**Strong Democracy** Benjamin R. Barber, 2003 One of the chosen few: an enduring contribution to democratic thought.—Bruce Ackerman, Sterling Professor of Law and Political Science, Yale University

**The New Abnormal** Aaron Kheriaty, 2022-11-01 The coronavirus pandemic conferred enormous power on certain government officials. They have no intention of giving it up. In the space of a few weeks in early 2020, Americans witnessed the imposition of previously unimagined social controls by the biomedical security state—the unelected technocrats who suddenly enjoyed nearly absolute power to incarcerate, isolate, and medicate the entire population. In this chilling new book, a dissident scientist reveals the people and organizations that form the biomedical security state its role in the origin of the pandemic and shaping the government response why it is a threat to science, public health, and individual freedom what can be done to confront and defeat this new Leviathan When covid-19 broke out, Dr. Aaron Kheriaty's work put him on the front lines. Realizing that the mental, physical, and economic toll of lockdowns was catastrophic, he began to protest that the cure was worse than the disease—an intolerable heresy. When he refused vaccination because he had natural immunity from a previous infection, the University of California, Irvine, medical school fired him. He fought back, in the courts and in the media, and has become a reliable source of truth amid official obfuscation and censorship. Now it's time for all of us to fight back. The deadly and arrogant misrule of the biomedical security state must not become the new normal.

**The Global Coup d'État** Jacob Nordangård, 2024-10-15 We are in the midst of a devastating takeover of our world. The Global Coup d'État shows how, why, and what we can do to stop it. The year 2020 will go down in history as the year when

the global coup d'état was initiated. In a historical context, the COVID-19 crisis, the murder of George Floyd by a police officer and subsequent riots, mass protests against government lockdowns, and the 2020 election appear rather as part of a well-directed chess game, with complete control of the whole planet as the final goal. During the crescendo of this drama, the powers behind the coup emerged quite openly, offering a techno-totalitarian and very far-reaching solution to the world. This solution, which they call the Great Reset, means that mankind must be fully integrated and merged with a worldwide technological system, through the application of the technologies of the Fourth Industrial Revolution—all for our own safety, security, and well-being. Most people probably associate the phrase “coup d'état” with a sudden, violent takeover, with tanks around government buildings, takeover of media channels, purges of dissidents, arrests, and so on. But this is not always the case. The usurpers can also seize power without violence, in a completely legal and democratic way, with the consent or even enthusiasm of the people, as evidenced in 2020. There are many “existential threats” (climate crisis, refugee crises, terrorism, pandemics, etc.) that can be used to establish a firmer and more centralized governance. This can be a gradual process, barely perceivable until it's almost a fait accompli. In *The Global Coup d'État*, author and researcher Jacob Nordangård shares the history, describes the process, reveals the methods, and identifies the agents of this worldwide takeover so that we can take action before it is too late.

*Scenarios for the Future* Shirin Elahi, 2007 This compendium is the culmination of an in-depth three year research project which considered how the European Patent Organisation (EPO) might rediscover and renew the basic principles underpinning it and its inherent purpose. Over 100 formal interviews were conducted with leading experts, and from these the EPO derived a set of scenarios for the possible future of patenting and intellectual property. These scenarios will be used by the EPO to address possible future challenges and opportunities.

**The Future Can't Wait** Steven Gale, Sarah Jackson, 2013

**Pope Francis: The Last Pope?** Leo Lyon Zagami, Brad Olsen, 2015-03-05 *Pope Francis: The Last Pope?* reveals the possible reasons for the choice of historical abdication of Benedict XVI and traces the process that led to the election of Cardinal Bergoglio: the Pope who many have prophesized will be the last and will bring the Catholic Church to its end. The book details the history of this prophecy, which was hidden away in the Vatican for hundreds of years and predicts that the reign of the last Pope will herald the beginning of great apostasy followed by great tribulation. It also explores the recent scandals in the Catholic Church and addresses questions including What pressures decreed the end of the pontificate of Benedict XVI? What powers have an interest for the Church to end? and What is the relationship between the Vatican and the New World Order? Perfect for anyone interested in prophecies about the end times, *Pope Francis: The Last Pope* reveals the truth about what numerology says about the last Pope and the darkness that may follow him, as well as fascinating investigations into the gay lobby, Freemasonry, and the Jesuit agenda in the Vatican and how it relates to the first Borgia

Pope, the legend of the White Pope and the Black Pope, and how Benedict's resignation may fulfill an ancient prophecy.

**Network Society and Future Scenarios for a Collaborative Economy** V. Kostakis, M. Bauwens, 2014-08-22 This book builds on the idea that peer-to-peer infrastructures are gradually becoming the general conditions of work, economy, and society. Using a four-scenario approach, the authors seek to simplify possible outcomes and to explore relevant trajectories of the current techno-economic paradigm within and beyond capitalism.

