Law for Nurses and Midwives Patricia J. Staunton, Mary Chiarella, 2016-08-06 Law for Nurses and Midwives is the most highly respected health law text for nursing and midwifery students studying law as part of their degree. Now in its 8th edition, this fundamental text outlines legal issues and responsibilities specific to both nursing and midwifery practice and features the legislation relevant to the provision of safe, quality healthcare in Australia. Authored by Patricia Staunton and Mary Chiarella, this fully revised edition includes updates to case law and the latest information on nursing and midwifery governance and the professional regulation of nurses and midwives. Revised Registration Standards and Standards for Practice established by the Nursing and Midwifery Board of Australia (NMBA), effective 2016 Learning Objectives that highlight what students will attain from each chapter The law in context through Case Examples, Clinical Examples and Case Studies Review Questions to consolidate learning Break down of legislation by state and territory Updated state and territory statutes

CALLAN PARK: 'THE JEWEL OF THE WEST' Edward Moxon, 2022-04-19 This book is a record of events that happened at Callan Park before 1960. It is a journey of discovery that uncovers facts and manoeuvring not published before. In time dramatic changes did happen; there was a paradigm shift from mothering to encouraging independence. The government's predominant focus, through its bureaucrats, was on costs, structure, and process. Others had different ideas. The change came through a handful of unlikely people; a female psychiatrist and her friends, two young nurses, one psychopathic doctor, a patient's brother, a few buck-passing bureaucrats, a newspaper, and a Royal Commission. This story involves the CIA. Sexual favours; one doctor proudly claimed that there were three things necessary for a happy life, "...to eat in style, to drive in style and to f... in style." The use of spies to gather information for personal gain or write headlines for a paper. Political gameplay and deals. Lies and empire builders, hatchet people and scapegoats. Callan Park is littered with the refuse of dedicated staff who succumbed to suicide, alcoholism, PTSD, depression, and family breakdown—written off as collateral damage. Treatments for psychiatric conditions are continually changing, not necessarily due to scientific advances. A popular treatment in the 1920s was isolation, an aperient in the 1940s and 50s, brain surgery, psychotropic drugs and LSD in the 1950s and 60s. The stage was set to usher in a revolution in the care and treatment of people with a mental health

problem and to experience the worse of political intervention. Volume two explores these two concepts.

Mental Health and Human Rights Michael Dudley, Derrick Silove, Fran Gale, 2012-06-21 People with mental disorders often suffer the worst conditions of life. This book is the first comprehensive survey of the mental health/human rights relationship. It examines the relationships and histories of mental health and human rights, and their interconnections with law, culture, ethnicity, class, economics, biology, and stigma.

A History of Medical Administration in New South Wales, 1788-1973 Cyril Joseph Cummins, 2003

Regulating Preventive Justice Tamara Tulich, Rebecca Ananian-Welsh, Simon Bronitt, Sarah Murray, 2017-01-20 Like medicine, law is replete with axioms of prevention. 'Prevention is better than cure' has a long pedigree in both fields. 17th century jurist Sir Edward Coke observed that 'preventing justice excelleth punishing justice'. A century later, Sir William Blackstone similarly stated that 'preventive justice is ...preferable in all respects to punishing justice'. This book evaluates the feasibility and legitimacy of state attempts to regulate prevention. Though prevention may be desirable as a matter of policy, questions are inevitably raised as to its limits and legitimacy, specifically, how society reconciles the desirability of averting risks of future harm with respect for the rule of law, procedural fairness and human rights. While these are not new questions for legal scholars, they have been brought into sharper relief in policy and academic circles in the wake of the September 11 terrorist attacks. Over the past 15 years, a body of legal scholarship has tracked the intensified preventive focus of anti-terrorism law and policy, observing how this focus has impacted negatively upon traditional legal frameworks. However, preventive law and policy in other contexts, such as environmental protection, mental health, immigration and corruption has not received sustained focus. This book extends that body of scholarship, through use of case studies from these diverse regulatory settings, in order to examine and critique the principles, policies and paradoxes of preventive justice. Whereas earlier scholars looked upon preventive justice as a source and means of regulation, the powerfully argued contributions to this volume provide forceful reasons to consider whether we would do better talk about regulating preventive justice. Professor Lucia Zedner, Oxford University

Law for Nurses and Midwives - E-Book Patricia J Staunton, Mary Chiarella, 2007-11-16 This title is directed primarily towards health care professionals outside of the United States. Nursing & the Law is the best known and most established health law textbook in Australia. The only law text written specifically for nurses, the 6th edition has been fully revised and updated, and includes and discusses current statutes and legislation for every state and territory. It retains many of the features that have kept this book at the forefront of nursing education and focuses on the legal responsibility of nurses in Australia. It provides students with an understanding of the application of basic legal principles to professional nursing practice.

The Australian Medico-legal Handbook Cameron Stewart, Ian Kerridge, Malcolm Parker, 2007 The Australian Medico-Legal

Handbook provides an easily understood reference guide to legal and ethical issues encountered in daily medical practice. It also covers the laws in all Australian jurisdictions, answering the most commonly asked questions in clinical practice - What if I get sued?, What do I do if someone refuses treatment?, What deaths do I refer to the Coroner?, Who can decide about a child's treatment?, What if I make a mistake?

