**Exchanges between Literature and Science from the 1800s to the 2000s** Márcia Lemos, 2017-03-07 This collection of essays responds to the intense interest that the relations between the discourses of literature (and other cultural practices) and those of science have obtained throughout various fields of study. Spanning a period between the mid-nineteenth century and the twenty-first century, the work collected here is firmly focused on the cultural significance of scientific discoveries and practices, and especially on the manifold representations of science and scientists in literature and the arts. Its four sections develop from an initial moment of dwindling indefiniteness of borders between literature and the sciences to the historical perception of an increasing divide between “the two cultures,” to use C.P. Snow’s influential expression, as well as calls for a form of convergence or “consilience” in Edward Wilson’s words. The final section turns to the medical sciences, a porous scientific discipline in relation to the humanities, which suggests that consilience can already be found partially in specific areas. As such, this collection contributes towards critically extending that integration through the discussion of key literary representations of science, its promises, and its problems.

*Ciencia Pura*: Roiman Valbuena, 2023-10-09 Este libro *Ciencia Pura: Lógica de Procedimientos y Razonamientos Científicos* consiste en una segunda edición de la primera versión del 2017. Es una obra que cubre los temas de Filosofía de la Ciencia, epistemología, lógica, métodos de la física teórica, filosofía del espacio y el tiempo y aspectos varios acerca de temas científicos. Incluye nuevos conceptos como los de Epistemocracia Algorítmica e Intuerinoia. En esta obra se presenta el denominado Método AGEGUI Acto Fenoménico Guiado por Intuición, forma que tiene su autor para denominar a un método que se circunscribe a la exploración de problemas científicos partiendo de la intuición. El Método AFEGUI se basa en la idea de que lo que llamamos método científico, no es más que la descripción de un acto fenoménico que al contacto con alguna realidad específica e inquietante a la mente de quien la percibe, es guiado por dos tipos de intuiciones (dos tipos de ciencia distintas). Una fenoménica, epistémica, que se circunscribe a la parte sensible de aquel contacto, a lo que es explicable. Aquí actúa la abstracción eidética, además de la noesis y los noemas. El otro tipo de intuición alude y encumbra a lo ontológico, a lo intuitivo. A las características y particularidades del ser con el que se ha tenido contacto. Este segundo tipo de intuición es no sensible, por ende, se ubica en el mundo posible de lo noumenal. El método, de inicio a fin, es guiado

por lo que su autor denomina poiesis por fisicalismo. Donde poiesis denota a la capacidad creativa de los agentes científicos. Y, lo que los agentes crean no son más que formas de resolver problemas. Además de relaciones de primer y segundo grado, incluso con altos niveles de abstracción, que pueden dar como resulta un conjunto de ecuaciones aplicables al campo de la física y originadas a partir de un contacto fenoménico guiado por intuición, del cual se extraen objetos mentales que le son propios predicados del mismo tipo.

**LA INVESTIGACIÓN CIENTÍFICA AVANZADA** ROIMAN VALBUENA,2017-07-09 Libro dedicado a la investigación científica. Introduce a su vez, conceptos de inteligencia artificial y métodos de razonamiento bajo entornos probabilísticos e incertidumbre. Incluye un compendio acerca de la intuición científica. El razonamiento basado en procesos markovianos. El razonamiento bayesiano y la teoría estadística de la decisión. Contiene tópicos acerca de la investigación internivel y los razonamientos explicativos para este mismo nivel analítico. Sin separarse de las explicaciones puras y las causales.

**LA ESTRUCTURA DE LAS TEORIAS CIENTIFICAS** ROIMAN VALBUENA,2018-05-16 LIBRO DEDICADO AL DESARROLLO DE TEORÍAS CIENTIFICAS. SU MODELIZACIÓN, ARGUMENTACIÓN Y ELEMENTOS LÓGICOS QUE LAS FUNDAMENTAN. EN VARIOS CAPÍTULOS SE DESCRIBEN Y EXPLICAN LOS DENOMINADOS PROGRAMAS DE INVESTIGACIÓN CIENTIFICA. Casualidades? Karina Muzzupappa,2007-04 Have you ever experienced a moment when a seemingly random event also seemed strangely meaningful or even miraculous?. It can be as simple as anticipating a phone call, but coincidences always impress us. This is a book on coincidences, and how religion and science have studied that phenomenon.

**The Principles of Logic** F. H. Bradley,2011-12-08 F. H. Bradley (1846-1924) was the foremost philosopher of the British Idealist school, which came to prominence in the second half of the nineteenth century and remained influential into the first

half of the twentieth. Bradley, who was influenced by Hegel and also reacted against utilitarianism, was recognised during his lifetime as one of the greatest intellectuals of his generation, and was the first philosopher to receive the Order of Merit, in 1924. In this major work, originally published in 1883, Bradley discusses the basic principles of logic: judgment and inference. He rejects the idea of a separation between mind and body, arguing that human thought cannot be separated from its worldly context. In the second edition, published in 1922 and reissued here, Bradley added a commentary and essays, but left the text largely unaltered. Volume 1 contains Book 1 on judgment and Book 2 on inference.

