Concert Halls and Opera Houses Leo Beranek, 2012-12-06 The first question any lover of classical music usually asks an acoustician is, Which are the best halls in the world? The response -the three halls rated highest by world-praised conductors and music critics of the largest newspapers were built in 1870, 1888, and 1900- always prompts the next query: Why are those so good while many halls built after 1950 seem to be mediocre or failures? You will find answers to these questions in this book, the result of a half-century's research into the very complex field of acoustics of halls for music. Following the first chapters, which establish a base for understanding the effects of acoustics on composers, performers, and listeners, and guiding the reader to a common vocabulary, the bulk of this book, Chapter 3, contains the write-ups, photographs, drawings, and architectural details on 100 existing halls in 31 countries. Thirty of the halls are completely new. Although the remainder appeared in earlier books by the author, the materials have been updated wherever necessary. The later chapters present the relation of a hall's acoustics to its age, shape, type of seats, and the materials used for the walls and ceiling. The sequence of events that led to Boston Symphony Hall's excellent acoustics, which opened in 1900, is covered in detail-although it went through a troubled first few years because the leading local music critic considered the predecessor hall as better. Detailed discussions also appear for balcony, box, stage, and pit designs. All the known electroacoustical measurements on 100 existing halls are examined and compared with the rank orders of 58 concert halls and 21 opera houses that were obtained from interviews and questionnaires. Finally, the optimal electro-acoustical results are presented for concert halls and opera houses used for today's repertoires. Three appendices supplement the chapters: the first gives definitions of all of the major acoustical and architectural terms and symbols used in the book; the second provides the electro-acoustical data available on the 100 halls; and the third presents in tabular form much of the dimensional and electro-acoustical data for the 100 halls.

Building a Masterpiece Anne Watson, 2013 Building a masterpiece explores some of the untold chapters in the long history of the Opera House's gestation, development and completion -- of individuals whose careers were made or broken by the Opera House, the companies whose reputations were secured through their association with the building, and the pioneering construction methods, innovative technologies and methodologies developed to meet the demands of its

unprecedented design and challenging construction. The workers who built the building, the politicians, architects and members of the public who championed it and its often beleaguered architect are discussed as is its current world status as a symbol of Australia. To coincide with the 40th anniversary of the opening of the Sydney Opera House, this new edition of *Building a Masterpiece* will include a new chapter on another little known and much misunderstood story: the architect who took over from Utzon and completed the project.

The Saga of Sydney Opera House Peter Murray, 2003-09-02 Peter Murray's compelling and highly readable biography of the building presents both sides of the story. Using previously unpublished files and papers, Murray has managed to unravel one of the most intriguing architectural controversies of recent times - what really happened when they built Sydney Opera House...

The Sydney Opera House Peter FitzSimons, 2022-11-03 If only these walls and this land could talk . . . The Sydney Opera House is a breathtaking building, recognised around the world as a symbol of modern Australia. Along with the Taj Mahal and other World Heritage sites, it is celebrated for its architectural grandeur and the daring and innovation of its design. It showcases the incomparable talents involved in its conception, construction and performance history. But this stunning house on Bennelong Point also holds many secrets and scandals. In his gripping biography, Peter FitzSimons marvels at how this magnificent building came to be, details its enthralling history and reveals the dramatic stories and hidden secrets about the people whose lives have been affected, both negatively and positively, by its presence. He shares how a conservative 1950s state government had the incredible vision and courage to embark on this nation-defining structure; how an architect from Denmark and construction workers from Australia and abroad invented new techniques to bring it to completion; how ambition, betrayal, professional rivalry, sexual intrigue, murder, bullying and breakdowns are woven into its creation; and how it is now acknowledged as one of the wonders and masterpieces of human ingenuity.

