

The Hiv Hoax 2000 Virologists Cannot Be Wrong Kary Mullis

Seth C. Kalichman

The HIV Hoax Captain Obvious, Peter Duesberg, Kary Mullis, 2014-12-09 Dr. Kary Mullis, Biochemist, 1993 Nobel Prize for Chemistry: Dr. Kary Mullis If there is evidence that HIV causes AIDS, there should be scientific documents which either singly or collectively demonstrate that fact, at least with a high probability. There is no such document. (Sunday Times (London) 28 nov. 1993) Dr. Heinz Ludwig Sanger, Emeritus Professor of Molecular Biology and Virology, Max-Planck-Institutes for Biochemistry, Munchen. Robert Koch Award 1978: Up to today there is actually no single scientifically really convincing evidence for the existence of HIV. Not even once such a retrovirus has been isolated and purified by the methods of classical virology. (Letter to Suddeutsche Zeitung 2000) Dr. Serge Lang, Professor of Mathematics, Yale University: I do not regard the causal relationship between HIV and any disease as settled. I have seen considerable evidence that highly improper statistics concerning HIV and AIDS have been passed off as science, and that top members of the scientific establishment have carelessly, if not irresponsible, joined the media in spreading misinformation about the nature of AIDS. (Yale Scientific, Fall 1994) Dr. Harry Rubin, Professor of Molecular and Cell Biology, University of California at Berkeley: Prof. Harry Rubin It is not proven that AIDS is caused by HIV infection, nor is it proven that it plays no role whatever in the syndrome. (Sunday Times (London) 3 April 1994) Dr. Richard Strohman, Emeritus Professor of Cell Biology at the University of California at Berkeley: In the old days it was required that a scientist address the possibilities of proving his hypothesis wrong as well as right. Now there's none of that in standard HIV-AIDS program with all its billions of dollars. (Penthouse April 1994) Dr. Harvey Bialy, Molecular Biologist, former editor of Bio/Technology and Nature Biotechnology: Harvey Bialy HIV is an ordinary retrovirus. There is nothing about this virus that is unique. Everything that is discovered about HIV has an analogue in other retroviruses that don't cause AIDS. HIV only contains a very small piece of genetic information. There's no way it can do all these elaborate things they say it does. (Spin June 1992) Dr. Roger Cunningham, Immunologist, Microbiologist and Director of the Centre for Immunology at the State University of New York at Buffalo: Unfortunately, an AIDS 'establishment' seems to have formed that intends to discourage challenges to the dogma on one side and often insists on following discredited ideas on the other. (Sunday Times (London) 3 April 1994) Dr. Gordon Stewart, Emeritus Professor of

Public Health, University of Glasgow: Prof. Gordon Stewart AIDS is a behavioural disease. It is multifactorial, brought on by several simultaneous strains on the immune system - drugs, pharmaceutical and recreational, sexually transmitted diseases, multiple viral infections. (Spin June 1992) Dr. Alfred Hassig, (1921-1999), former Professor of Immunology at the University of Bern, and former director Swiss Red Cross blood banks: Prof. Alfred Hassig The sentence of death accompanying the medical diagnosis of AIDS should be abolished. (Sunday Times (London) 3 April 1994) Dr. Charles Thomas, former Professor of Biochemistry, Harvard and John Hopkins Universities: The HIV-causes-AIDS dogma represents the grandest and perhaps the most morally destructive fraud that has ever been perpetrated on young men and women of the Western world. (Sunday Times (London) 3 April 1994) Dr. Joseph Sonnabend, New York Physician, founder of the American Foundation for AIDS Research (AmFAR): Joe Sonnabend The marketing of HIV, through press releases and statements, as a killer virus causing AIDS without the need for any other factors, has so distorted research and treatment that it may have caused thousands of people to suffer and die. (Sunday times (London) 17 May 1992) Read the book. You are about to find out how sick the CDC and Government are

Inventing the AIDS Virus Peter H. Duesberg, 1998-05-01 Investigates the political and financial forces that have shaped AIDS research, including the growing dissension within scientific ranks, the power politics among virologists, and other controversial issues

