[The Oxford Handbook of Peace History](#) Charles F. Howlett,Christian Philip Peterson,Christian Peterson,Deborah D. Buffton,David L. Hostetter,2023 The Oxford Handbook of Peace History uniquely explores the distinctive dynamics of peacemaking across time and place, and analyzing how past and present societies have created diverse cultures of peace and applied strategies for peaceful change. The analysis draws upon the expertise of many well-respected and distinguished scholars from disciplines such as anthropology, economics, history, international relations, journalism, peace studies, sociology, and theology. This work is divided into six parts. The first three sections address the chronological sweep of peace history from the Ancient Egyptians to the present while the last three cover biographical profiles of peace advocates, key issues in peace history, and the future of peace history. A central theme throughout is that the quest for peace is far more

than the absence of war or the pursuit of social justice ideals. Students and scholars, alike, will appreciate that this work examines the field of peace history from an international perspective and expands analysis beyond traditional Eurocentric frameworks. This volume also goes far beyond previously published handbooks and anthologies in answering what are the strengths and limits of peace history as a discipline, and what can it offer for the future. It also has the unique features of a state-of-the-field introduction with a detailed treatment of peace history historiography and a chapter written by a noted archivist in the field that provides a comprehensive list of peace research resources. It is a work ably suited applicable for classrooms and scholarly bookshelves--

Global Connections John Coatsworth, Juan Cole, Michael P. Hanagan, Peter C. Perdue, Charles Tilly, Louise Tilly, 2015-03-16 Emphasizing global interconnectedness, Volume 2 of this undergraduate history textbook covers the early modern period through to modern times.

The Global History of Portugal Carlos Fiolhais, José Eduardo Franco, José Pedro Paiva, 2021-12-06 For thousands of years, Portugal has been the point of arrival and departure for peoples, cultures, languages, ideas, fashions, behaviours, beliefs, institutions and produce. While its miscegenation and global multimodal activity enriched the world in many ways, it also provoked violence, war, suffering and resistance. The *Global History of Portugal* contains 93 chapters grouped into five parts: Pre-history, Antiquity, Middle Ages, Early Modern period and Modern World. Each chapter begins with an event, interpreted in the light of global history. Each part opens with an introduction, offering a perspective of the period in question. The three Editors, five Scientific Coordinators (João Luís Cardoso, Carlos Fabião, Bernardo Vasconcelos e Sousa, Catia Antunes and António Costa Pinto) and ninety Contributors offer a critical and analytical synthesis of the history that originated in Portuguese territory or passed through it, stimulating the process of encounter and dis-encounter in today's global world. The history presented gives special attention to the world that moulded Portugal and the Portuguese, and to the ways Portugal configured the world. It seeks to identify and understand the transversal entanglements of historic impact and the impulses these gave to the construction of Portugal and the world. Contemporary reflection and academic scholarship on the global history of leading nations has stimulated a rethinking of the past and a more comprehensive recognition of legacy. Historians can no longer overlook the wider world with which their country of investigation has interacted. Portugal's role in the dynamic circulation of peoples and ideas makes it global history not only unique by way of what took place but also in terms of a potential academic template for better understanding of how the past shapes the present, and more particularly the importance of acknowledging a country's past historic mis-steps and how these are dealt with by contemporary populations.

Protestant War Robert Armstrong, Robert Matthew Armstrong, 2005 The Protestants of Ireland are a missing piece in the puzzle of the wars of the three kingdoms of the 1640s. This book provides a rich narrative of the struggles and dilemmas of that community, and its place in the wider conflict throughout Britain and Ireland. New light is shed upon the aims and

aspirations of parliamentarians, royalists and covenanters in civil war England, and the formation of Protestant and British identities in seventeenth century Ireland.

A Global History of Anti-Slavery Politics in the Nineteenth Century W. Mulligan, M. Bric, 2013-05-23 The abolition of slavery across large parts of the world was one of the most significant transformations in the nineteenth century, shaping economies, societies, and political institutions. This book shows how the international context was essential in shaping the abolition of slavery.