How Big Things Get Done Bent Flyvbjerg, Dan Gardner, 2023-02-16 Best Books of 2023 - The Financial Times and The Economist Shortlisted for Financial Times and Schroders Business Book of the Year 2023 'Important, timely, instructive and entertaining' - Daniel Kahneman, bestselling author of *Thinking, Fast and Slow* World expert Bent Flyvbjerg and bestselling author Dan Gardner reveal the secrets to successfully planning and delivering ambitious projects on any scale. Nothing is more inspiring than a big vision that becomes a triumphant new reality. Think of how Apple's iPod went from a project with a single employee to an enormously successful product launch in eleven months. But such successes are the exception. Consider how London's Crossrail project delivered five years late and billions over budget. More modest endeavours,

whether launching a small business, organizing a conference, or just finishing a work project on time, also commonly fail. Why? Understanding what distinguishes the triumphs from the failures has been the life's work of Oxford professor Bent Flyvbjerg. In *How Big Things Get Done*, he identifies the errors that lead projects to fail, and the research-based principles that will make yours succeed: Understand your odds. If you don't know them, you won't win. Plan slow, act fast. Getting to the action quick feels right. But it's wrong. Think right to left. Start with your goal, then identify the steps to get there. Find your Lego. Big is best built from small. Master the unknown unknowns. Most think they can't, so they fail. Flyvbjerg shows how you can. Full of vivid examples ranging from the building of the Sydney Opera House to the making of the latest Pixar blockbusters, *How Big Things Get Done* reveals how to get any ambitious project done - on time and on budget. 'Entertaining . . . compelling . . . there are lessons here for managers of all stripes' - *The Economist*

Critical Infrastructure Antonio Di Pietro, José Martí, 2024-02-14 Modern critical infrastructures (CIs) (e.g., electricity, water, transportation, telecommunications, and others) form complex systems with a high degree of interdependencies from one CI to the others. Natural disasters (e.g., earthquakes, floods, droughts, landslides, and wildfires), humanmade disasters (e.g., sabotage and terrorism), and system faults (due to structural and equipment failures) will affect not only the directly impacted CI but all interdependent CIs. Risk assessment, therefore, has to be done over the entire system of CIs and should also include the social and personal impacts. According to a 2022 report, 80% of cities have been affected by significant climate change hazards represented by extreme heat (46%), heavy rainfall (36%), drought (35%), and floods (33%). The impacts of climate change, therefore, affect the complex system of the built environment and result in interrelated consequences at different scales ranging from single buildings to urban spaces and territorial infrastructures. Since it is not possible to reduce the severity of natural hazards, the main opportunity for lowering risk lies in reducing vulnerability and exposure. Vulnerability and exposure are related to urban development choices and practices that weaken the system's robustness. This volume reviews recent insights from risk identification and reduction to preparedness and financial protection strategies and proposes new approaches for better CIs and built environment protection.

Cleaning Techniques in Conservation Practice Norman R. Weiss, Kyle C. Normandin, Deborah Slaton, 2015-12-08 This book is being simultaneously published as a special issue of the Journal of Architectural Conservation, and presents the very latest research and developments in the cleaning of buildings, sculpture and monuments. It covers both wet and dry micro abrasive systems, other types of abrasives, laser cleaning methods and proprietary poultices for specialized applications. The material presented is supported by case study examples from an international selection of major buildings and monuments, where the techniques have recently been tried and tested.

Project Recovery Harold Kerzner, 2014-02-07 Best practices for picking up the pieces when projects fail There are plenty of books available offering best practices that help you keep your projects on track, but offer guidance on what to do when

the worst has already happened. Some studies show that more than half of all large-scale project fail either fail completely, or at least miss targeted budget and scheduling goals. These failures cost organizations time, money, and labor. Project Recovery offers wise guidance and real-world best practices for saving failed projects and recovering as much value as possible from the wreckage. Since failing project cannot be managed using the same lifecycle phases employed with succeeding projects, most project management professionals are unprepared to tackle the challenge of project recovery. This book presents valuable case studies and a recovery project lifecycle to help project managers identify and respond effectively to a troubled project. Includes case studies and best practices for saving failing projects or recovering projects that have already failed Written by experience project manager Howard Kerzner, the author of Project Management Best Practices, Third Edition Features proven techniques for performing project health checks and determining the degree of failure and the recovery options available Includes a new recovery lifecycle that includes phases and checklists for turning around failing projects With comprehensive case studies, checklists, worksheets, and cross listings to the appropriate project management body of knowledge, Project Recovery offers a much needed lifeline for managers facing the specter of failure.

