Ethics and Law for the Health Professions Ian Kerridge,Michael Lowe,Cameron Stewart,2013 Ethics and Law for the Health Professions is a cross-disciplinary medico-legal book, the first edition of which was widely used in the medical world. We believe it is also of immense use to the legal world when grappling with medico-legal issues. Its special features are its focus on a clinically-relevant approach and its recognition that health care professionals are often confronted with legal and ethical issues simultaneously. Health professionals have to satisfy both, and their legal advisers need to be aware of the dilemmas this can present. This book is careful to distinguish between ethics and law. Its chapters take account of all the

health professions and their differing responsibilities, and the book covers a very wide range of the issues they face.

Policing and the Mentally Ill Duncan Chappell, 2013-06-13 In countries with democratic traditions, police interactions with the mentally ill are usually guided by legislative mandates giving police discretion and possibly resulting in referrals for assistance and treatment. But all too frequently, the outcome of these interactions is far less therapeutic and leads to a cycle of arrests and ultimately incarceration. Stemming from an initiative in Memphis, Tennessee two decades ago, police departments in many parts of the world have set up specific programs with crisis intervention teams to facilitate police contact with the mentally ill. *Policing and the Mentally Ill: International Perspectives* examines how these types of programs have fared in jurisdictions across the world. The book begins with developments in North America and Europe—traditionally the locus of much of the innovation and change in policing and related areas. It demonstrates how a number of jurisdictions in Europe have only recently begun to recognize therapeutic intervention with the mentally ill as a priority issue, and still frequently suffer from a lack of significant resources. The largest section of the book focuses on Australia, where local law enforcement agencies have displayed a remarkable enthusiasm for and commitment to change in their management of interactions with citizens with mental illness. Finally, the book examines the particular challenges of providing humane and effective policing for persons with mental illnesses in parts of the developing world. These challenges often involve dealing with entrenched cultural beliefs and practices based on superstition, fear, and prejudice regarding persons thought to be mentally ill. Interactions between police and persons with mental illnesses comprise an important and sensitive aspect of everyday policing. The 16 chapters in this book offer a wide range of cross-cultural perspectives on this essential aspect of policing, enabling police practitioners to develop a best practices approach to managing their interactions with this vulnerable segment of the community.

Emergency and Trauma Care for Nurses and Paramedics Kate Curtis, Clair Ramsden, 2011-08-15 *Emergency and Trauma Care* is written for Australian emergency care providers including paramedics, emergency nurses, pre-hospital care providers, nurse practitioners, general practice nurses and allied health practitioners including occupational therapists and physiotherapists who are caring for trauma patients. This book follows the patient journey from pre-hospital to definitive care. Using a body systems approach, each chapter provides comprehensive coverage of all aspects of adult and paediatric emergencies. Implications for clinical practice is supported by chapters of professional practice, clinical skills, research, evidence-based practice, and legal, ethical and cultural issues. Clinical assessment, physiology, management and rationale for intervention of common and not so common emergency presentations are provided, with each chapter providing clear and relevant examples for both Paramedics and Nurses. *Emergency and Trauma Care* brings together a team of highly respected clinical practitioners and academics to deliver the most up-to-date text dealing with the practical procedures and evidence experienced by emergency and trauma care providers every day. - Chapter 2 Pre-hospital care overview in Australia and NZ -

Chapter 10 Scene assessment, management and rescue - Chapter 11 Pre-Hospital Clinical Reasoning, Triage and Communication - Pre-hospital and emergency nursing considerations included in all relevant chapters - Chapter 5 Cultural Considerations in Emergency Care addresses cultural diversity, beliefs and values and focuses on Aboriginal and Torres Strait Islander health and Maori health - Chapter 19 Resuscitation includes advanced life support, airway management and incorporates the 2010 Australian Resuscitation Council guidelines - Chapter 37 People with disabilities provides assessment, examination and communication strategies for working with clients with intellectual and physical disabilities - Section 5 focuses on examination and communication strategies for working with unique population groups, including the elderly, disabled, obstetric and paediatric patients - Section 6 details major trauma assessment and management, blast injury, and trauma to specific body regions - Essentials outline the main points addressed in each chapter - Practice tips assist with communication skills, procedures and assessment - Case studies supported by questions throughout - Summaries and Key points, review questions, web links and references provide for consolidation and further research. - Evolve resources include Power point slides, 30 additional Case studies, image bank, web links - Three paramedic specific chapters (including scene assessment and management)

