Under threat: The challenges facing religious minorities in Bangladesh ,2016-11-17 Since 2013, Bangladesh has experienced a series of violent attacks by extremists. The victims have included – besides atheists, secular bloggers, liberals and foreigners – many Buddhists, Christians and Hindus as well as Ahmadis and Shi'a Muslims. A large number of the attacks targeting religious minorities in particular have subsequently been claimed by the organization Islamic State (IS) – a claim vigorously denied by the Bangladeshi government, which has attributed the attacks to domestic militant groups. Regardless of their authorship, since the beginning of this new outbreak of violence, the authorities have visibly failed to ensure the protection of those targeted. For religious minorities, who have borne much of the brunt of these attacks, this violence is the latest chapter in a long history of discrimination and segregation that stretches back to the country's independence and the legacy of colonialism, the 1947 Partition and the bloody civil war in 1971 during which the Hindu population in particular was targeted. This briefing, drawing on a detailed review of published sources, fieldwork by local rapporteurs and first-hand author interviews with a number of activists, lawyers and journalists, aims to provide a fuller picture of the complex challenges facing these communities and the need for a society-wide solution to the insecurity that has convulsed the country in the last few years.

The Authentic Swing Steven Pressfield,2013-09-24 The Story Behind THE LEGEND OF BAGGER VANCE If you've read his books THE WAR OF ART and TURNING PRO, you know that for thirty years Steven Pressfield (GATES OF FIRE, THE AFGHAN CAMPAIGN etc.) wrote spec novel after spec novel before any publisher took him seriously. How did he finally break through? Ignoring just about every rule of commercial book publishing, Pressfield's first novel not only became a major bestseller (over 250,000 copies sold), it was adapted into a feature film directed by Robert Redford and starring Matt Damon, Will Smith, and Charlize Theron. Where did he get the idea? What magical something did THE LEGEND OF BAGGER VANCE have that his previous manuscripts lacked? Why did Pressfield decide to write a novel when he already had a well established screenwriting career? How does writing a publishable novel really work? Taking a page from John Steinbeck's classic JOURNAL OF A NOVEL, Steven Pressfield offers answers for these and scores of other practical writing questions in THE

Mechanization for Rural Development Josef Kienzle, John E. Ashburner, B. G. Sims, 2013 This publication gives a wide-ranging perspective on the present state of mechanization in the developing world, and, as such, constitutes a solid platform on which to build strategies for a sustainable future. Farm mechanization forms an integral plank in the implementation of sustainable crop production intensification methodologies and sustainable intensification necessarily means that the protection of natural resources and the production of ecosystem services go hand-in-hand with intensified production practices. This requires specific mechanization measures to allow crops to be established with minimum soil disturbance, to allow the soil to be protected under organic cover for as long as possible, and to establish crop rotations and associations to feed the soil and to exploit crop nutrients from various soil horizons. This work is the starting point to help the reader understand the complexities and requirements of the task ahead.

Improving Maternal and Reproductive Health in South Asia Sameh El-Saharty, Sadia Chowdhury, Naoko Ohno, Intissar Sarker, 2016-11-29 South Asia Region (SAR) has decreased maternal mortality ratio (MMR) by 65 percent between 1990 and 2013, which was the greatest progress among all world regions. Such achievement implores the question, What made SAR stand out against what is predicted by standard socioeconomic outcomes? *Improving Maternal and Reproductive Health in South Asia: Drivers and Enablers* identifies the interventions and factors that contributed to reducing MMR and improving maternal and reproductive health (MRH) outcomes in SAR. In this study, the analytical framework assumes that improving MRH outcomes is influenced by a multitude of forces from within and outside the health system and considers factors at the household and community levels, as well as interventions in other sectors and factors in the enabling environment. The analysis is based on a structured literature review of the interventions in SAR countries, relevant international experience, and review of the best available evidence from systematic reviews. The focus of the analysis is mainly on assessing the effectiveness of interventions. The findings from this study indicate that the most effective interventions that prevent maternal mortality are those that address the intra-partum stage - the point where most maternal deaths occur - and include improving skilled birth attendance coverage, increasing institutional delivery rates, and scaling up access to emergency obstetric care. There is also adequate evidence that investing in family planning to increase contraceptive use also played a key role during the inter-partum phase by preventing unwanted pregnancies and thus averting the risk of maternal mortality in SAR countries. Outside the programmatic interventions, the levels of household income, women's education, and completion of secondary education of girls were also strongly correlated with improved MRH outcomes. Also, there is strong evidence that health financing schemes - both demand and supply side - and conditional cash transfer programs were

effective in increasing the uptake of MRH services. The study points out to many other interventions with different degrees of effectiveness. The study also identified four major reasons for why SAR achieved this progress in MMR reduction. The best practices and evidence of what works synthesized in this study provide an important way forward for low- and middle-income countries toward achieving the health-related Sustainable Development Goals.