The Vagabonds P. Paul Provost, 2011-08-22 Traveling, a passion of this author, has prompted me to share my experiences with others, especially senior readers. This group of people, of which I am a part, has not always been privileged to take time out to travel, for various reasons. Granted, it is an expensive venture, or hobby, however, it is great fun, adventurous and a wonderful opportunity to meet people of different cultures and living standards. As creatures of habit, we love to stay put and seldom find interest in leaving home, regardless of the occasion. This book, The Vagabonds, tells the story of the travels and adventures of a couple, husband and wife, who truly love to travel. It encompasses places here, in the United States of America, Europe, Asia, Africa, Canada, South America, New Zealand, Australia and many other places, including various islands and villages. This author is confident that this story will capture your attention and imagination. Surely you will be anxious to share it with relatives and friends. Once you've read this book, it will be as though you have taken the venture with us. My mission, and hope, is that more seniors will become interested and venture out on cruises, or other modes of travel, to places they have never trod before. Forget about Disneyland for a while. Be a Vagabond at least once in your life. My wife, Frances J., is the cruise mistress. She started me on the cruise circuit instead of land touring. This author sailed for twenty years, while in the U. S. Navy, and thought sea life was over for me. If anything, I should be thankful that my wife loves to sail, because we cruise together, as often as we can, and it is such a relaxing mode of travel. She inspired me to undertake this work, and is my personal editor. Her inspiration is very infectious. It was a success.

The 20th Century Mary Ellen Sterling, 1997-06 A brief overview of the political, economic, social, cultural, scientific, and technological advances of the twentieth century and introduces students to the individuals who made history in each decade. Includes suggested activities.

Music, Opera, Dance, and Drama in Asia, the Pacific, and North America ,2006

Rotch Travelling Fellowship 2011-2012 Christopher Karlson,2014-03-07 Through a year of travel supported by the Rotch Travelling Fellowship, a total of 35 examples of performing-arts-based architecture - spanning almost 240 years of civic metamorphosis - was observed in 28 autonomous cities using Europe's crowded and competitive urban network as a point of reference and comparative analysis. The intention is to investigate the results of such completed projects that encounter distinctive urban scales, cultural settings, and political footing - with focus on engagement in urban regeneration strategies (from localized communities to entire city districts) and the geopolitical desire to popularize in a globalized society. Of the selected observations, 16 were chosen as case studies that spotlight the planning and construction efforts in a 'post-Bilbao' period (from 1997- today) - representing almost 6 million square feet of new cultural space and over \$5 billion in capital investment.

Modern Theatres 1950-2020 David Staples,2021-04-28 *Modern Theatres 1950-2020* is an investigation of theatres, concert halls and opera houses in Asia, Europe, the Middle East and North and South America. The book explores in detail 30 of the most significant theatres, concert halls, opera houses and dance spaces that opened between 1950 and 2010. Each theatre is reviewed and assessed by experts in theatre buildings, such as architects, acousticians, consultants and theatre practitioners, and illustrated with full-colour photographs and comparative plans and sections. A further 20 theatres that opened from 2009 to 2020 are concisely reviewed and illustrated. An excellent resource for students of theatre planning, theatre architecture and architectural design, *Modern Theatres 1950 - 2020* discusses the role of performing arts buildings in cities, explores their public and performances spaces and examines the acoustics and technologies needed in a great building. This beautifully illustrated book is also a must-read for architects, theater designers, theatre historians, and theatre practitioners.

Meanjin Vol 74, No 4 Meanjin Quarterly,2015-12-01 The summer 2015 issue of Meanjin has a wonderful essay from author and academic Margaret Simons based on an extraordinary novella-length love letter from Germaine Greer to Martin Amis. Join Greer as she travels the United States in the late seventies, flushed with the success of *The Female Eunuch*, seeking comfort in the arms of her American lover, seeking out pharmaceuticals with Frank Zappa, poring over Solzhenitsyn and pining for home as she scrawls page after page addressed to Amis. Discover the architect who actually made Jorn Utzon's Sydney opera house work after Utzon fled the project leaving an empty and dysfunctional shell. Wonder what the Turkish secret police have made of Shane Maloney's latest unfinished novel. Read new fiction from John Kinsella, Nike Sulway and Omar Musa and fresh poetry from Erin Shiel, David Wood and more. Much more.