Communication Strategies of Governments and NGOs Manuel Adolphsen, 2014-04-01 Processes of global governance are mostly invisible to ordinary citizens, due to an overall lack of accompanying transnational public discourse. However, there are exceptional occasions on which media around the world do pay attention to global governance: high-level summits, such as the UN climate change conferences. Through a detailed case study of UN climate summits, Manuel Adolphsen investigates the transnational communication strategies and behind-the-scenes coordination processes that prominent governments and NGOs carry out on such occasions. His research reveals political actors' conscious use of summits as public diplomacy resources as well as the prevalence of on-site coproduction routines among journalists and PR professionals. Summits feature complex public diplomacy constellations interweaving transnational, international, and also solely domestic processes.

Global Nonkilling Leadership Forum Book of Proceedings Glenn D. Paige, 2008

Set the World on Fire Keisha N. Blain, 2018-01-18 In 1932, Mittie Maude Lena Gordon spoke to a crowd of black Chicagoans at the old Jack Johnson boxing ring, rallying their support for emigration to West Africa. In 1937, Celia Jane Allen traveled to Jim Crow Mississippi to organize rural black workers around black nationalist causes. In the late 1940s, from her home in Kingston, Jamaica, Amy Jacques Garvey launched an extensive letter-writing campaign to defend the Greater Liberia Bill, which would relocate 13 million black Americans to West Africa. Gordon, Allen, and Jacques Garvey—as well as Maymie De Mena, Ethel Collins, Amy Ashwood, and Ethel Waddell—are part of an overlooked and understudied group of black women who take center stage in *Set the World on Fire*, the first book to examine how black nationalist women engaged in national and global politics from the early twentieth century to the 1960s. Historians of the era generally portray the period between the Garvey movement of the 1920s and the Black Power movement of the 1960s as one of declining black nationalist activism, but Keisha N. Blain reframes the Great Depression, World War II, and the early Cold War as significant eras of black nationalist—and particularly, black nationalist women's—ferment. In Chicago, Harlem, and the Mississippi Delta, from Britain to Jamaica, these women built alliances with people of color around the globe, agitating for the rights and liberation of black people in the United States and across the African diaspora. As pragmatic activists, they employed multiple protest strategies and tactics, combined numerous religious and political ideologies, and forged unlikely alliances in their struggles

for freedom. Drawing on a variety of previously untapped sources, including newspapers, government records, songs, and poetry, *Set the World on Fire* highlights the flexibility, adaptability, and experimentation of black women leaders who demanded equal recognition and participation in global civil society.

[The Postwar Origins of the Global Environment](#) Perrin Selcer, 2018-09-25 In the wake of the Second World War, internationalists identified science as both the cause of and the solution to world crisis. Unless civilization learned to control the unprecedented powers science had unleashed, global catastrophe was imminent. But the internationalists found hope in the idea of world government. In *The Postwar Origins of the Global Environment*, Perrin Selcer argues that the metaphor of “Spaceship Earth”—the idea of the planet as a single interconnected system—exemplifies this moment, when a mix of anxiety and hope inspired visions of world community and the proliferation of international institutions. Selcer tells the story of how the United Nations built the international knowledge infrastructure that made the global-scale environment visible. Experts affiliated with UN agencies helped make the “global”—as in global population, global climate, and global economy—an object in need of governance. Selcer traces how UN programs such as UNESCO’s Arid Lands Project, the production of a soil map of the world, and plans for a global environmental-monitoring system fell short of utopian ambitions to cultivate world citizens but did produce an international community of experts with influential connections to national governments. He shows how events and personalities, cultures and ecologies, bureaucracies and ideologies, decolonization and the Cold War interacted to make global knowledge. A major contribution to global history, environmental history, and the history of development, this book relocates the origins of planetary environmentalism in the postwar politics of scale.