Essentials of Law for Health Professionals Kim Forrester, Debra Griffiths, 2009-12-18 Essentials of Law for Health Professionals 3e has been thoroughly revised and updated throughout to reflect the most recent changes in legislation relevant to the provision of health care services in Australia. Employment status of health professionals and issues of work

cover, health and safety obligations, anti-discrimination issues are clearly outlined and discussed in the new edition. Legal issues surrounding genetics, fertility and surrogacy are reviewed in conjunction with the current position on abortion and wrongful deaths. The breadth of material is presented in a manner that is more in keeping with a student resource text rather than a law book. It emphasises major points and includes summaries on how the law relates to practice rather than merely stating the law. The new third edition continues to present contemporary issues relevant for Health Science students from the clinical setting through to management and employment, as they apply to each state. - Streamlined new edition includes updates to key chapters such as: - Chapter 5 Negligence, which has been completely rewritten to discuss negligence by jurisdiction - Chapter 8 Manipulation of Life now deals with topical and controversial issues such as abortion, wrongful death, tissue transplants, genetics and infertility - Chapter 10: Contractual and Industrial Elements of Professional Practice has been updated to include the most recent changes to Industrial Relations Law, information that is essential for any Health Professional entering into employment. - Chapter 11: Statutes Controlling Health Service Delivery has been revised with respect to drugs and continues to provide the significant legislation most likely to impact on the daily practice of the health professional namely poisons, mental health legislation, child and elder abuse, and the notification of births and deaths. - New Chapter 12: Registration and Regulation of Health Professionals highlights the contemporary issues faced by health professionals with the implementation of National Registration. - Addition of legislation regulating research and a discussion of the legislative and common law controls on conducting research within Australian healthcare systems - National Health and Medical Research Council Act - Update all appendices and include the Decision Making Framework for Nurses plus Glossary - Takes a multidisciplinary approach to the subject of health care law and includes case-studies and activities. - Discussion on the implications of evidence-based practice on the standard notionally attributed to the duty of care.

Rethinking Rights-Based Mental Health Laws Bernadette McSherry, Penny Weller, 2010-08-16 Mental health laws exist in many countries to regulate the involuntary detention and treatment of individuals with serious mental illnesses. 'Rights-based legalism' is a term used to describe mental health laws that refer to the rights of individuals with mental illnesses somewhere in their provisions. The advent of the United Nations Convention on the Rights of Persons with Disabilities makes it timely to rethink the way in which the rights of individuals to autonomy and liberty are balanced against state interests in protecting individuals from harm to self or others. This collection addresses some of the current issues and problems arising from rights-based mental health laws. The chapters have been grouped in five parts as follows: - Historical Foundations - The International Human Rights Framework and the United Nations Convention on the Rights of Persons with Disabilities - Gaps Between Law and Practice - Review Processes and the Role of Tribunals - Access to Mental Health Services Many of the chapters in this collection emphasise the importance of moving away from the limitations of a negative rights approach to mental health laws towards more positive rights of social participation. While the law may not always be

the best way through which to alleviate social and personal predicaments, legislation is paramount for the functioning of the mental health system. The aim of this collection is to encourage the enactment of legal provisions governing treatment, detention and care that are workable and conform to international human rights documents.

Mental Health Nursing Gylo (Julie) Hercelinskyj, Louise Alexander, 2019-07-30 Mental Health Nursing: Applying Theory to Practice is a new Australian text combining a theoretical approach to mental health nursing with clinical reasoning and a practical framework for real-life nursing situations. Ideal for both clinical and theory mental health course units, the text was developed with input from consumers and clinicians, and includes the clinical manifestations, impacts, treatment and management of persons suffering from mental illness. Chapters on suicide and self-harm, and Mental Health First Aid provide detailed coverage of these contemporary mental health issues, while a chapter on mental state examination (MSE) comprehensively explores MSE in a style similar to a traditional psychiatry text and in the context of many different mental health conditions, giving students multiple perspectives of presentations. Critical thinking and review questions challenge students to apply theory to practice, and pharmacology is discussed in each disorder-chapter, helping students to contextualise their learning. With coverage of the Mental Health Act (2014), and criteria from the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5) integrated throughout, the text equips students with a working understanding of major mental health disorders, and the ability to work practically when engaging with persons suffering from mental illness. New, print versions of this book come with bonus online study tools on the CourseMate Express and Search Me! Nursing platforms.