Dancing Naked in the Mind Field Kary Mullis, 2010-11-17 Here is a multidimensional playland of ideas from the world's most eccentric Nobel-Prize winning scientist. Kary Mullis is legendary for his invention of PCR, which redefined the world of DNA, genetics, and forensic science. He is also a surfer, a veteran of Berkeley in the sixties, and perhaps the only Nobel laureate to describe a possible encounter with aliens. A scientist of boundless curiosity, he refuses to accept any proposition based on secondhand or hearsay evidence, and always looks for the money trail when scientists make announcements. Mullis writes with passion and humor about a wide range of topics: from global warming to the O. J. Simpson trial, from poisonous spiders to HIV, from scientific method to astrology. *Dancing Naked in the Mind Field* challenges us to question the authority of scientific dogma even as it reveals the workings of an uncannily original scientific mind.

Conversations on the Edge of the Apocalypse David Jay Brown, 2014-12-23 In his latest interview collection, David Jay Brown has once again gathered some of the most interesting minds of today to consider the future of the human race, the mystery of consciousness, the evolution of technology, psychic phenomena, and more. The book includes conversations with celebrated visionaries and inspirational figures such as Ram Dass, Noam Chomsky, Deepak Chopra, and George Carlin. Part scientific exploration, part philosophical speculation, and part intellectual rollercoaster, the free-form discussions are original

and captivating, and offer surprising revelations. Conversations on the Edge of the Apocalypse is a new look into the minds of some of our groundbreaking leaders and is the perfect gift for science fiction and philosophy fans alike.

The Medical Mafia Guylaine Lanctôt,1995 Expose of medical wrongdoings and how alternative methods hold the key.

Infectious AIDS Peter Duesberg,1995 A collection of 13 articles originally published in scientific journals between 1987 and 1995, that call into question the dogma of Infectious AIDS.

Virus Mania Torsten Engelbrecht,Claus Köhnlein,Samantha Bailey,Stefano Scoglio,2021-04-22 The book 'Virus Mania' has been written with the care of a master-craftsman, courageously evaluating the medical establishment, the corporate elites and the powerful government funding institutions. Wolfgang Weuffen, MD, Professor of Microbiology and Infectious Epidemiology The book 'Virus-Wahn' can be called the first work in which the errors, frauds and general misinformations being spread by official bodies about doubtful or non-virus infections are completely exposed. Gordon T. Stewart, MD, professor of public health and former WHO advisor - - - The population is terrified by reports of so-called COVID-19, measles, swine flu, SARS, BSE, AIDS or polio. However, the authors of Virus Mania, investigative journalist Torsten Engelbrecht, Dr. Claus Köhnlein, MD, Dr. Samantha Bailey, MD, and Dr. Stefano Scoglio, BSc PhD, show that this fearmongering is unfounded and that virus mayhem ignores basic scientific facts: The existence, the pathogenicity and the deadly effects of these agents have never been proven. The book Virus Mania will also outline how modern medicine uses dubious indirect lab tools claiming to prove the existence of viruses such as antibody tests and the polymerase chain reaction (PCR). The alleged viruses may be, in fact, also be seen as particles produced by the cells themselves as a consequence of certain stress factors such as drugs. These particles are then picked up by antibody and PCR tests and mistakenly interpreted as epidemic-causing viruses. The authors analyze all real causes of the illnesses named COVID-19, avian flu, AIDS or Spanish flu, among them pharmaceuticals, lifestyle drugs, pesticides, heavy metals, pollution, malnutrition and stress. To substantiate it, the authors cite dozens of highly renowned scientists, among them the Nobel laureates Kary Mullis, Barbara McClintock, Walter Gilbert and Sir Frank Macfarlane Burnet as well as microbiologist and Pulitzer Prize winner René Dubos, and it presents more than 1,400 solid scientific references. The topic of Virus Mania is of pivotal significance. Drug makers and top scientists rake in enormous sums of money and the media boosts its audience ratings and circulations with sensationalized reporting (the coverage of the New York Times and Der Spiegel are specifically analyzed).The enlightenment about the real causes and true necessities for prevention and cure of illnesses is falling by the wayside. Deadly Deception Robert E. Willner,1994