The Robot in the Next Cubicle Larry Boyer,2018-08-07 This optimistic and useful look at the coming convergence of automation, robotics, and artificial intelligence, shows how we can take advantage of this revolution in the workplace, crafting robot-proof jobs and not fearing the robocalypse. It's called the Fourth Industrial Revolution--a revolution fueled by analytics and technology--that consists of data-driven smart products, services, entertainment, and new jobs. Economist and data scientist Larry Boyer lays out the wealth of exciting possibilities this revolution brings as well as the serious concerns about its disruptive impact on the lives of average Americans. Most important, he shows readers how to navigate this sea of change, pointing to strategies that will give businesses and individuals the best chance to succeed and providing a roadmap to thriving in this new economy. Boyer describes how future workers may have to think of themselves as entrepreneurs, marketing their special talents as valuable skills that machines cannot do. This will be especially important in the coming employment climate, when full-time jobs are likely to decrease and industries move toward contract-based employment. He provides guidelines for identifying your individual talents and pursuing the training that will make you stand out. He also shows you how to promote your personal brand to give more exposure to your unique skills. Whether we like it or not, automation will soon transform the work place and employment prospects. This book will show you how to look for and take advantage of the opportunities that this revolution presents.

Trading for a Living Alexander Elder,1993-03-22 Trading for a Living Successful trading is based on three M's: Mind, Method, and Money. Trading for a Living helps you master all of those three areas: * How to become a cool, calm, and collected trader * How to profit from reading the behavior of the market crowd * How to use a computer to find good trades * How to develop a powerful trading system * How to find the trades with the best odds of success * How to find entry and exit points, set stops, and take profits Trading for a Living helps you discipline your Mind, shows you the Methods for trading the markets, and shows you how to manage Money in your trading accounts so that no string of losses can kick you out of the game. To help you profit even more from the ideas in Trading for a Living, look for the companion volume--Study Guide for Trading for a Living. It asks over 200 multiple-choice questions, with answers and 11 rating scales for sharpening your trading skills. For example: Question Markets rise when * there are more buyers than sellers * buyers are more aggressive than sellers * sellers are afraid and demand a premium * more shares or contracts are bought than sold * I and II * II and III *

II and IV * III and IV Answer B. II and III. Every change in price reflects what happens in the battle between bulls and bears. Markets rise when bulls feel more strongly than bears. They rally when buyers are confident and sellers demand a premium for participating in the game that is going against them. There is a buyer and a seller behind every transaction. The number of stocks or futures bought and sold is equal by definition.

One Good Trade Mike Bellafiore, 2010-07-02 An inside look at what it really takes to become a better trader A proprietary trading firm consists of a group of professionals who trade the capital of the firm. Their income and livelihood is generated solely from their ability to take profits consistently out of the markets. The world of prop trading is mentally and emotionally challenging, but offers substantial rewards to the select few who can master this craft called trading. In *One Good Trade: Inside the Highly Competitive World of Proprietary Trading*, author Mike Bellafiore shares the principles and techniques that have enabled him to navigate the most challenging of markets over the past twelve years. He explains how he has imparted those techniques to an elite desk of traders at the proprietary trading firm he co-founded. In doing so, he lifts the veil on the inner workings of his firm, shedding light on the challenges of prop trading and insight on why traders succeed or fail. An important contribution to trading literature, the book will help all traders by: Emphasizing the development of skills that are critical to success, such as the fundamentals of *One Good Trade*, *Reading the Tape*, and *finding Stocks In Play* Outlining the factors that really make the difference between a consistently profitable trader and one who underperforms Sharing entertaining, hysterical, and page turning stories of traders who have excelled or failed and why, many trained by the author, with an essential trading principle wrapped inside *Becoming a better trader takes discipline, skill development, and statistically profitable trading strategies*, and this book will show you how to develop all three.