**Higher Education Landscape 2030** Dominic Orr, Maren Luebcke, J Philipp Schmidt, 2020-10-09 This open access Springer Brief provides a systematic analysis of current trends and requirements in the areas of knowledge and competence in the context of the project (A) Higher Education Digital (AHEAD)-International Horizon Scanning / Trend Analysis on Digital Higher Education. It examines the latest developments in learning theory, didactics, and digital-education technology in connection with an increasingly digitized higher education landscape. In turn, this analysis forms the basis for envisioning higher education in 2030. Here, four learning pathways are developed to provide a glimpse of higher education in 2030: Tamagotchi, a closed ecosystem that is built around individual students who enter the university soon after secondary education; Jenga, in which universities offer a solid foundation of knowledge to build on in later phases; Lego, where the course of study is not a monolithic unit, but consists of individually combined modules of different sizes; and Transformer, where students have already acquired their own professional identities and life experiences, which they integrate into their studies. In addition, innovative practice cases are presented to illustrate each learning path. **The Future of Mobility** Liisa Ecola, Johanna Zmud, Kun Gu, Peter Phleps, Irene Feige, 2015-07 Researchers developed two scenarios to envision the future of mobility in China in 2030. Economic growth, the presence of constraints on vehicle ownership and driving, and environmental conditions differentiate the scenarios. By making potential long-term mobility futures more vivid, the team sought to help decisionmakers at different levels of government and in the private sector better anticipate and prepare for change.

*OECD Digital Education Outlook 2021 Pushing the Frontiers with Artificial Intelligence, Blockchain and Robots* OECD, 2021-06-08 How might digital technology and notably smart technologies based on artificial intelligence (AI), learning

analytics, robotics, and others transform education? This book explores such question. It focuses on how smart technologies currently change education in the classroom and the management of educational organisations and systems.

**Next Generation Supply Chains** Rosanna Fornasiero, Saskia Sardesai, Ana Cristina Barros, Aristides Matopoulos, 2020-12-31 This open access book explores supply chains strategies to help companies face challenges such as societal emergency, digitalization, climate changes and scarcity of resources. The book identifies industrial scenarios for the next decade based on the analysis of trends at social, economic, environmental technological and political level, and examines how they may impact on supply chain processes and how to design next generation supply chains to answer these challenges. By mapping enabling technologies for supply chain innovation, the book proposes a roadmap for the full implementation of the supply chain strategies based on the integration of production and logistics processes. Case studies from process industry, discrete manufacturing, distribution and logistics, as well as ICT providers are provided, and policy recommendations are put forward to support companies in this transformative process.

**International Science and Technology Co-operation Towards Sustainable Development** OECD, 2001-03-07 This conference proceedings explores how widespread diffusion and application of cleaner technologies can help countries reach their sustainable development goals.

**Science, Technology and the Future** E. P. Velikhov, J. M. Gvishiani, S. R. Mikulinsky, 2013-10-22 Science, Technology and the Future is an analysis of the problems of and prospects for the development of science and technology and their role in society. Drawing on the perspectives of Soviet scientists, this book examines the relation between society and nature as well as the prospects for resolving ecological problems with the aid of science and technology. This book is comprised of 33 chapters and begins with a discussion on the role of science and technology in modern society and their place in the solution of global problems. The axiological and ethical aspects of the development of science and the mechanism of scientific and technical progress, economics, and social development are also considered. The next section deals with concrete questions pertaining to the development of natural and technical sciences and their significance for the future of mankind, with emphasis on the role of science in the development of productive forces; the state of and the prospects for resolving the energy problem; the most important achievements in the leading branches of physics, chemistry, and biology; opportunities for utilizing space research for man's daily needs; oceanology and geology in the year 2000; science and fertility of the soils; materials for the technology of the future; and prospects for the development of automation and man's place in future production. This monograph will be of interest to sociologists, environmentalists, and science policymakers.

**Proceedings of the 7th International Conference on Economic Management and Green Development** Xiaolong Li, Chunhui Yuan, John Kent, 2024-02-26 Economics has always been a heated research topic and green development is rising and integrating with various fields for interdisciplinary studies. Initiated in 2017, the International Conference on Economic

Management and Green Development (ICEMGD) is an annual conference aiming at bringing together researchers from the fields of economics, business management, public administration, and green development for the sharing of research methods and theoretical breakthroughs. The 7th International Conference on Economic Management and Green Development (ICEMGD 2023) was held on August 6, 2023. It was a hybrid conference including several on-site workshops and an online session. The workshops were held in London, Galați, Birmingham, Sydney, and Beijing. The proceedings consist of papers accepted by ICEMGD 2023, which are carefully selected and reviewed by professional reviewers from corresponding research fields and the editing committee of the conference. The papers have a diverse range of topics situated at the intersecting fields of economic management, public administration, and green development. ICEMGD is working to provide a platform for international participants from fields like macro- and microeconomics, international economics, finance, agricultural economics, health economics, business management and marketing strategies, regional development studies, social governance, and sustainable development. This proceedings volume, together with the conference, looks forward to sparking inspiration and promoting collaborations. This book will be of interest to researchers, academics, professionals, and policymakers in the fields of economic management, public administration, and development studies.
