Jorge F. Bujan

Cusco Ian Farrington,2013-06-18 One person's lifelong research pursuit is brought to fruition here, in the first major publication on the planning and archaeology of the Inka capital of Cusco. No other book to date has focused so extensively on the oldest existing city in the Americas, the "navel of the world" according to the Inka Empire, a fascinating and complex urban landscape that grew and evolved over 3,000 years of continuous human habitation.

Andean Foodways John E. Staller,2020-12-01 There is widespread acknowledgement among anthropologists, archaeologists, ethnobotanists, as well as researchers in related disciplines that specific foods and cuisines are linked very strongly to the formation and maintenance of cultural identity and ethnicity. Strong associations of foodways with culture are particularly characteristic of South American Andean cultures. Food and drink convey complex social and cultural meanings that can provide insights into regional interactions, social complexity, cultural hybridization, and ethnogenesis. This edited volume presents novel and creative anthropological, archaeological, historical, and iconographic research on Andean food and culture from diverse temporal periods and spatial settings. The breadth and scope of the contributions provides original insights into a diversity of topics, such as the role of food in Andean political economies, the transformation of foodways and cuisines through time, and ancient iconographic representations of plants and animals that were used as food. Thus, this volume is distinguished from most of the published literature in that specific foods, cuisines, and culinary practices are the primary subject matter through which aspects of Andean culture are interpreted.

Rethinking the Inka Frances M. Hayashida,Andrés Troncoso,Diego Salazar,2022-02-08 2023 Book Award, Society for American Archaeology A dramatic reappraisal of the Inka Empire through the lens of Qullasuyu. The Inka conquered an immense area extending across five modern nations, yet most English-language publications on the Inka focus on governance in the area of modern Peru. This volume expands the range of scholarship available in English by collecting new and notable research on Qullasuyu, the largest of the four quarters of the empire, which extended south from Cuzco into contemporary Bolivia, Argentina, and Chile. From the study of Qullasuyu arise fresh theoretical perspectives that both complement and challenge what we think we know about the Inka. While existing scholarship emphasizes the political and economic rationales underlying state action, Rethinking the Inka turns to the conquered themselves and reassesses imperial motivations. The book's chapters, incorporating more than two hundred photographs, explore relations between powerful

local lords and their Inka rulers; the roles of nonhumans in the social and political life of the empire; local landscapes remade under Inka rule; and the appropriation and reinterpretation by locals of Inka objects, infrastructure, practices, and symbols. Written by some of South America's leading archaeologists, *Rethinking the Inka* is poised to be a landmark book in the field.

The Inka Empire Izumi Shimada, 2015-06-01 Massive yet elegantly executed masonry architecture and andenes (agricultural terraces) set against majestic and seemingly boundless Andean landscapes, roads built in defiance of rugged terrains, and fine textiles with orderly geometric designs—all were created within the largest political system in the ancient New World, a system headed, paradoxically, by a single, small minority group without wheeled vehicles, markets, or a writing system, the Inka. For some 130 years (ca. A.D. 1400 to 1533), the Inka ruled over at least eighty-six ethnic groups in an empire that encompassed about 2 million square kilometers, from the northernmost region of the Ecuador-Colombia border to northwest Argentina. *The Inka Empire* brings together leading international scholars from many complementary disciplines, including human genetics, linguistics, textile and architectural studies, ethnohistory, and archaeology, to present a state-of-the-art, holistic, and in-depth vision of the Inkas. The contributors provide the latest data and understandings of the political, demographic, and linguistic evolution of the Inkas, from the formative era prior to their political ascendancy to their post-conquest transformation. The scholars also offer an updated vision of the unity, diversity, and essence of the material, organizational, and symbolic-ideological features of the Inka Empire. As a whole, *The Inka Empire* demonstrates the necessity and value of a multidisciplinary approach that incorporates the insights of fields beyond archaeology and ethnohistory. And with essays by scholars from seven countries, it reflects the cosmopolitanism that has characterized Inka studies ever since its beginnings in the nineteenth century.

