When Breath Becomes Air Paul Kalanithi, 2016-01-12 #1 NEW YORK TIMES BESTSELLER • PULITZER PRIZE FINALIST • This inspiring, exquisitely observed memoir finds hope and beauty in the face of insurmountable odds as an idealistic young neurosurgeon attempts to answer the question, What makes a life worth living? "Unmissable . . . Finishing this book and then forgetting about it is simply not an option."—Janet Maslin, The New York Times ONE OF THE BEST BOOKS OF THE YEAR: The New York Times Book Review, People, NPR, The Washington Post, Slate, Harper's Bazaar, Time Out New York, Publishers Weekly, BookPage At the age of thirty-six, on the verge of completing a decade's worth of training as a neurosurgeon, Paul Kalanithi was diagnosed with stage IV lung cancer. One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. When *Breath Becomes Air* chronicles Kalanithi's transformation from a naïve medical student "possessed," as he wrote, "by the question of what, given that all organisms die, makes a virtuous and meaningful life" into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present? What does it mean to have a child, to nurture a new life as another fades away? These are some of the questions Kalanithi wrestles with in this profoundly moving, exquisitely observed memoir. Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. "I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and everything," he wrote. "Seven

words from Samuel Beckett began to repeat in my head: 'I can't go on. I'll go on.'" When Breath Becomes Air is an unforgettable, life-affirming reflection on the challenge of facing death and on the relationship between doctor and patient, from a brilliant writer who became both. Finalist for the PEN Center USA Literary Award in Creative Nonfiction and the Books for a Better Life Award in Inspirational Memoir

Nature, Empire, and Nation Jorge Cañizares-Esguerra, 2006 This collection of essays explores two traditions of interpreting and manipulating nature in the early-modern and nineteenth-century Iberian world: one instrumental and imperial, the other patriotic and national. Imperial representations laid the ground for the epistemological transformations of the so-called Scientific Revolutions. The patriotic narratives lie at the core of the first modern representations of the racialized body, Humboldtian theories of biodistribution, and views of the landscape as a historical text representing different layers of historical memory.

Is Reality Optional? Thomas Sowell, 1993 Sowell challenges all the assumptions of contemporary liberalism on issues ranging from the economy to race to education in this collection of controversial essays, and captures his thoughts on politics, race, and common sense with a section at the end for thought-provoking quotes.

Observations on Modernity Niklas Luhmann, 1998 This collection of five essays by Germany's most prominent and influential social thinker both links Luhmann's social theory to the question "What is modern about modernity?" and shows the origins and context of his theory. In the introductory essay, "Modernity in Contemporary Society," Luhmann develops the thesis that the modern epistemological situation can be seen as the consequence of a radical change in social macrostructures that he calls "social differentiation," thereby designating the juxtaposition of and interaction between a growing number of social subsystems without any hierarchical structure. "European Rationality" defines rationality as the capacity to see the difference between systems and their environment as a unity. Luhmann argues that, in a world characterized by contingency, rationality tends to become coextensive with imagination, a view that challenges their classical binary opposition and opens up the possibility of seeing modern rationality as a paradox. In the third essay, "Contingency as Modern Society's Defining Attribute," Luhmann develops a further and probably even more important paradox: that the generalization of contingency or cognitive uncertainty is precisely what provides stability within modern societies. In the process, he argues that medieval and early modern theology can be seen as a "preadaptive advance" through which Western thinking prepared itself for the modern epistemological situation. In "Describing the Future," Luhmann claims that neither the traditional hope of learning from history nor the complementary hope of cognitively anticipating the future can be

maintained, and that the classical concept of the future should be replaced by the notion of risk, defined as juxtaposing the expectation of realizing certain projects and the awareness that such projects might fail. The book concludes with "The Ecology of Ignorance," in which Luhmann outlines prospective research areas "for sponsors who have yet to be identified."

The Work of Fire Maurice Blanchot, 1995 Maurice Blanchot is arguably the key figure after Sartre in exploring the relation between literature and philosophy. Blanchot developed a distinctive, limpid form of essay writing; these essays, in form and substance, left their imprint on the work of the most influential French theorists. The writings of Barthes, Foucault, and Derrida are unimaginable without Blanchot. Published in French in 1949, *The Work of Fire* is a collection of twenty-two essays originally published in literary journals. Certain themes recur repeatedly: the relation of literature and language to death; the significance of repetition; the historical, personal, and social function of literature; and simply the question what is at stake in the fact that something such as art or literature exists? Among the authors discussed are Kafka, Mallarmé, Hölderlin, Baudelaire, Rimbaud, Sartre, Gide, Pascal, Valéry, Hemingway, and Henry Miller.

Being Singular Plural Jean-Luc Nancy, 2000 This book, by one of the most innovative and challenging contemporary thinkers, rethinks community and the very idea of the social. Nancy's fundamental argument is that being is always being with, that I is not prior to we, that existence is essentially co-existence.

