Física para las ciencias de la vida Alan H. Cromer,1981 Este libro tiene por finalidad proporcionar a los estudiantes de Biología, Farmacia, Medicina, Terapia física, Educación física y demás Ciencias afines, los conocimientos de Física que necesitan para su trabajo profesional. La selección del material se ha hecho pensando que fuese apropiado para las Ciencias de la vida y conveniente como curso de introducción a la Física. Estos criterios han producido algunos cambios en el acostumbrado énfasis de los temas, pero no han limitado la amplia visión de conjunto que se exige de un texto de Física general.

**Imágenes sobre la Universidad del Valle** Erico Rentería Pérez,2011-12-05 En el contexto de exigencias institucionales y proyecciones a nivel regional, nacional e internacional, para las instituciones de educación superior, en los últimos 10 años, han surgido una serie de normas y requerimientos relacionados con políticas de certificación o acreditación que implican procesos de autoevaluación y retroalimentación relacionados con los objetivos misionales como formación, investigación y proyección social, en función de la manera como diferentes grupos sociales ven, evalúan o identifican la gestión de las instituciones de educación superior. Este libro presenta, como producto de un estudio amplio en cinco departamentos y 10 municipios, una aproximación sobre la imagen de la Universidad del Valle a partir de versiones o voces provenientes de diferentes sectores y actores de la sociedad, a nivel regional y nacional, teniendo en cuenta beneficiarios directos e indirectos de las actividades de formación en pregrado y postgrado, investigación y proyección social de la misma, en su área principal de influencia: suroccidente colombiano y parte del eje cafetero. Teniendo en cuenta que la Universidad del Valle no se limita a la docencia sino que, cumpliendo con sus objetivos misionales y su estatuto de universidad pública, se caracteriza, entre otras cosas, por altos desarrollos en investigación y producción intelectual, se presentan versiones de personas vinculadas —además de los relacionados con programas académicos de pregrado y postgrado— a otros grupos objetivo de sectores ligados a I+D tales como grupos de investigación o revistas escalafonados por Colciencias, como voces importantes de personas que representan niveles especializados de la academia y la ciencia en el país.
