Almacenes generales de depósito Hernando Beltrán Angel,1977

Sistema de Clasificación Industrial de América del Norte, México. SCIAN 2007 INEGI,2008-01-01 El presente documento muestra la estructura de clasificación que comparten Canadá, Estados Unidos y México y el detalle de las actividades económicas de nuestro país. Al compartir bases comunes, el SCIAN permite la comparación de las estadísticas económicas de los tres países de Norteamérica. Cabe señalar que en el SCIAN se tiene comparabilidad conceptual en el sentido de que se usa, en la medida de lo posible, el mismo marco conceptual para su construcción, el de proceso de producción o función de producción, y que las limitaciones debidas a consideraciones prácticas han sido acordadas o aceptadas explícitamente de manera trilateral. En el contexto del SCIAN se entiende como comparable el que los países socios en la construcción del clasificador estén de acuerdo en el mismo contenido de las categorías trilaterales una categoría trilateral es aquella en la que los tres países manifiestan estar de acuerdo en su contenido y ese compromiso conlleva a que no se rebasen los límites cuando esas categorías se desagregan en categorías nacionales. El objetivo del SCIAN MÉXICO es proporcionar un marco único, consistente y actualizado para la recopilación, análisis y presentación de estadísticas de tipo económico, que refleje la estructura de la economía mexicana. El SCIAN MÉXICO es la base para la generación, presentación y difusión de todas las estadísticas económicas del INEGI. Su adopción por parte de otras instituciones que también elaboran estadísticas permitirá homologar la información económica que se produce en el país, y con ello contribuir a la de la región de América del Norte. autoportantes, medios mecánicos para la manutención y sistemas para la preparación de pedidos. Esta obra, profusamente ilustrada, aborda cada uno de los elementos y procedimientos que intervienen en el almacenamiento de materiales, desde la propia ubicación física del almacén hasta los sistemas de gestión y los recursos tecnológicos necesarios para desarrollar los procesos logísticos que tienen lugar en su interior.
