Ironhand Charlie Fletcher,2008 'Edie,' said George, 'we're going to do this together. I'll be right there with you. Anything, anyone trying to get you is going to have to come past me first.' But when George makes his promise he is not aware that high on the rooftops an unseen gargoyle is watching them hungrily, quivering with anticipation for the moment when it will unfold its stone wings and pounce. The thing on the roof knows that nothing is over; nothing is finished. Ironhand takes us deeper into the layers of un-London, the place where the good and the bad statues, the spits and the taints, walk and war. George and Edie must repay the debt which they owe the Gunner for his sacrifice. They must face unspeakable danger and doubt if they are to save him. This second title in the Stoneheart sequence by Charlie Fletcher will shake you with its

imaginative grasp and vision. It is an epic excitement, not to be missed ...

La Imaginacion Tecnica Beatriz Sarlo,2003-06-01 In what Beatriz Sarlo calls six episodes, ranging from the proto-science fiction of Horacio Quiroga and the apocalyptic urban surrealism of Roberto Arlt through the development of mass media, tales of inventors and inventions, and an entertaining tour of weird science and medical quackery. The Technical Imagination examines how technology entered the popular imagination in 1920s and 1930s Argentina. Often wry, but always sympathetic, and dispensing erudition with a light touch, Sarlo shows how the products of modern technology (radio, the telephone and telegraph, movies, and rudimentary forays into television, among other phenomena) announced an unprecedented break with the past while also provoking an ironic recrudescence of age-old superstitions. Although the new technologies helped to shape notions of modernity at all levels of Argentine society, Sarlo focuses particularly on the working-class amateur inventors of Buenos Aires, and on how their inventions - even when they failed, as they frequently did - point to what can be recognized today as the reorganization of an intellectual hierarchy, and thus of an era's, and a culture's, intellectual history.--BOOK JACKET.

El cacao Guayaquil en nueva España, 1774-1812 (política imperial, mercado y consumo) Manuel Miño Grijalva,2014-01-30 Esta obra analiza la presencia del cacao originado en las costas del Guayas (Ecuador) conocido en el mercado mundial como cacao guayaquil. El estudio se centra en el intercambio comercial con Nueva España y los vericuetos de la prohibición comercial entre colonias. Muestra, por una parte, el carácter imperialista de la corona que gobernó sus posesiones del Nuevo Mundo como colonias más que como reinos en el aspecto económico, aunque una de las primeras cosas que el tráfico del cacao puso en evidencia es que la prohibición de la Corona del siglo XVII no detuvo la exportación de cacao, aunque sí frenó el crecimiento de Guayaquil. Por otra parte, la investigación establece el tráfico naviero, los montos de las cargas de cacao que arribaron a Acapulco y las manifestaciones de los precios en el mercado de la ciudad de México y trata de demostrar que la oferta creciente de cacao guayaquil, ayudó a mantener los precios estables en un contexto general de crecimiento de los precios en la segunda parte del siglo XVIII.

An Outline of Psychology William McDougall,2007-03 This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: ...earth. r' = radius of moon, or other body. P = moon's horizontal parallax = earth's angular semidiameter as seen from the moon. f = moon's angular semidiameter. Now $f = P$ (in circular measure), $r' - r = r$ (in circular measure);'. $r : r' :: P : P'$, or (radius of earth): (radius of moon):: (moon's parallax): (moon's semidiameter). Examples. 1. Taking the moon's horizontal parallax as $57'$, and its angular diameter as $32'$, find its radius in miles, assuming the earth's radius to be 4000 miles. Here moon's semidiameter = $16'$;-. $4000 :: 57' : 16'$;-. $r = 400 \frac{16}{57} = 1123$ miles. 2. The sun's horizontal parallax being 88 , and his angular diameter $32V$ find his diameter in miles. ' Am. 872,727 miles. 3. The synodic period of

Venus being 584 days, find the angle gained in each minute of time on the earth round the sun as centre. Am. 1-54 per minute. 4. Find the angular velocity with which Venus crosses the sun's disc, assuming the distances of Venus and the earth from the sun are as 7 to 10, as given by Bode's Law. Since (fig. 50) S V: VA:: 7: 3. But Srhas a relative angular velocity round the sun of 1-54 per minute (see Example 3); therefore, the relative angular velocity of A V round A is greater than this in the ratio of 7: 3, which gives an approximate result of 3-6 per minute, the true rate being about 4 per minute. Annual ParaUax. 95. We have already seen that no displacement of the observer due to a change of position on the earth's surface could apparently affect the direction of a fixed star. However, as the earth in its annual motion describes an orbit of about 92 million miles radius round the sun, the different positions in space from which an observer views the fixed stars from time to time throughout the year must be separated ...