A Culture of Stone Carolyn Dean, 2010-10-21 A major contribution to both art history and Latin American studies, *A Culture of Stone* offers sophisticated new insights into Inka culture and the interpretation of non-Western art. Carolyn Dean focuses on rock outcrops masterfully integrated into Inka architecture, exquisitely worked masonry, and freestanding sacred rocks, explaining how certain stones took on lives of their own and played a vital role in the unfolding of Inka history. Examining the multiple uses of stone, she argues that the Inka understood building in stone as a way of ordering the chaos of unordered nature, converting untamed spaces into domesticated places, and laying claim to new territories. Dean contends that understanding what the rocks signified requires seeing them as the Inka saw them: as potentially animate, sentient, and sacred. Through careful analysis of Inka stonework, colonial-period accounts of the Inka, and contemporary ethnographic and folkloric studies of indigenous Andean culture, Dean reconstructs the relationships between stonework and other aspects of Inka life, including imperial expansion, worship, and agriculture. She also scrutinizes meanings imposed on Inka stone by the colonial Spanish and, later, by tourism and the tourist industry. *A Culture of Stone* is a compelling multidisciplinary argument for rethinking how we see and comprehend the Inka past.

The Archaeology of Wak'as Tamara L. Bray, 2015-02-15 In this edited volume, Andean wak'as—idols, statues, sacred places, images, and oratories—play a central role in understanding Andean social philosophies, cosmologies, materialities, temporalities, and constructions of personhood. Top Andean scholars from a variety of disciplines cross regional, theoretical, and material boundaries in their chapters, offering innovative methods and theoretical frameworks for interpreting the cultural particulars of Andean ontologies and notions of the sacred. Wak'as were understood as agentive, nonhuman persons within many Andean communities and were fundamental to conceptions of place, alimentation, fertility, identity, and memory and the political construction of ecology and life cycles. The ethnohistoric record indicates that wak'as were thought to speak, hear, and communicate, both among themselves and with humans. In their capacity as nonhuman persons, they shared familial relations with members of the community, for instance, young women were wed to local wak'as made of stone and wak'as had sons and daughters who were identified as the mummified remains of the community's revered ancestors. Integrating linguistic, ethnohistoric, ethnographic, and archaeological data, *The Archaeology of Wak'as* advances our understanding of the nature and culture of wak'as and contributes to the larger theoretical discussions on the meaning and role of "the sacred" in ancient contexts.

Lonely Planet Argentina Lonely Planet,

Objects of Empire Tamara L. Bray, 2025 The beautiful polychrome ceramics of the imperial Inca state have long been noted for their uniformity, so much so that it was once said a whole jar could be reconstructed from a single shard. This book is an attempt to move beyond the seen one, seen 'em all mentality. There is evidence of mass production, yes, but the widespread distribution of Inca state pottery and the high degree of standardization hint at the importance of this particular category of material culture to the imperial project. Despite that significance, relatively little comparative work has been undertaken. This book shows the variability and rich semiotic content of imperial Inca pots, and in doing so, it advances our understanding of how power and legitimacy are produced and reproduced through the material culture of daily life. Bray takes a comparative, empire-wide approach, making it clear that Inca pottery is not as homogeneous as it is thought to be. Her book works through what constitutes the state style, as well as the parameters and significance of the variability. From there, she takes up the more socially significant questions of where, when, and why deviations from the norm occurred. Focusing on variations in the material assemblages and approaches helps illuminate the strategies of territorial expansion and political control that lay at the heart of the Inca juggernaut, as well as the role of objects in the calculus of would-be rulers and subjects--

Cultural Astronomy In Latin America Steven Gullberg, Cesar Augusto Zen Vasconcellos, 2024-02-06 This book provides a unique view of Astronomy in Culture, Archaeoastronomy and Ethnoastronomy involving ancient civilizations in Latin America, emphasizing scientific and cultural knowledge combined with historical, cognitive, archaeological and

anthropological aspects. Topics covered in the book include different associations of ancient civilizations with the stars and planets, whether in farming, architecture, social organization, beliefs, myths, religion, metric systems, calendar construction, shrines, and variations in astronomical research methods based on the types of material evidence available. Special attention is paid to the war cycles associated with observed celestial events, day-counting calendars, including movements in the sky and written evidences from codices, and in particular the Andean and Inca traditions of astronomically associated shrines, caves and celestial alignments of monuments and temples.

