How to Write a Thesis Umberto Eco, 2015-02-27 The wise and witty guide to researching and writing a thesis, by the bestselling author of *The Name of the Rose*—now published in English for the first time. Learn the art of the thesis from a giant of Italian literature and philosophy—from choosing a topic to organizing a work schedule to writing the final draft. By the time Umberto Eco published his best-selling novel *The Name of the Rose*, he was one of Italy’s most celebrated intellectuals, a distinguished academic, and the author of influential works on semiotics. Some years before that, Eco published a little book for his students, in which he offered useful advice on all the steps involved in researching and writing a thesis. Since then, it has been translated into 17 languages—and is now for the first time presented in English. Eco’s approach is anything but dry and academic. He not only offers practical advice but also considers larger questions about the value of the thesis-writing exercise in six different parts: • The Definition and Purpose of a Thesis • Choosing the Topic • Conducting the Research • The Work Plan and the Index Cards • Writing the Thesis • The Final Draft Eco advises students how to avoid “thesis neurosis” and he answers the important question “Must You Read Books?” He reminds students “You

are not Proust” and “Write everything that comes into your head, but only in the first draft.” Of course, there was no Internet in 1977, but Eco’s index card research system offers important lessons about critical thinking and information curating for students of today who may be burdened by Big Data. Irreverent and often hilarious, How to Write a Thesis is unlike any other writing manual and belongs on the bookshelves of students, teachers, writers, and Eco fans everywhere.

World Anthropologies Gustavo Lins Ribeiro, Arturo Escobar, 2020-07-12 Since its inception, anthropology's authority has been based on the assumption that it is a unified discipline emanating from the West. In an age of heightened globalization, anthropologists have failed to discuss consistently the current status of their practice and its mutations across the globe. *World Anthropologies* is the first book to provoke this conversation from various regions of the world in order to assess the diversity of relations between regional or national anthropologies and a contested, power-laden Western discourse. Can a planetary anthropology cope with both the 'provincial cosmopolitanism' of alternative anthropologies and the 'metropolitan provincialism' of hegemonic schools? How might the resulting 'world anthropologies' challenge the current panorama in which certain allegedly national anthropological traditions have more paradigmatic weight - and hence more power - than others? Critically examining the international dissemination of anthropology within and across national power fields, contributors address these questions and provide the outline for a veritable world anthropologies project.