Denying AIDS Seth C. Kalichman,2014-11-06 Paralleling the discovery of HIV and the rise of the AIDS pandemic, a flock of naysayers has dedicated itself to replacing genuine knowledge with destructive misinformation—and spreading from the fringe to the mainstream media and the think tank. Now from the editor of the journal AIDS and Behavior comes a bold exposé of the scientific and sociopolitical forces involved in this toxic evasion. Denying AIDS traces the origins of AIDS dissidents disclaimers during the earliest days of the epidemic and delves into the psychology and politics of the current denial movement in its various incarnations. Seth Kalichman focuses not on the “difficult” or doubting patient, but on organized, widespread forms of denial (including the idea that HIV itself is a myth and HIV treatments are poison) and the junk science, faulty logic, conspiracy theories, and larger forces of homophobia and racism that fuel them. The malignant results of AIDS denial can be seen in those individuals who refuse to be tested, ignore their diagnoses, or reject the treatments that could save their lives. Instead of ignoring these currents, asserts Kalichman, science has a duty to counter them. Among the topics covered: Why AIDS denialism endures, and why science must understand it. Pioneer virus HIV researcher Peter Duesberg’s role in AIDS denialism. Flawed immunological, virological, and pharmacological pseudoscience studies that are central to texts of denialism. The social conservative agenda and the politics of AIDS denial, from the courts to the White House. The impact of HIV misinformation on public health in South Africa. Fighting fiction with reality: anti-denialism and the scientific community. For anyone affected by, interested in, or working with researchers in HIV/AIDS, and public health professionals in general, the insight and vision of Denying AIDS will inspire outrage, discussion, and ultimately action. AIDS: Virus- or Drug Induced? P.H. Duesberg,2012-12-06 Despite enormous efforts, over 100,000 papers and over \$22 billion spent by the US taxpayer alone, the HIV-AIDS hypothesis has failed to produce any public health benefits, no vaccine, no effective drug, no prevention, no cure, not a single life saved. Is the science system to be blamed? Has science failed to reveal the truth about AIDS? In *AIDS: Virus or Drug Induced?*, two dozen scientists, scholars and journalists have investigated the status quo of AIDS research. Most of them have questioned the HIV-AIDS hypothesis before, but have since been censored, and sociologically excluded from AIDS research, politics and journalism. Here they are united for the first time to put on trial the HIV-AIDS hypothesis. There are those who acquit HIV entirely. Others who make a case for HIV as a necessary, but not a sufficient cause of AIDS. And one medical scientist who, together with the huge AIDS literature, defends the hypothesis that HIV is sufficient to cause AIDS. The book convincingly reveals that the scientific method could very well find a solution to AIDS, but only if ideas can be exchanged freely and if the HIV monopoly can be broken. *AIDS: Virus or Drug*

Induced? illustrates that the solution to AIDS could be as close as one of several, very testable and very affordable alternatives to the unproductive HIV-AIDS hypothesis.

AIDS Gary Null, 2002-03-05 In this first book to bring both establishment and dissenting views of the AIDS crisis into one volume, Gary Null unravels the halftruths that many argue have marred the study of this disease from the start. In clear, jargon-free prose, the book offers an unbiased, unflinching discussion of all sides of each issue. *AIDS: A Second Opinion* argues that the AIDS drama has exposed problematic issues having to do with the functioning of U.S. medical institutions. Null explores a new type of health care, grounded in patients' own choices and dispositions, that poses a challenge to the top-down, expert-controlled medical systems favored by the establishment. Drawing from Null's many years of study of alternative, traditional, and orthodox medicine as well as from interviews with many long-term survivors, the book dissects the claims of the AZT and drug-cocktail approach to treating AIDS and offers a trilogy of treatment strategies based on wide views of how to enhance the immune system and improve overall functioning.

