**The Soul of A New Machine** Tracy Kidder,2011-08-23 Tracy Kidder's riveting (Washington Post) story of one company's efforts to bring a new microcomputer to market won both the Pulitzer Prize and the National Book Award and has become essential reading for understanding the history of the American tech industry. Computers have changed since 1981, when The Soul of a New Machine first examined the culture of the computer revolution. What has not changed is the feverish pace of the high-tech industry, the go-for-broke approach to business that has caused so many computer companies to win big (or go belly up), and the cult of pursuing mind-bending technological innovations. The Soul of a New Machine is an essential chapter in the history of the machine that revolutionized the world in the twentieth century. Fascinating...A surprisingly gripping account of people at work. --Wall Street Journal

*History, Power, Text* Timothy Neale, Crystal McKinnon, Eve Vincent, 2014-01-01 *History, Power, Text: Cultural Studies and Indigenous Studies* is a collection of essays on Indigenous themes published between 1996 and 2013 in the journal known first as *UTS Review* and now as *Cultural Studies Review*. This journal opened up a space for new kinds of politics, new styles of writing and new modes of interdisciplinary engagement. *History, Power, Text* highlights the significance of just one of the exciting interdisciplinary spaces, or meeting points, the journal enabled. 'Indigenous cultural studies' is our name for the intersection of cultural studies and Indigenous studies showcased here. This volume republishes key works by academics and writers Katelyn Barney, Jennifer Biddle, Tony Birch, Wendy Brady, Gillian Cowlshaw, Robyn Ferrell, Bronwyn Fredericks, Heather Goodall, Tess Lea, Erin Manning, Richard Martin, Aileen Moreton-Robinson, Stephen Muecke, Alison Ravenscroft, Deborah Bird Rose, Lisa Slater, Sonia Smallacombe, Rebe Taylor, Penny van Toorn, Eve Vincent, Irene Watson and Virginia Watson—many of whom have taken this opportunity to write reflections on their work—as well as interviews between Christine Nicholls and painter Kathleen Petyarre, and Anne Brewster and author Kim Scott. **The Research Interview** S. Mann, 2016-04-29 *Research and Qualitative Interviews* brings into focus the decisions that the interviewer faces by taking a data-led approach in order to open up choices and decisions in the process of planning for, managing, analysing and representing interviews. The chapters concentrate on the real-time, moment-by-moment nature of interview management and interaction. A key feature of the book is the inclusion of reflexive vignettes that foreground the voices and experience of qualitative researchers (both novices and more expert practitioners). The vignettes demonstrate the importance of reflecting on and learning from interactional experience. In addition, the book provides an overview of different types of interviews, commenting on the orientation and make-up of each type. Overall, this book encourages reflective thinking about the use of research interviews. It distinguishes between reflection, reflective practice and reflexivity. All the chapters focus on recurring choices, dilemmas and puzzles; offering advice in opening out and engaging with these aspects of the research interview.

*The Signal and the Noise* Nate Silver, 2012-09-27 NEW YORK TIMES BESTSELLER • The groundbreaking exploration of probability and uncertainty that explains how to make better predictions in a world drowning in data, from the nation's foremost political forecaster—updated with insights into the pandemic, journalism today, and polling One of The Wall Street Journal's Ten Best Works of Nonfiction of the Year “Could turn out to be one of the more momentous books of the decade.”—The New York Times Book Review Most predictions fail, often at great cost to society, because experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the “prediction paradox”: The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. Drawing on his own groundbreaking work in sports and politics, Nate Silver examines the world of prediction, investigating how to seek truth from data. In *The Signal and the Noise*, Silver visits innovative forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He discovers that what the most accurate ones have in common is a superior command of probability—as well as a healthy dose of humility. With everything from the global economy to the fight against disease hanging on the quality of our predictions, Nate Silver's insights are an essential read.

**The Political Economy of Rent-Seeking** Charles Rowley, Robert D. Tollison, Gordon Tullock, 1988-01-31 It is now twenty years since the concept of rent-seeking was first devised by Gordon Tullock, though he was not responsible for coining the phrase itself. His initial insight has burgeoned over two decades into a major research program which has had an impact not only on public choice, but also on the related disciplines of economics, political science, and law and economics. The reach of the insight has proved to be universal, with relevance not just for the democracies, but also, and arguably more important, for all forms of autocracy, irrespective of ideological complexion. It is not surprising, therefore, that this volume is the third edited publication dedicated specifically to scholarship into rent-seeking behavior. The theory of rent-seeking bridges normative and positive analyses of state action. In its normative dimension, rent-seeking scholarship has expanded, enlivened, in some respects turned on its head, the traditional welfare analyses of such features of modern economics as monopoly, externalities, public goods, and trade protection devices. In its positive dimension, rent-seeking contributions have provided an important analytical perspective from which to understand and to predict the behavior of politicians, interest

groups and bureaucrats, the media and the academy within the political market place. This bridge between normative and positive elements of analysis is invaluable in facilitating an understanding of and evaluating the costs of state activity within a consistent paradigm.

