal and policy means. The book also presents empirical results from studies of discrimination across the world to show the magnitude of the problem and the difficulties of comparison across national borders. The concluding chapter engages in a critical discussion of the relationship between discrimination and integration as well as pointing out promising directions for future studies. As such this short reader is a valuable read to undergraduate students, as well as graduate students, scholars, policy makers and the general public.

Allegiance and Identity in a Globalised World Fiona Jenkins, Mark Nolan, Kim Rubenstein, 2014-11-06 Examines questions of allegiance and identity in a globalised world through the disciplines of law, politics, philosophy and psychology.

Global Gospel Douglas Jacobsen, 2015-11-10 In this pathbreaking book, award-winning author Douglas Jacobsen describes global Christianity and provides a framework for understanding the varied experiences of Christians around the world. Focusing on the five big continents of Africa, Asia, Europe, Latin America, and North America, Jacobsen recounts their differing histories, contemporary experiences, and cultural theologies. In the current era of massive and dynamic global challenges, this accessible and fair-minded volume sets the stage for Christians worldwide to engage the gospel--and each other--more deeply. Global Gospel contains numerous maps, charts, and illustrations that aid comprehension. Accompanying videos can be found on YouTube's Global Christianity channel (www.youtube.com/globalchristianity).

Measuring Racial Discrimination National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Methods for Assessing Discrimination, 2004-07-24 Many racial and ethnic groups in the United States, including blacks, Hispanics, Asians, American Indians, and others, have historically faced severe discrimination—pervasive and open denial of civil, social, political, educational, and economic opportunities. Today, large differences among racial and ethnic groups continue to exist in employment, income and wealth, housing, education, criminal justice, health, and other areas. While many factors may contribute to such differences, their size and extent suggest that various forms of discriminatory treatment persist in U.S. society and serve to undercut the achievement of equal opportunity. Measuring Racial Discrimination considers the definition of race and racial discrimination, reviews the existing techniques used to measure racial discrimination, and identifies new tools and areas for future research. The book conducts a thorough evaluation of current methodologies for a wide range of circumstances in which racial discrimination may occur, and makes recommendations on how to better assess the presence and effects of discrimination.

Researching Conflict in Africa Elisabeth J. Porter, 2005 Parts of Africa experience persistent violence and seemingly intractable conflicts. These violent conflicts have drawn researchers seeking to determine and explain why conflicts are prevalent, what makes them intensify, and how conflicts can be resolved. This book examines the ethical and practical issues of researching within violent and divided societies. It provides fascinating and factual case studies from Angola, the Democratic Republic of Congo, Ghana, Nigeria, Rwanda and South Africa. The authors provide insights about researching conflict in Africa that can only be gained through fieldwork experience.

Chronic Kidney Disease in Disadvantaged Populations Guillermo Garcia-Garcia, Lawrence Agodoa, Keith C. Norris, 2017-07-08 Chronic Kidney Disease in Disadvantaged Populations investigates the increased incidence and prevalence of kidney disease in vulnerable populations world-wide. The volume explores the complex interactions of genetic, biologic, cultural and socioeconomic factors such as the environment, and specific health behaviors that seem to be responsible for a significant proportion of the health disparities in these communities. Each chapter is written by leading experts in the field and analyzes the prevalence and incidence of pre-dialysis kidney disease in disadvantaged populations across both developed and developing countries. In addition, each contribution analyzes differentiated risk factors and compares the disparities in access to screening, prevention strategies, treatment protocols and renal replacement therapies. Chronic Kidney Disease in Disadvantaged Populations is essential reading for residents, fellows, clinicians and biomedical researchers working in nephrology, internal medicine, and epidemiology, especially those working in areas with high concentrations of disadvantaged populations. - Presents a comprehensive account of both traditional and non-traditional risk factors for kidney disease - Explores the mechanisms by which poverty increases the burden of kidney disease in these populations, barriers to access to renal health care, including renal replacement therapies, organ donation, and organ commercialization - Offers the latest perspectives on outcomes in renal replacement therapies as well as prevention strategies

The Sociology of Ethnicity Sinisa Malesevic, 2004-03-18 This book offers an original synthesis of existing knowledge, pointing forward in a manner that could influence a new generation's conception of the field and its agenda. If it attracts the

attention it merits, it could prove one of the most important books about ethnic and racial relations since the nineteen-eighties. - Michael Banton, *Ethnic and Racial Studies* Malesevic provides a thorough and balanced account of the sociological foundations of the study of ethnicity... His presentation is as critical and engaging as it is easy to read and logically organized. It is invaluable reading for sociologists. - Jon Fox, *British Journal of Sociology* Spanning classical sociology to current debates, *The Sociology of Ethnicity* synthesizes the leading sociological interpretations of ethnic relations and provides a coherent theoretical framework for its analysis. In this thoughtful and accessible text, Sinisa Malesevic assesses the explanatory strength of a range of sociological theories in understanding ethnicity and ethnic conflict. While acknowledging that there is no master key or blue-print to deal with each and every case of interethnic group relations, *The Sociology of Ethnicity* develops the best strategy to bridge epistemological and policy requirements for interethnic group relations. *The Sociology of Ethnicity* will be required reading for advanced undergraduates and postgraduates studying ethnicity and race in sociology and across the social sciences.