Ceramics of the Indigenous Cultures of South America Michael D. Glascock, Hector Neff, Kevin J.

Vaughn, 2019-03-15 This cohesive edited volume showcases data collected from more than seven thousand ceramic artifacts including pottery, figurines, clay pipes, and other objects from sites across South America. Covering a time span from 900 BC to AD 1500, the essays by leading archaeologists working in South America illustrate the diversity of ceramic provenance investigations taking place in seven different countries. An introductory chapter provides a background for interpreting compositional data, and a final chapter offers a review of the individual projects. Students, scholars, and researchers in archaeological study on the interactions between the indigenous peoples of South America and studies of their ceramics will find this volume an invaluable reference.

Foodways of the Ancient Andes Marta P Alfonso-Durruty, Deborah E Blom, 2023-04-18 Eating is essential for life, but it also embodies social and symbolic dimensions. This volume shows how foods and peoples were mutually transformed in the ancient Andes. Exploring the multiple social, ecological, cultural, and ontological dimensions of food in the Andean past, the contributors of Foodways of the Ancient Andes offer diverse theoretical perspectives and methodological approaches that reveal the richness, sophistication, and ingenuity of Andean peoples. The volume spans time periods and localities in the Andean region to reveal how food is intertwined with multiple aspects of the human experience, from production and consumption to ideology and sociopolitical organization. It illustrates the Andean peoples' resilience in the face of challenges brought about by food scarcity and environmental change. Chapters dissect the intersection of food, power, and status in early states and empires; examine the impact of food during times of conflict and instability; and illuminate how sacred and high-status foods contributed to the building of the Inka Empire. Featuring forty-six contributors from ten countries, the chapters employ new analytical methods, integrating different food data and interdisciplinary research to show that food can provide not only simple nutrition but also a multitude of strategies, social and political relationships, and ontologies that are otherwise invisible in the archaeological record. The Oxford Handbook of the Incas Sonia Alconini Mujica, R. Alan Covey, 2018 The Oxford Handbook of the Incas aims to be the first comprehensive book on the Inca, the largest empire in the pre-Columbian world. Using archaeology, ethnohistory and art history, the central goal of this handbook is to bring together recent research conducted by experts from different fields that study the Inca empire, from its origins and expansion to its demise and continuing influence in contemporary times.

Political Landscapes of the Late Intermediate Period in the Southern Andes Alina Álvarez Larrain, Catriel Greco, 2018-04-18 This book studies the relationship between pukaras and their surrounding landscape, focusing on the architectural and settlement variability registered in both contexts. It is the outcome of a symposium held at the XIX National Congress of Argentine Archaeology (San Miguel de Tucuman, August 8-12, 2016) entitled, Pukaras, strategic settlements and dispersed settlements: Political landscapes of the Late Intermediate Period in the Southern Andes. Based on the topics discussed at the event, this book presents nine case studies covering a large geographic area within the Southern Andes (northwestern Argentina, northern Chile and southern Bolivia), and breaking the national barriers that tend to atomize pre-Hispanic landscapes. The respective chapters cover a wide range of themes: from architectural and settlement variability, ways to build and inhabit space, social segmentation and hierarchy; to endemic conflict, analysis of accessibility and visibility, spatiality and temporality of landscapes; as well as new dating. This book goes beyond the Late Intermediate Period (LIP) analyses from the perspective of fortified settlements and material evidence related to war, by placing the focus on how ancient political landscapes were constructed from the relation between the pukaras and other sites as part of the same territory. The methodologies used include pedestrian surveys, photogrammetric surveys with UAVs (unmanned aerial vehicles) or drones, topographic and architectural surveys, excavations of households, ceramic and rock art analysis, and spatial analysis with geographic information systems (GISs). Given the numerous thematic interconnections between the contributions, the Editors have organized the chapters geographically, moving from south to north: from the southern valleys of Catamarca Province in Argentina to Lipez in the southern part of the Bolivian Altiplano, passing through the Calchaqui valleys of Catamarca, the puna and Quebrada de Humahuaca of Jujuy in northwest Argentina and the Antofagasta region in northern Chile. The book provides valuable new theoretical and methodological perspectives on the study of political landscapes of the Late Intermediate Period in the Southern Andes .