Rogues Jacques Derrida, 2005 *Rogues*, published in France under the title *Voyous*, comprises two major lectures that Derrida delivered in 2002 investigating the foundations of the sovereignty of the nation-state. The term *État voyou* is the

French equivalent of rogue state, and it is this outlaw designation of certain countries by the leading global powers that Derrida rigorously and exhaustively examines. Derrida examines the history of the concept of sovereignty, engaging with the work of Bodin, Hobbes, Rousseau, Schmitt, and others. Against this background, he delineates his understanding of democracy to come, which he distinguishes clearly from any kind of regulating ideal or teleological horizon. The idea that democracy will always remain in the future is not a temporal notion. Rather, the phrase would name the coming of the unforeseeable other, the structure of an event beyond calculation and program. Derrida thus aligns this understanding of democracy with the logic he has worked out elsewhere. But it is not just political philosophy that is brought under deconstructive scrutiny here: Derrida provides unflinching and hard-hitting assessments of current political realities, and these essays are highly engaged with events of the post-9/11 world.

The Art of Procrastination John Perry, 2012-08-28 At last: Self-help for procrastinators. (The secret: acceptance!) Filled with charm, tongue-in-cheek wit, and the insights of a lifelong introspective dawdler, *The Art of Procrastination* is a philosophical self-help program for every reader who suffers the pangs of being a procrastinator. John Perry celebrates this nearly universal character flaw by pointing out how often procrastinators are, paradoxically, doers. They may not be accomplishing everything on their to-do lists, but that doesn't make them slackers. It just indicates a need to rethink the to-do list. He also introduces the philosophical notion of akrasia (the mystery of why we often choose to act against our better judgement), examines the torturous relationship between procrastination and perfectionism, and shows how to give yourself permission to do an imperfect but, in fact, perfectly good job. These are strategies—task triage, horizontal organization. Underlying causes—right-parenthesis deficit disorder. Anecdotes and ideas. But above all, an attitude of acceptance. Pat yourself on the back for what you manage to get done—but don't stop enjoying that time you waste, too. Who knows where daydreams will lead?

Essays on Actions and Events Donald Davidson, 2001-09-27 Donald Davidson has prepared a new edition of his classic 1980 collection of *Essays on Actions and Events*, including two additional essays. This seminal work on the nature of human action features influential discussions of such topics as freedom to act; weakness of the will; the logical form of talk about actions, intentions, and causality; the logic of practical reasoning; Hume's theory of the indirect passions; and the nature and limits of decision theory. 'a classic in its field.' P. F. Strawson -; Donald Davidson has prepared a new edition of his classic 1980 collection of *Essays on Actions and Events*, including two additional essays. In this seminal investigation of the nature of human action, Davidson argues for an ontology which includes events along with persons and other objects. Certain events are identified and explained as actions when they are viewed as caused and rationalized by reasons; these same events, when described in physical, biological, or physiological terms, may be explained by appeal to natural laws. The mental and the physical thus constitute irreducibly discrete ways of explaining and understanding events and their causal relations. Among

the topics discussed are: freedom to act; weakness of the will; the logical form of talk about actions, intentions, and causality; the logic of practical reasoning; Hume's theory of the indirect passions; and the nature and limits of decision theory. The introduction, cross-references, and appendices emphasize the relations between the essays and explain how Davidson's views have developed.

In Other Words Pierre Bourdieu, 1990 Pierre Bourdieu is one of the most protean intellectual forces in contemporary French thought. He holds the chair in sociology at the prestigious Collège de France, yet his influence extends far beyond the area of sociological research and theory. Bourdieu's work, presented in over twenty books, lies on the borders of philosophy, anthropology and ethnology, and cultural theory. The present volume consists of diverse individual texts, produced between 1980 and 1986, which take two forms: interviews in which Bourdieu confronts a series of probing and intelligent interviewers, and conference papers that clarify and extend specific areas of his current research. Now that Bourdieu's work has achieved wide diffusion and celebrity, this is an appropriate time for this volume, a pause for retrospection and resynthesis, for correction of misreadings and extension of previous insights, and for projection of the next stages of his work. For this English edition, Bourdieu's celebrated inaugural lecture at the Collège de France, *Leçon sur la Leçon*, has been added. Because of the verve and clarity of Bourdieu's arguments in this book, it is a very readable and concise introduction to his work.

Remaking College Mitchell Stevens, Michael W. Kirst, 2015-01-07 Between 1945 and 1990 the United States built the largest and most productive higher education system in world history. Over the last two decades, however, dramatic budget cuts to public academic services and skyrocketing tuition have made college completion more difficult for many. Nevertheless, the democratic promise of education and the global competition for educated workers mean ever growing demand. *Remaking College* considers this changing context, arguing that a growing accountability revolution, the push for greater efficiency and productivity, and the explosion of online learning are changing the character of higher education. Writing from a range of disciplines and professional backgrounds, the contributors each bring a unique perspective to the fate and future of U.S. higher education. By directing their focus to schools doing the lion's share of undergraduate instruction—community colleges, comprehensive public universities, and for-profit institutions—they imagine a future unencumbered by dominant notions of traditional students, linear models of achievement, and college as a four-year residential experience. The result is a collection rich with new tools for helping people make more informed decisions about college—for themselves, for their children, and for American society as a whole.