The Routledge History of the Second World War Paul R. Bartrop, 2021-11-08 The Routledge History of the Second World War sums up the latest trends in the scholarship of that conflict, covering a range of major themes and issues. The book delivers a thematic analysis of the many ways in which study of the Second World War can take place, considering international, transnational, and global approaches, and serves as a major jumping off point for further research into the specific fields covered by each of the expert authors. It demonstrates the global and total nature of the Second World War, giving due coverage to the conflict in all major theatres and through the lens of the key combatants and neutrals, examines issues of race, gender, ideology, and society during the war, and functions as a textbook to educate students as to the trends that have taken place in how the conflict has been (and can be) interpreted in the modern world. Divided into twelve parts that cover central themes of the conflict, including theatres of war, leadership, societies, occupation, secrecy and legacies, it enables those with no memory of war to approach it with a view to comprehending what it was all about and places the history of this conflict into a context that is international, transnational, and institutional. This is a comprehensive and accessible reference volume for anyone interested in the most up to date scholarship on this major conflict. Chapter 18 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license available at <http://www.taylorfrancis.com>

The World and The Netherlands Marjolein 't Hart, Manon van der Heijden, Karel Davids, Lex Heerma van Voss, Leo Lucassen, Jeroen Touwen, 2023-01-26 This is the first book to examine the history of the country in a way that connects global processes to local developments. Taking account of social, political and economic dynamics over the last thousand years, the book addresses key questions that get to the heart of the Netherlands' role in the world, both historically and in more recent times: · Why did the 'West' become such a significant actor in the world, and what part did the Netherlands play? · What were the driving forces in state-formation, and in what respects and why did the Netherlands take a different path to most of Europe? · How did globalisation impact economic structures and socio-cultural life, and how did the Netherlands react to these new challenges? · How did this very Christian and bourgeois nation develop into a flagship for liberal tolerance? The book carefully balances a wider investigation of these issues with close inspections of how ordinary people experienced the changes they prompted. It also provide a convincing, judicious assessment of the ebbs and flows of this small country's global influence over time: prominent as a Golden Age economic powerhouse, colonial power, and bastion of political freedom in some eras, and yet impotent on the world stage at others. Supplemented with 35 images, 10 maps, a wealth of text boxes, charts and tables, as well as a companion website, this book is the definitive history of the Netherlands in a global context.

The World and US Social Forums: A Better World Is Possible and Necessary ,2008-07-31 The WSF/USSF is an expression of the people's struggles to advance alternatives to the world-as-we-know-it. Since its first convening in 2001 in Porto Alegre, Brazil, it has captured the imagination of all who have come within its orbit and caught up by its vast and growing networks. It provides a large space for groups to mobilize, voice their oppression, exchange ideas, and express their desire for hope and another world. Central in the founding principles of the World Social Forum are: the advance of peoples' rights (including women's rights, the rights of indigenous peoples, the rights of minorities, the rights of peasant farmers, and, generally, the rights and dignity of all peoples now oppressed), participatory democracy, social and cultural pluralism, and the end of market tyranny. This volume captures the full range of topics dealing with the WSF/USSF. It is a fresh treatment of materials for the insider and provides ample background for someone who would like to attend. Originally published, in part, as Volume 3, No. 1 (2008) of Brill's journal *Societies Without Borders*

Modern Subjectivities in World Society Dietrich Jung,Stephan Stetter,2018-07-20 This book brings together theories of world society with poststructuralist and postcolonial work on modern subjectivity to understand the universalising and particularising processes of globalisation. It addresses a theoretical void in global studies by attending to the co-constituted process through which modern subjectivities and global processes emerge and interact. The editors outline a key problem in global studies, which is a lack of engagement between the local/particular/individual and the 'universalising' processes in which they are situated. The volume deals with this concern with contributions from historical sociologists, poststructuralist and postcolonial scholars and by focusing in the Middle East, religion in global modernity and non-human subjectivities.