**Sung Dynasty Uses of the I Ching** Kidder Smith, Peter K. Bol, Joseph A. Adler, Don J. Wyatt, 2016-04-19 The I Ching, or Book of Changes, has been one of the two or three most influential books in the Chinese canon. It has been used by people on all levels of society, both as a method of divination and as a source of essential ideas about the nature of heaven, earth, and humankind. During the eleventh and twelfth centuries, Sung dynasty literati turned to it for guidance in their fundamental reworking of the classical traditions. This book explores how four leading thinkers--Su Shih, Shao Yung, Ch'eng I, and Chu Hsi--applied the I Ching to these projects. These four men used the Book of Changes in strikingly different ways. Yet each claimed to find in it a sure foundation for human values. Their work established not only new meanings for the text but also new models for governance and moral philosophy that would be debated throughout the next thousand years of Chinese intellectual history. By focusing on their uses of the I Ching, this study casts a unique light on the complex continuity-within-change and rich diversity of Sung culture. Originally published in 1990. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**A Three-Pipe Problem** Julian Symons, 2014-07-01 Actor Sheridan Haynes had a preoccupation with Sherlock Holmes. So when the chance came for him to play the part in a TV series, his dreams had come true. And when London was plagued by a series of unsolved murders, it seemed natural for him to investigate. Was this a case of a misguided actor, or was

Sheridan actually on to something?

**The Conquests of Alexander the Great** Waldemar Heckel,2012-03-29 In this book, Waldemar Heckel traces the rise and eventual fall of one of the most successful military commanders in history. In 325 BCE, Alexander and his conquering army prepared to return home, after overcoming everything in their path: armies, terrain, climate, all invariably hostile. Little did they know that within two years their beloved king would be dead and their labours seemingly wasted. Tracing the rise and eventual fall of one of the most successful military commanders in history, Heckel engagingly and with great detail shows us how Alexander earned his appellation, The Great.

*As Kingfishers Catch Fire* Alex Preston,Neil Gower,2017-07-13 'Delightful . . . an original look at the literature inspired by Britain's birdlife' the Guardian, Best Nature Books of 2017 '[The] pages light up with feathered magic' Evening Standard When Alex Preston was 15, he stopped being a birdwatcher. Adolescence and the scorn of his peers made him put away his binoculars, leave behind the nature reserves and the quiet companionship of his fellow birders. His love of birds didn't disappear though. Rather, it went underground, and he began birdwatching in the books that he read, creating his own personal anthology of nature writing that brought the birds of his childhood back to brilliant life. Looking for moments 'when heart and bird are one', Preston weaves the very best writing about birds into a personal narrative that is as much about the joy of reading and writing as it is about the thrill of wildlife. Beautifully illustrated and illuminated by the celebrated graphic artist Neil Gower, *As Kingfishers Catch Fire* is a book to love and to hold, to return to again and again, to marvel at the way that authors across the centuries have captured the endless grace and variety of birds. It will make you look at birds, at the world, in a newer, richer light. 'A joyful and a wondrous book . . . Each bird illustrated by Gower in a mixture of gouache and watercolour that brings to mind both William Morris and Eric Ravilious' the Observer 'I can see it under the Christmas tree of every family with a bird feeder and a copy of the RSPB Handbook . . . Preston captures his birds beautifully' The Times

Life Class Diana Athill,2010 In a celebration of her life and writing, this collection brings together four of Diana Athill's best-loved memoirs, spanning her very English childhood, her life and loves during World War II, her publishing career at Andre Deutsch, and her reflections on old age.

*Russian Landscape* Patty Wageman, 2004

Daphne Du Maurier at Home Hilary Macaskill, 2013-06-01 Daphne du Maurier (1907-89) is the author of *Rebecca*, *Jamaica Inn*, *Frenchman's Creek*, *Don't Look Now* and *The Birds* among many others which continue to thrill and fascinate readers worldwide. The daughter of Sir Gerald du Maurier, the leading actor manager of his day, she grew up in a wildly imaginative 'Peter Pan' world peopled by London's leading writers and actors, before arriving in Cornwall at the age of 19. The place and its people inspired her to write her first novel *The Loving Spirit*, a work which so affected a young major in the Grenadier Guards, later Lieutenant-General Sir Frederick Browning, that he travelled to Fowey in his boat *Ygdrasil* to meet - and eventually to marry - the author. This bewitching evocation of place was to remain a feature of Daphne du Maurier's writing, and the source of much of her enduring popularity. Hilary Macaskill explores the homes and landscapes of Daphne du Maurier's life, and how these relate to her work in sometimes unexpected ways. Generously illustrated with little-seen material from the family archive as well as new colour photographs, this is a book which will enrich and transport anyone who has ever lost themselves between the covers of a Daphne du Maurier novel.