Emergency Law Michael Eburn, 1999

Mental Health Law Kay Wilson, 2021-06-08 The debate about whether mental health law should be abolished or reformed emerged during the negotiations of the Convention on the Right of Persons with Disabilities (CRPD) and has raged fiercely for over a decade. It has resulted in an impasse between abolitionists, States Parties, and other reformers and a literature which has devolved into 'camps'. Mental Health Law: Abolish or Reform? aims to break new ground by cutting through the confusion using the tools of human rights treaty interpretation backed by a deep jurisprudential analysis of core CRPD concepts - dignity (including autonomy), equality, and participation - to gain a clearer understanding of the meaning of the CRPD and what it requires States Parties to do. In doing so, it sets out the development of mental health law and is unique in tracing the history of the abolitionist movement and how and why it has emerged now. By digging deeper into the conceptual basis of the CRPD and developing the 'interpretive compass' based on those three core CRPD concepts, the book aims to flesh out a broader vision of disability rights and move the debate forward by evaluating the three main abolition and reform options. Drawing on jurisprudential and multi-disciplinary research from philosophy, medicine, sociology, disability studies, and history, it argues compassionately and sensitively that mental health law should not be abolished, but should instead be

significantly reformed to minimize coercion and maximize the support and choices given to persons with mental impairments to realize all of their CRPD rights.

Law for Nurses and Midwives Patricia J Staunton, Mary Chiarella, 2012-11-01 An easy-to-follow introduction to the legal issues affecting health care providers in Australia. Law for Nurses and Midwives, 7th edition gives undergraduate and postgraduate nursing and midwifery students a concise introduction to the law as it pertains health care provision in Australia. As students will already appreciate, nursing and midwifery practice involves making decisions with and for others. This often requires evaluation of best interests and obligations and an assessment of what will best protect or enhance a patient or client's wellbeing. Understanding the application of current legal statutes - particularly those relating to negligence and consent - as they apply to professional practice is therefore essential for all nurses and midwives. Law for Nurses and Midwives, 7th edition provides students with information and knowledge necessary to make well informed and considered decisions - both for themselves and for those under their care. The six previous editions of this text were published as Nursing & the Law, and this seventh edition builds upon their established high regard. With its new title, Law for Nurses and Midwives reflects recent regulations changes under Australian National Registration, implemented in July 2010. All Australian state and territory statutes have been revised and Chapter 8: Professional regulation of nursing practice has been completely rewritten. There is now a specific section included on Maternity Services law to address the new standards and guidelines for eligible midwives. Students will benefit from actual legal cases within the book, which provide examples of the law in context, while extensive endnotes offer detailed referencing. Tables and boxed information highlight the most up-to-date data, research and statutes for ease of reference. - Completely revised to reflect recent changes in legislation and regulations - Chapter 8 now fully updated for national registration requirements - A specific section on Maternity Services law - A valuable resource for nurses and midwives returning to the workforce who are seeking an Australian law text to assist with CPD for National Registration - More accessible language throughout

Ethics and Law for Australian Nurses Kim Atkins, Sheryl de Lacey, Bernhard Ripperger, Rebecca Ripperger, 2020-01-02 A sound understanding of moral and legal obligations is critical to developing responsible nursing practice and building the nurse-patient relationship. Ethics and Law for Australian Nurses provides a practical framework for understanding the ethical and legal dimensions of nursing practice. The fourth edition has been thoroughly revised to include updates to legislation, the NMBA professional standards and case examples. A new chapter on the legal system and a fully revised chapter on duty of care and negligence provide a thorough overview of the law as it applies to nursing practice. The text also includes expanded material on the regulation of nursing practice, advanced care directives, cultural safety, practice in the context of digital environments, person-centred care and assisted dying. Written in an accessible and engaging style, Ethics

and Law for Australian Nurses provides a comprehensive guide for nurses training and practising in clinical, research and policy settings.

Social Work and the Law Chris Maylea,2019-12-04 This exciting new textbook introduces students to the key aspects of the law and legal frameworks essential for social work practice in Australia. Simple and easy to read, it communicates the complex legal concepts in practice in ways students can easily understand. With a focus on human rights and ethical conduct, it's both concept based, examining the ways of thinking and understanding law and social work interactions, and topic based, exploring the different specific areas of law which social workers are most likely to come into contact with. This is essential reading for any student taking a unit in Social Work Law. Specific to Australia, it accounts for Australian jurisdictions, and can be easily integrated into the classroom context, with case studies, questions for discussion and links to further resources, including interactive resources and a website to support further learning and provide updates to changes in the law between editions.

Kozier & Erb's Fundamentals of Nursing Australian Edition Audry Berman,Shirlee J. Snyder,Barbara Kozier,Glenora Lea Erb,Tracy Levett-Jones,Trudy Dwyer,Majella Hales,Nichole Harvey,Lorna Moxham,Tanya Park,Barbara Parker,Kerry Reid-Searl,David Stanley,2014-12-01 Kozier and Erb's Fundamentals of Nursing prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern.