Leadership and Growth David Brady, Michael Spence, 2010-01-04 Does leadership affect economic growth and development? Is leadership an exogenous determinant or an endogenous outcome of growth and development processes? Can we differentiate between the two? Do leaders decisions and actions vary in importance over various stages in the process, at least in successful cases? How important is choosing the right economic model? To what extent does leadership affect the explicit or implicit time horizons of policy choices? Is leadership an important determinant of inclusiveness in growth? In what ways do leaders build consensus or institutions to allow time for the economic plan to work? What challenges does economic success generate? How do successful leaders adapt to new problems such as income inequality and a rising middle class? Does the creation of new institutions play any role in solving these problems? Why do leaders often choose second best political economic compromises in economic development? This book has been prepared for the Commission on Growth and Development to evaluate the state of knowledge on the relationship between leadership and economic growth. It does not pretend to provide all the answers, but does review the evidence, identify insights and offers examples of leaders making decisions and acting in ways that enhance economic growth. It examines a variety of topics

including leaders roles in: promoting national unity, building good solid institutions, choosing innovative and localized policies, and creating political consensus for long run policy implementation. Written by prominent academics and actual policy makers, Leadership and Growth seeks to create a better understanding of the role of leadership in growth and to encourage further studies of the role of leadership in economic growth.

Political Violence in South and Southeast Asia Itty Abraham,Edward Newman,Meredith Leigh Weiss,2010 This volume explores the sources and manifestations of political violence in South and Southeast Asia and the myriad roles that it plays in everyday life and as part of historical narrative. It considers and critiques the manner in which political violence is understood and constructed, and the common assumptions that prevail regarding the causes, victims, and perpetrators of this violence. By focusing on the social and political context of these regions, the book presents a critical understanding of the nature of political violence and provides an alternative narrative to that found in mainstream analysis of terrorism. Political Violence in South and Southeast Asia brings together political scientists and anthropologists with intimate knowledge of the politics and society of these regions, who present unique perspectives on topics including assassinations, riots, state violence, the significance of geographic borders, external influences and intervention, and patterns of recruitment and rebellion. Contributors include Paula Banerjee (Calcutta University and Calcutta Research Group), Vincent Boudreau (City College of New York), Paul R. Brass (University of Washington), Naureen Chowdhury Fink (International Peace Institute, New York), Natasha Hamilton-Hart (National University of Singapore), Sankaran Krishna (University of Hawaii--Manoa), Darini Rajasingham (Social Scientists Association and International Centre for Ethnic Studies, Sri Lanka), Geoffrey Robinson (UCLA), Varun Sahni (Jawaharlal Nehru University, New Delhi), Shamuel Tharu (Jawaharlal Nehru University).

Life as Politics Asef Bayat,2013-05-01 Prior to 2011, popular imagination perceived the Muslim Middle East as unchanging and unchangeable, frozen in its own traditions and history. In Life as Politics, Asef Bayat argues that such presumptions fail to recognize the routine, yet important, ways in which ordinary people make meaningful change through everyday actions. First published just months before the Arab Spring swept across the region, this timely and prophetic book sheds light on the ongoing acts of protest, practice, and direct daily action. The second edition includes three new chapters on the Arab Spring and Iran's Green Movement and is fully updated to reflect recent events. At heart, the book remains a study of agency in times of constraint. In addition to ongoing protests, millions of people across the Middle East are effecting transformation through the discovery and creation of new social spaces within which to make their claims heard. This eye-opening book makes an important contribution to global debates over the meaning of social movements and the dynamics of social change.

Water Ethics M.Ramon Llamas,L. Martinez Cortina,Aditi Mukherji,2009-03-12 In the context of the current financial crisis, and at a time of deep global change, growing attention is paid to the global norms and ethical values that could

underpin future global policy. Water is a key global resource. At the 3rd Marcelino Botin Foundation Water Workshop, held in Santander, Spain, June 12-14, 2007, the role of ethics in the de