Nature(s) in Construction María Lelia Pochettino, Aylene Capparelli, Pablo C. Stampella, Diego Andreoni, 2024-09-14 This

book provides the state of the art of ethnobiology in Argentina and related Latin American countries, highlighting timely trends and topics. It synthesizes studies resulting from the III Jornadas Argentinas de Etnobiología y Sociedad (III JAES—3rd Argentinian Meeting of Ethnobiology and Society), convened in La Plata in 2021. As a relatively new academic development, ethnobiology integrates approaches from different points of view, such as biology, anthropology, geography, history, linguistics, and, in a crucial recent advance, local perspectives. Consequently, this volume contains 33 contributions from 86 authors of different countries, orientations, and disciplines—but all related to interrelationships between people/s and the natural environment. Chapters cover a diverse array of topics, ranging from biocultural relationships and their historical construction through time to conservation of biocultural and agrobiodiversity, ethnomycology, ethnophycology, and meliponiculture and beyond. The volume's main goal is to propitiate the preservation of biocultural diversity through the application of ethnobiological wisdom in a global context characterized by the accelerated loss of traditional knowledge. The contributions aim to transcend the nature/culture dichotomy, emphasizing the inextricable relationship between communities and their environment and the importance of acting jointly in the construction of the inhabited landscape and local identity.

La alimentación en la América precolombina y colonial Aylén Capparelli, Alexandre Chevalier, Raquel Piqué, 2009 El presente volumen tiene como objetivo contribuir al conocimiento sobre la variabilidad de los modos de alimentación en las sociedades precolombinas y coloniales. Se trata de un conjunto de trabajos (desde disciplinas como la arqueología y la antropología física) que se centran sobre todo en estudios de casos realizados en Argentina, Brasil, Colombia, México y Perú, pero que trascienden a los casos particulares en ellos presentados. La vastedad de las temáticas tratadas, permite ahondar en aspectos como la subsistencia en sociedades cazadoras-recolectoras, primeras sociedades agrícolas, las sociedades preindustriales, y de esta manera aportar elementos para la reflexión sobre el papel que los alimentos, su obtención, procesado y consumo, tuvieron en estas sociedades.

Handbook of South American Archaeology Helaine Silverman, William Isbell, 2008-04-06 Perhaps the contributions of South American archaeology to the larger field of world archaeology have been inadequately recognized. If so, this is probably because there have been relatively few archaeologists working in South America outside of Peru and recent advances in knowledge in other parts of the continent are only beginning to enter larger archaeological discourse. Many ideas of and about South American archaeology held by scholars from outside the area are going to change irrevocably with the appearance of the present volume. Not only does the Handbook of South American Archaeology (HSAA) provide immense and broad information about ancient South America, the volume also showcases the contributions made by South Americans to social theory. Moreover, one of the merits of this volume is that about half the authors (30) are South Americans, and the bibliographies in their chapters will be especially useful guides to Spanish and Portuguese literature as well as to the latest research. It is inevitable that the HSAA will be compared with the multi-volume Handbook of South American Indians (HSAI),

with its detailed descriptions of indigenous peoples of South America, that was organized and edited by Julian Steward. Although there are heroic archaeological essays in the HSAI, by the likes of Junius Bird, Gordon Willey, John Rowe, and John Murra, Steward states frankly in his introduction to Volume Two that “arch- ology is included by way of background” to the ethnographic chapters.
