Factors condicionants del desenvolupament Josefina Sala Roca,2001

Advances in Psychological Science, Volume 2 Fergus Craik, Michele Robert, Michel Sabourin,2014-01-21 The chapters in this volume are the edited versions of invited addresses to the XXVI International Congress of Psychology held in Montréal in August 1996. As one major goal of the Congress was to promote communication among specializations in scientific psychology, the speakers were asked to survey their research area and present their own work in a way that would be accessible to their colleagues in other areas. Another purpose of the meeting was to bring researchers together from different parts of the world, reflecting their different approaches to the scientific study of mind, brain, and behavior. Consequently, the eminent researchers who have written the twenty-six chapters included in the present volume were drawn from universities and research institutes in North America, Europe, Japan, Russia, Israel, and New Zealand. The chapters cover a range of topics in human and animal experimental psychology. The first section deals with psychobiological processes - the interplay of body and mind in determining intelligence, stress, and pain. The next five chapters address current issues in neuropsychology and neuroscience, including the neural correlates of attention and vision. A third section looks at learning processes in humans and animals, and a fourth deals with a range of topics in perception and cognition. The final five chapters take a developmental perspective, presenting theoretical and empirical analyses of the acquisition of perceptual and cognitive abilities. Overall, the collection illustrates the growing trend to break down traditional barriers between areas of experimental psychology; there are many instances of profitable interactions between researchers studying aspects of behavior and those studying the biological bases of these behaviors. The twenty-six chapters give an excellent overview of current research in scientific psychology.

Grafología de la personalidad Amparo Botella de Figueroa,2022-09-20 Este libro no es una obra más en el campo de la Grafología. Concebido como un completo y actualizado manual, aborda la disciplina de una manera novedosa y con sentido crítico. Sus numerosas ilustraciones facilitan la comprensión y aplicación de la teoría. Muestra múltiples investigaciones que se han hecho en los últimos años. “Recorrer sus páginas es descubrir la esencia actual de la Grafología académica. Ni una sola línea tiene desperdicio. Su contenido, el estilo discursivo, el abordaje transversal, la cultura y experiencia de su autora lo hacen único. Invito a que lo lean profesionales de otras disciplinas y deseo que muchos colegas disfruten de tan magnífico aporte de una profesional sólida que no se guarda nada y provoca un quiebre ante lo dado, una ruptura de excelencia con lo asumido, una visión inteligente en su enfoque”. Eva Procopio. “En Grafología de la Personalidad, Amparo Botella, reconocida profesional del ámbito de la Grafología internacional, logra la mejor aportación científica que se ha visto en este campo hasta la fecha. La meticulosa y abundante documentación, unida a la capacidad didáctica de su autora, lo convierten en indispensable para todo profesional de esta disciplina”. Julia Moya, Grafóloga.

NEUROCIENCIAS Y DEPORTE. Psicología deportiva. Procesos mentales del atleta Stefano Tamorri,2004-03-02 Neurociencias y deporte propone a los expertos una forma diferente de hacer psicología del deporte y de ser psicólogos del

deporte. Una psicología que, al igual que la fisiología su pariente cercana, pueda dar respuestas también mediante números y parámetros de laboratorio sin olvidar por ello la psique, ya que es necesario conocer cada vez mejor al deportista en su conjunto, es decir, al hombre, con sus sentimientos y sus emociones. Porque un campeón es una mezcla de reacción muscular y biomecánica, pero ésta se hace posible y se desarrolla únicamente a través de un delicado, fino y complejo proceso de recogida de información, descodificación y programación que encuentra en el cerebro, en su biología, en sus neurotransmisores y finalmente, en sus procesos cognitivos, los presupuestos orgánicos pero también, emocionales, culturales y prácticos del porqué de esta o aquella respuesta. El libro se divide en cinco partes: Parte 1. De la psicología deportiva a las neurociencias aplicadas al deporte. Elementos de neuroanatomía, neurofisiología y neuropsicología. Parte 2. Aprendizaje y memoria. Las habilidades motoras y los procesos de elaboración de la información en competición. Los sistemas de control Parte 3. el comportamiento de un campeón: motivaciones, personalidad, emociones y comunicación. Parte 4. Homeostasis y rendimiento: los biorritmos del deportista, el sueño, la fatiga y la actividad deportiva Parte 5. Las enfermedades del atleta: la diagnosis y la patología