*Developing the Higher Education Curriculum* Brent Carnell, Dilly Fung, 2017-11-13 A complementary volume to Dilly Fung's *A Connected Curriculum for Higher Education* (2017), this book explores 'research-based education' as applied in practice within the higher education sector. A collection of 15 chapters followed by illustrative vignettes, it showcases approaches to engaging students actively with research and enquiry across disciplines. It begins with one institution's creative approach to research-based education - UCL's Connected Curriculum, a conceptual framework for integrating research-based education into all taught programmes of study - and branches out to show how aspects of the framework can apply to practice across a variety of institutions in a range of national settings. The 15 chapters are provided by a diverse range of authors who all explore research-based education in their own way. Some chapters are firmly based in a subject-discipline - including art history, biochemistry, education, engineering, fashion and design, healthcare, and veterinary sciences - while others reach across geopolitical regions, such as Australia, Canada, China, England, Scotland and South Africa. The final chapter offers 12 short vignettes of practice to highlight how engaging students with research and enquiry can enrich their learning experiences, preparing them not only for more advanced academic learning, but also for professional roles in complex, rapidly changing social contexts.

*Mindshift* Barbara Oakley, PhD, 2017-04-18 *Mindshift* reveals how we can overcome stereotypes and preconceived ideas about what is possible for us to learn and become. At a time when we are constantly being asked to retrain and reinvent ourselves to adapt to new technologies and changing industries, this book shows us how we can uncover and develop talents we didn't realize we had—no matter what our age or background. We're often told to "follow our passions." But in *Mindshift*, Dr. Barbara Oakley shows us how we can broaden our passions. Drawing on the latest neuroscientific insights, Dr. Oakley shepherds us past simplistic ideas of "aptitude" and "ability," which provide only a snapshot of who we are now—with little consideration about how we can change. Even seemingly "bad" traits, such as a poor memory, come with hidden advantages—like increased creativity. Profiling people from around the world who have overcome learning limitations of all kinds, Dr. Oakley shows us how we can turn perceived weaknesses, such as impostor syndrome and advancing age, into strengths. People may feel like they're at a disadvantage if they pursue a new field later in life; yet those who change careers can be fertile cross-pollinators: They bring valuable insights from one discipline to another. Dr. Oakley teaches us strategies for learning that are backed by neuroscience so that we can realize the joy and benefits of a learning lifestyle. *Mindshift* takes us deep inside the world of how people change and grow. Our biggest stumbling blocks can be our own preconceptions, but with the right mental insights, we can tap into hidden potential and create new opportunities.

**New Laws of Robotics** Frank Pasquale,2020-10-27 “Essential reading for all who have a vested interest in the rise of AI.” —Daryl Li, *AI & Society* “Thought-provoking...Explores how we can best try to ensure that robots work for us, rather than against us, and proposes a new set of laws to provide a conceptual framework for our thinking on the subject.” —Financial Times “Pasquale calls for a society-wide reengineering of policy, politics, economics, and labor relations to set technology on a more regulated and egalitarian path...Makes a good case for injecting more bureaucracy into our techno-dreams, if we really want to make the world a better place.” —Wired “Pasquale is one of the leading voices on the uneven and often unfair consequences of AI in our society...Every policymaker should read this book and seek his counsel.” —Safiya Noble, author of *Algorithms of Oppression* Too many CEOs tell a simple story about the future of work: if a machine can do what you do, your job will be automated, and you will be replaced. They envision everyone from doctors to soldiers rendered superfluous by ever-more-powerful AI. Another story is possible. In virtually every walk of life, robotic systems can make labor more valuable, not less. Frank Pasquale tells the story of nurses, teachers, designers, and others who partner with technologists, rather than meekly serving as data sources for their computerized replacements. This cooperation reveals the kind of technological advance that could bring us all better health care, education, and more, while maintaining meaningful work. These partnerships also show how law and regulation can promote prosperity for all, rather than a zero-sum race of humans against machines. Policymakers must not allow corporations or engineers alone to answer questions about how far AI should be entrusted to assume tasks once performed by humans, or about the optimal mix of robotic and human interaction. The kind of automation we get—and who benefits from it—will depend on myriad small decisions about how to develop AI. Pasquale proposes ways to democratize that decision-making, rather than centralize it in unaccountable firms. Sober yet optimistic, *New Laws of Robotics* offers an inspiring vision of technological progress, in which human capacities and expertise are the irreplaceable center of an inclusive economy.

**Getting the Word Out** Maria Bonn, Mike Furlough,2015 In the past decade there has been an intense growth in the

number of library publishing services supporting faculty and students. Unified by a commitment to both access and service, library publishing programs have grown from an early focus on backlist digitization to encompass publication of student works, textbooks, research data, as well as books and journals. This growing engagement with publishing is a natural extension of the academic library's commitment to support the creation of and access to scholarship. This volume includes chapters by some of the most talented thinkers in this area of librarianship, exploring topics such as the economics of publishing and the challenges of collaboration, and surveying the service landscape for publishing in support of a variety of formats and methods.0.