Science Sold Out Rebecca Culshaw, 2007 A former HIV researcher tells the story of her disillusionment with the HIV/AIDS hypothesis and exposes not only its numerous flaws but also problems with the scientific research establishment that enabled this hypothesis to take such a strong, hypnotic hold on the world at large--Provided by publisher.

Virus Mania Torsten Engelbrecht, Claus Köhnlein, 2007 This book has been written with the care of a master-craftsman, courageously evaluating the medical establishment, the corporate elites and the powerful government funding institutions. It is the result of expert knowledge and great attention to details. I edit standard medical textbooks, so I esteem the decades of efforts required to research and write a book like this. ---Wolfgang Weuffen, MD, Professor of Microbiology and Infectious Epidemiology I have been so riveted reading this book that once, while standing on a platform of a major train station, I didn't even notice the Intercity train stop right in front of me and then go on without me. The authors are absolutely right in saying that the virus hunters and the media tend to push unfounded medical theories and sensationalized news based on the seesaw formula of hype and hope. Thereby, the CDC and the RKI snatch research funds worth billions of dollars, while the pharmaceutical industry generates giant profits, among them Tamiflu maker Roche. This book is an important contribution against such dangerous stultifications. --- Sievert Lorenzen, DSc, Professor of Zoology

Biotechnology and Genetic Engineering Kathy Wilson Peacock, 2010 Explains why biotechnology is a relevant and volatile issue. Begins with a history of biotechnology and its effect on agriculture, medicine, and the environment. Equal space is devoted to discussing the efforts of human-rights advocates, animal-rights advocates, and environmentalists to create definitive governmental regulations for this budding industry.

Fauci Charles Ortleb, 2021-07-15 In this explosive little book, the first publisher to devote his newspaper to the coverage of AIDS and Chronic Fatigue Syndrome details the role of Anthony Fauci in the cover-up of the truth about the relationship of

the two epidemics. Given the fact that Anthony Fauci has been at the center of one of the biggest medical cover-ups in history, it is shocking that anyone is putting their trust in him during the COVID-19 pandemic. While mistaken members of the media like Laurie Garrett and Rachel Maddow have called Fauci a great American, Dr. Fauci will soon take his place in history as the chief operator of a scientific Ponzi scheme that has plunged the world into a dystopian medical darkness of fraud, deceit, and neglect. This book is a must-read chapter from *The Chronic Fatigue Syndrome Epidemic Cover-up Volume Two* with a new afterword that explores the extensive damage Fauci's Ponzi scheme has done to the Chronic Fatigue Syndrome community, people stigmatized with HIV/AIDS, and everyone suffering from the viruses that Fauci's cover-up has been concealing from the world: the HHV-6/7/8 family of viruses. The list of the potential victims of Fauci's medical Ponzi scheme include virtually everyone. Even the health of millions of doctors and nurses has been put at risk.

The Great Cholesterol Con Malcolm Kendrick, 2008 Cardiovascular medicine.

The Great Hysteria and The Broken State Sanjeev Sabhlok, 2020-10-10 This pandemic is not a once in 100 year event but closer to a once in 30 year event. The hysteria is grossly overdone. There were WHO guidelines in 2019 about flu-type pandemics and none involved lockdowns. Australian governments including Victoria's had clear plans for all kinds of pandemics. None involved 5-km lockdowns, 23-hour curfews and mandatory masks even in the open air. These lockdowns are causing huge collateral damage while the governments remain in denial. The governments must lift the lockdowns and focus on the at-risk population. We also need constitutional and legal reforms to ensure that this doesn't occur again.

The Third Element of the Blood Antoine Béchamp, Montague Richard Levenson, 1912 First published 1912. Presents the microzymian theory of the organisation of living organisms and organic material. Puts forward the view that the germ theory of disease is inadequate as an explanation of disease and its transmission. Also discusses topics such as the nature of blood fibrin and haemoglobin, the vascular system and aspects of blood coagulation. Author was a professor at the school of pharmacy in the faculty of science at the University of Strasbourg, and later a professor of medical chemistry and pharmacy at the University of Montpellier.
