

Introducción A La Retórica Y La Argumentación

Jorge Fernández Ruiz

Introducción a la retórica jurídica ,

Introducción a la teoría de la argumentación Luis Vega-Reñón,2017-08-05 Argumentar es casi tan natural como conversar. En realidad, toda argumentación es una forma de conversación. Argumentamos cuando damos razones a favor o en contra de una propuesta, para sentar una opinión o rebatir la contraria, para defender una solución o para suscitar un problema. Argumentamos cuando aducimos normas, valores o motivos para orientar en cierta dirección el sentir de un auditorio o el ánimo de un jurado, para fundar un veredicto, para justificar una decisión o para descartar una opción. Argumentamos cuando procuramos, en cualquier suerte de escrito, convencer al lector de ciertas ideas, posturas, actitudes, o prevenirlo frente a otras. Este libro trata sobre esta actividad fundamental que desarrollamos en nuestra vida diaria. El autor nos introduce al estudio de la teoría de la argumentación a partir de ejemplos de la vida cotidiana, permitiendo de este modo, sin perder rigor académico, persuadirnos y animarnos a su lectura desde sus primeras páginas. Argumentación, Derecho Tributario y casos difíciles Jaime Lara,2022-06-02 En esta obra se realiza un estudio de metajurisprudencia sobre casos de lagunas y antinomias en Derecho Tributario, conocidos también como casos difíciles, con la particularidad que el referido análisis no se limita a constatar lo que los jueces dicen que hacen en sus respectivas sentencias con relación a los mencionados casos, sino que tiene la pretensión de comprobar lo que los jueces efectivamente

hacen con sus sentencias, aún cuando no lo digan: colmar lagunas y resolver antinomias. En el contexto del Estado Legal de Derecho se sostuvo que el Derecho Tributario no contenía lagunas, como consecuencia de la centralidad del principio de legalidad en la referida área. Al ser visto a la luz del positivismo teórico, el Derecho era concebido como pleno y carente de antinomias. Después de la Segunda Guerra Mundial, el modelo de Estado ha evolucionado hacia el Estado Constitucional de Derecho y sus bases teóricas se han reformulado a la luz del constitucionalismo. Hoy se admite que la Constitución contiene principios morales con valor normativo, hay control de la constitucionalidad de las leyes, el principio de legalidad ha cedido su supremacía al principio de constitucionalidad, entre otros caracteres. En consecuencia, hoy ya no hay objeción para admitir que, en casos excepcionales, pueda haber lagunas y antinomias susceptibles de integración en el Derecho Tributario. Este estudio de jurisprudencia así lo demuestra. JAIME LARA MÁRQUEZ es abogado por la Pontificia Universidad Católica del Perú y magíster en derecho con mención en Derecho Civil por la misma universidad. Su tesis de maestría fue premiada por la Asamblea Nacional de Rectores. Es máster en Argumentación Jurídica por la Universidad de Alicante en España. Ha cursado estudios de maestría en Política y Administración Tributaria en la Universidad Nacional Mayor de San Marcos. Es doctor en derecho por la Pontificia Universidad Católica del Perú, habiéndose graduado con mención de sobresaliente. Se desempeña como profesor de Argumentación Jurídica en la Facultad de Derecho de la Pontificia Universidad Católica del Perú, como profesor de Derecho Tributario, de Derecho de las Finanzas Públicas y de Razonamiento Jurídico en la Facultad de Derecho de la Universidad Nacional Mayor de San Marcos y profesor de Interpretación y Argumentación Jurídica en la Academia de la Magistratura. Es miembro del Instituto Peruano de Derecho Tributario (IPDT) y del Instituto Peruano de Investigación y Desarrollo Tributario (IPIDET).

Manual de argumentación en la literatura Alberto Vital Díaz, Alfredo Barrios Hernández, 2023-03-08 Si bien argumentar constituye una de las ocupaciones fundamentales en los estudios del discurso y de la retórica desde la antigüedad clásica, también cumple un papel cardinal en nuestro ámbito comunicativo de la vida fáctica, y por ende, en la literatura, disciplina que se encarga de la representación humana y de sus relaciones y actividades por medio de la lengua oral y escrita. Este Manual de argumentación en la literatura asume la tarea de analizar un gran tema gracias a una recopilación de textos que abordan diversas perspectivas, entre las que cabe destacar las nociones aristotélicas de logos, ethos y pathos, elementos de la retórica que se involucran directamente en el acto de argumentar. De esta manera, el compromiso con la verdad, la lógica del discurso y el papel de las emociones son aquí presentados como herramientas útiles en las dinámicas de razonamiento y persuasión en las obras literarias.