Yuruparí Gerardo Reichel-Dolmatoff, 1996 Through Gerardo Reichel-Dolmatoff's translations and commentaries of the yuruparí fertility mythologem and ritual complex, Tukano oral art is revealed as an important expression of tribal philosophical and religious thought. The four Tukano texts in this volume contain coded cultural history and lead us into the meaning of oral traditions.

Entiendes? Emilie L. Bergmann, 1995 ¿Entiendes? is literally translated as Do you understand? Do you get it? But those who do get it will also hear within this question a subtler meaning: Are you queer? Are you one of us? The issues of gay and lesbian identity represented by this question are explored for the first time in the context of Spanish and Hispanic literature in this groundbreaking anthology. Combining intimate knowledge of Spanish-speaking cultures with contemporary queer theory, these essays address texts that share both a common language and a concern with lesbian, gay, and bisexual identities. Using a variety of approaches, the contributors tease the homoerotic messages out of a wide range of works, from chronicles of colonization in the Caribbean to recent Puerto Rican writing, from the work of Cervantes to that of the most outrageous contemporary Latina performance artists. This volume offers a methodology for examining work by authors and artists whose sexuality is not so much open as an open secret, respecting, for example, the biographical privacy of writers like Gabriela Mistral while responding to the voices that speak in their writing. Contributing to an archeology of queer discourses, ¿Entiendes? also includes important studies of terminology and encoded homosexuality in Argentine literature and Caribbean journalism of the late nineteenth century. Whether considering homosexual panic in the stories of Borges, performances by Latino AIDS activists in Los Angeles, queer lives in turn-of-the-century Havana and Buenos Aires, or the mapping of homosexual geographies of 1930s New York in Lorca's Ode to Walt Whitman, ¿Entiendes? is certain to stir interest at the crossroads of sexual and national identities while proving to be an invaluable resource.

Hidden Terrors A. J. Langguth,2018-07-17 A “devastating” exposé of the United States’ Latin American policy and the infamous career and assassination of agent Dan Mitrione (Kirkus Reviews). In 1960, former Richmond, Indiana, police chief Dan Mitrione moved to Brazil to begin a new career with the United States Agency for International Development. During his ten years with the USAID, Mitrione trained and oversaw foreign police forces in extreme counterinsurgency tactics—including torture—aimed at stomping out communism across South America. Though he was only a foot soldier in a larger secret campaign, he became a symbol of America’s brutal interventionism when he was kidnapped and executed by Tupamaro rebels in Montevideo, Uruguay. In *Hidden Terrors*, former New York Times Saigon bureau chief A. J. Langguth chronicles with chilling detail Mitrione’s work for the USAID on the ground in South America and Washington, DC, where he shared his expertise. Along the way, Langguth provides an authoritative overview of America’s efforts to destabilize communist movements and prop up military dictators in South America, presenting a “powerful indictment of what the United States helped to bring about in this hemisphere” (The New York Times). Even today, the tactics Mitrione helped develop continue to influence operations in Guantanamo Bay, Cuba, and black sites around the globe.

Britain at the Turn of the Twenty-First Century ,2016-08-22 At the turn of the twenty-first century Britain is in a state of change. It is being transformed by the ongoing process of devolution as well as by its increasing multi-ethnicity. At the same time the relationship with the European Union remains controversial. This book charts these transformations in the context of the changes Britain experienced a century ago, at the turn of the twentieth century. Focusing on British politics, culture and literature the articles examine a range of topics, including models of utopian and apocalyptic thought, the contemporary celebrity cult, the state of literary theory in Britain and the recent “boom” in lyrical poetry and the “drama of blood and sperm”.