Psychiatric and Mental Health Nursing Phil Barker, 2017-07-20 The concept of the craft of caring dictates that the basis of good nursing practice is a combination of both art and science, encouraging nurses to take a holistic approach to the practice of psychiatric and mental health nursing. Supported by relevant theory, research, policy, and philosophy, this volume reflects current developments in nursing practice and the understanding of mental health disorders. The book includes case studies of patients with anxiety, schizophrenia, and bipolar disorder as well as victims of sexual abuse, those with an eating disorder, homeless patients, and those with dementia and autism.

Human Rights and Mental Illness Australia. Human Rights and Equal Opportunity Commission, 1993 Report examines the existing social, legal, medical and institutional frameworks; deals with evidence concerning psychiatric care and treatment; examines the position of vulnerable or particularly disadvantaged groups; addresses the importance of prevention and early intervention services; presents findings and recommendations for change; Chapter 23 examines the position of Aboriginal and Torres Strait Islander people; findings include lack of knowledge by health professionals, inadequate and culturally

inappropriate services and problems and negative impacts due to geographic isolation, social and economic disadvantage, removal of children and removal from remote communities for treatment; recommendations focus on the need for consultation and an Aboriginal community based and controlled approach to services.

Mental Health Nursing Gylo (Julie) Hercelinskyj, Louise Alexander, 2019-07-30 Mental Health Nursing: Applying Theory to Practice is a new Australian text combining a theoretical approach to mental health nursing with clinical reasoning and a practical framework for real-life nursing situations. Ideal for both clinical and theory mental health course units, the text was developed with input from consumers and clinicians, and includes the clinical manifestations, impacts, treatment and management of persons suffering from mental illness. Chapters on suicide and self-harm, and Mental Health First Aid provide detailed coverage of these contemporary mental health issues, while a chapter on mental state examination (MSE) comprehensively explores MSE in a style similar to a traditional psychiatry text and in the context of many different mental health conditions, giving students multiple perspectives of presentations. Critical thinking and review questions challenge students to apply theory to practice, and pharmacology is discussed in each disorder-chapter, helping students to contextualise their learning. With coverage of the Mental Health Act (2014), and criteria from the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5) integrated throughout, the text equips students with a working understanding of major mental health disorders, and the ability to work practically when engaging with persons suffering from mental illness. New, print versions of this book come with bonus online study tools on the CourseMate Express and Search Me! Nursing platforms.

Rozelle Hospital Edward H. Moxon, 2024-11-29 In the 1960s, psychiatry was entering a new phase of its development. However, many people were uncomfortable with these changes and fought against what they saw as apostasy, dangerous, and unprofessional decisions by the bureaucracy. The role of Nurses before 1960 was task-oriented, to control behaviour, give somatic treatments when ordered, and provide the daily personal needs of their patients, a custodial model. Since 1960, the nursing profession, ancillary staff and Doctors have been forced to reassess their traditional involvement and develop new skills. All previous somatic treatments were abandoned or rarely used in mainstream psychiatry. The only tools left for nurses were consciously using self in a therapeutic relationship, communicating, sharing, developing empathy and compassion, and helping the patient gain insight, self-awareness and problem-solving skills. No longer were the staff seen as the 'boss', demanding obedience. Nurses had to learn how to work in alternative environments, halfway houses, day clinics, community clinics, night hospitals, acute units, work with mixed sexes, and learn new skills through family therapy, TA, cognitive behaviour modification, encounter groups, gestalt therapy, reality therapy and a therapeutic community and adapt to different age and cultural groups. Management of wards and staff presented a challenge to administrators. In-patients attained much more freedom and self-government with these developments. The hierarchy was flatter, industrial democracy

was expected, and workers had to cope with changing organisational structures. Government decision-making was a constant source of conflict. A new approach to management emerged, trust replaced control, and self-government replaced regimentation. Where were all these developments leading? What of the future? Volume Two explores the sequel and exposes the intrigues, promises, hypocrisy, lies, neglect, social engineering, and the fate of long-term residents and people with acute psychiatric episodes.

Defining Madness Peter Barry Shea,1999 . . . Dr Shea's fascinating history and analysis of mental health law in New South Wales from its earliest days ... a lucid and scholarly account of the medico-legal concept of mental illness. Members of both professions and many others besides will profit from his research and have a much clearer understanding of the importance of the policy issues involved and the inherent difficulty of attempting to solve them in the words of a statute. ... Far from being a dry legislative history, this is an absorbing account of the attempt to set out the circumstances that would justify a person being involuntarily detained in a mental hospital.Michael Sexton SC, Solicitor-General for NSW Dr Shea focuses on the central point of tension in mental health legislation - the need to balance an individual's right, in normal circumstances, to liberty and privacy, with the need to protect the general community including members of the individual's family. In Australia that debate has been conducted largely through the definition of a mentally ill person. A person admitted as a mentally ill person can be confined for the length of their treatment; the definition, accordingly, raises a special need for a system of safeguards. Dr Shea charts the changes to the definition from Lunacy Act 1843 to the 1997 amendments to the Mental Health Act 1990. He discusses not only the various statutory provisions but also the numerous committee reports and parliamentary debates in which the issue is explored.
