story of race, class, injustice and exploitation. 'No dead woman has done more for the living . . . A fascinating, harrowing, necessary book.' - Hilary Mantel, Guardian With an introduction Sarah Moss, author of *by author of Summerwater*. Her name was Henrietta Lacks, but scientists know her as HeLa. Born a poor black tobacco farmer, her cancer cells - taken without asking her - became a multimillion-dollar industry and one of the most important tools in medicine. Rebecca Skloot's moving account is the story of the life, and afterlife, of one woman who changed the medical world forever. Balancing the beauty and drama of scientific discovery with dark questions about who owns the stuff our bodies are made of, *The Immortal Life of Henrietta Lacks* is an extraordinary journey in search of the soul and story of a real woman, whose cells live on today in all four corners of the world. Guiding Cancer Control National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on a National Strategy for Cancer Control in the United States, 2019-08-30 Throughout history, perhaps no other disease has generated the level of social, scientific, and political discourse or has had the degree of cultural significance as cancer. A collective in the truest sense of the word, cancer is a clustering of different diseases that afflict individuals in different ways. Its burdens are equally broad and diverse, from the physical, financial, and psychological tolls it imposes on individuals to the costs it inflicts upon the nation's clinical care and public health systems, and despite decades of concerted efforts often referred to as the war on cancer, those costs have only continued to grow over time. The causes and effects of cancer are complex—in part preventable and treatable, but also in part unknown, and perhaps even unknowable. *Guiding Cancer Control* defines the key principles, attributes, methods, and tools needed to achieve the goal of implementing an effective national cancer control plan. This report describes the current structure of cancer control from a local to global scale, identifies necessary goals for the system, and formulates the path towards integrated disease control systems and a cancer-free future. This framework is a crucial step in establishing an effective, efficient, and accountable system for controlling cancer and other diseases.