Cascades of Violence John Braithwaite, Bina D'Costa, 2018-02-01 As in the cascading of water, violence and nonviolence can cascade down from commanding heights of power (as in waterfalls), up from powerless peripheries, and can undulate to spread horizontally (flowing from one space to another). As with containing water, conflict cannot be contained without asking crucial questions about which variables might cause it to cascade from the top-down, bottom up and from the middle-out. The book shows how violence cascades from state to state. Empirical research has shown that nations with a neighbor at war are more likely to have a civil war themselves (Sambanis 2001). More importantly in the analysis of this book, war cascades from hot spot to hot spot within and between states (Autesserre 2010, 2014). The key to understanding cascades of hot spots is in the interaction between local and macro cleavages and alliances (Kalyvas 2006). The analysis exposes the folly of asking single-level policy questions like do the benefits and costs of a regime change in Iraq justify an invasion? We must also ask what other violence might cascade from an invasion of Iraq? The cascades concept is widespread in the physical and biological sciences with cascades in geology, particle physics and the globalization of contagion. The past two decades has seen prominent and powerful applications of the cascades idea to the social sciences (Sunstein 1997; Gladwell 2000; Sikkink 2011). In his discussion of ethnic violence, James Rosenau (1990) stressed that the image of turbulence developed by mathematicians and physicists could provide an important basis for understanding the idea of bifurcation and related ideas of complexity, chaos, and turbulence in complex systems. He classified the bifurcated systems in contemporary world politics as the multicentric system and the statecentric system. Each of these affects the others in multiple ways, at multiple levels, and in ways that make events enormously hard to predict (Rosenau 1990, 2006). He replaced the idea of events with cascades to describe the event structures that 'gather momentum, stall, reverse course, and resume anew as their repercussions spread among whole systems and subsystems' (1990: 299). Through a detailed analysis of case studies in South Asia, that built on John Braithwaite's twenty-five year project Peacebuilding Compared, and coding of conflicts in different parts of the globe, we expand Rosenau's concept of global turbulence and images of cascades. In the cascades of violence in South Asia, we demonstrate how micro-events such as localized riots, land-grabbing, pervasive militarization and attempts to assassinate political leaders are linked to large scale macro-events of global politics. We argue in order to prevent future conflicts there is a need to understand the relationships between history, structures and agency; interest, values and politics; global and local factors and alliances.

Evolution of Sanitation and Wastewater Technologies through the Centuries Andreas N. Angelakis, Joan B. Rose, 2014-09-14 Most of the technological developments relevant to water supply and wastewater date back to more than to five thousand years ago. These developments were driven by the necessity to make efficient use of natural resources, to make civilizations more resistant to destructive natural elements, and to improve the standards of life, both at public and private level. Rapid technological progress in the 20th century created a disregard for past sanitation and wastewater and stormwater technologies that were considered to be far behind the present ones. A great deal of unresolved problems in the developing world related to the wastewater management principles, such as the decentralization of the processes, the durability of the water projects, the cost effectiveness, and sustainability issues, such as protection from floods and droughts were intensified to an unprecedented degree. New problems have arisen such as the contamination of surface and groundwater. Naturally, intensification of unresolved problems has led to the reconsideration of successful past achievements. This retrospective view, based on archaeological, historical, and technical evidence, has shown two things: the similarity of physicochemical and biological principles with the present ones and the advanced level of wastewater engineering and management practices. *Evolution of Sanitation and Wastewater Technologies through the Centuries* presents and discusses the major achievements in the scientific fields of sanitation and hygienic water use systems throughout the millennia, and compares the water technological developments in several civilizations. It provides valuable

insights into ancient wastewater and stormwater management technologies with their apparent characteristics of durability, adaptability to the environment, and sustainability. These technologies are the underpinning of modern achievements in sanitary engineering and wastewater management practices. It is the best proof that “the past is the key for the future”. Evolution of Sanitation and Wastewater Technologies through the Centuries is a textbook for undergraduate and graduate courses of Water Resources, Civil Engineering, Hydraulics, Ancient History, Archaeology, Environmental Management and is also a valuable resource for all researchers in the these fields. Authors: Andreas N. Angelakis, Institute of Iraklion, Iraklion, Greece and Joan B. Rose, Michigan State University, East Lansing, MI, USA

Deals and Development Eric Werker, Lant Pritchett, Kunal Sen, 2018 When are developing countries able to initiate periods of rapid growth and why have so few been able to sustain growth over decades? This book provides a novel conceptual framework built from a political economy of business-government relations and applies it to nine countries across Africa and Asia, drawing actionable policy recommendations.