The Poetics of Aristotle Aristotle, 1920

A Systematic Theory of Argumentation Frans H. van Eemeren, Robert Grootendorst, Rob Grootendorst, 2004 In this

book two of the leading figures in argumentation theory present a view of argumentation as a means of resolving differences of opinion by testing the acceptability of the disputed positions. Their model of a 'critical discussion' serves as a theoretical tool for analyzing, evaluating and producing argumentative discourse. This is a major contribution to the study of argumentation and will be of particular value to professionals and graduate students in speech communication, informal logic, rhetoric, critical thinking, linguistics, and philosophy.

Fallacies C. L. Hamblin, 2022-03-18 C. L. (Charles Leonard) Hamblin (1922–1985) received his undergraduate degree in philosophy, mathematics, and physics and an M.A. in philosophy at Monash University. He received a Ph.D. at the London School of Economics in language and information theory. From 1955 to 1985 he was Lecturer then Professor in the School of Philosophy of the University of New South Wales, making lasting contributions to both philosophy and computer science. Hamblin's *Fallacies* was the first full-length scholarly book on fallacies since the Middle Ages, and arguably since Aristotle's *Sophistical Refutations* itself. Jim Mackenzie, *Informal Logic* As important as it is as a historical study, Hamblin's *Fallacies* is even more important today for its signal contribution to our understanding and analysis of informal arguments. . . . with its extensive historical overview and sharp analyses of the logical fallacies. John Plecnik and John Hoaglund *The Advanced Reasoning Forum* is pleased to make available this reproduction of the 1970 text with a preface from 1986 in its *Classic Reprints* series.

Introducción a la teoría de la argumentación Fernando Leal Carretero, Carlos Ramírez González, Víctor Favila Vega, 2020-10-08 Hay muchas razones para estar insatisfechos y aun por momentos desesperados con respecto a las habilidades para leer y escribir que presentan los de por sí pocos mexicanos que acceden a la educación media superior y superior, por no decir los poquísimos que se gradúan e incluso emprenden estudios de posgrado. Con mucha frecuencia escuchamos los lamentos acerca de la falta de comprensión de textos leídos, así como de los errores de ortografía, puntuación y en general redacción de los textos escritos por ellos. Con todo, una de las fallas más profundas y de mayores consecuencias, pero a la vez de las menos claramente percibidas y conceptualizadas, es la de la capacidad de razonar y argumentar. Suele distinguirse entre tres grandes tipos de texto: narrativos, descriptivos y argumentativos. Aunque la distinción es gruesa, es una buena distinción. Partiendo de ella, habría que decir que es sin duda importante que los jóvenes estén en posición de comprender y construir textos narrativos y descriptivos; pero lo que con frecuencia olvidamos es que desde el punto de vista de una educación académica sería los textos narrativos y descriptivos son instrumentos necesarios, pero no suficientes, para las argumentaciones. No basta que nuestros jóvenes cuenten historias y describan situaciones; tales narraciones y descripciones son en parte el material para hacer argumentaciones, y en parte requieren de argumentación para construirse bien. Cuando decimos que una narrativa tiene agujeros o que una descripción es caótica, lo que queremos

decir es que les subyace una argumentación defectuosa.

Introducción a la historia de la filosofía Ramón Xirau,2000 Por que la vida?, para que nuestra vida? A esta necesidad de interrogarnos y respondernos sobre el modo de ser para encontrarle sentido a la vida responde la parte mas antigua y esencial de la filosofía: la metafísica, que es el fundamento de nuestro comportamiento, de nuestra vida ética. Reconociendo otros aspectos filosóficos estrechamente vinculados con ella: el método, la teoría del conocimiento, la moral, Xirau propone entender la filosofía como una cuestión que trasciende la vida misma: convivir con el pensamiento de los tiempos pasados, pues siempre los hombres se han planteado esas preguntas, tal como lo hacen cada uno de los filósofos que se explican en esta obra a través de su presentación histórica en tres periodos: grecorromano, cristiano-medieval y renacentista-moderno.

Alfonso Reyes y la historia de América Houvenaghel, Eugenia,2021-10-01 A partir de la idea de que no existe interpretación histórica inocente, la autora analiza la postura adoptada por Alfonso Reyes en sus ensayos del México prehispánico al siglo xx. Según Houvenaghel, Reyes se valió de distintas formas literarias al exponer una argumentación que conciliara los intereses de hispanistas e indigenistas para llegar a la identidad hispanoamericana.
